Angel talk flips NWO to Peace on Earth, Devolution sunrise

Introduction

At first it will seem like only tiny steps of progress are occurring and it may look like one step forward, two steps back. But once social change begins, it will be like a snowball coming down a mountain and as it does so, it will gather momentum, weight and speed. We are seeing in action sociological change and revolution on a worldwide scale, which is no easy task.

This collection of transcripts is presented as a public service for researchers and the media disabled to enable a one-stop search capability of channeled documents via [Michelle Fielding](#) relating to devolution of a two-party political system into a devolved situation where citizens can sidestep the corruptible middlemen that currently enslave them and usurp their personal and global sovereignty. Michelle is a seasoned channeling practitioner known for her accuracy. Her disclosures from wherever they emanate provide public guideposts to help the conduct of our lives during this trying devolution adjustment period.

Author and researcher [Patel Patriot](#) aka Patrick Gunnels has asserted that Trump knew well in advance from his advisors the various routes by which the DNC intended to steal the 2020 election and carefully drafted a set of Executive Orders, public and classified countermeasures.

Drawing on the strategy of war time president Lincoln, he draws on parallels Trump put into place to be able to clearly claim the status of war time president himself in a way hidden from view.

A war time president has at his disposal virtually unlimited power to arrest, imprison, seize assets, and place the military in whatever level of visibility is called for.

He does not have to announce his claimed status early in the game, he can just observe, bait, and toy with his opponents in ways that they will self-identify as do nothing puppets.

He can pounce unannounced at a time of his choosing for maximum impact, bewilderment and embarrassment. It is a form of invisible curative military rule suitable for this transition period.

The intended purpose, *devolution of the two party system*, is to drain the swamp of corruption and place key players in position for a modern day constitutional enhancement of democracy for direct citizen control of governance. This revolutionary goal is, by nature, a long slooow process that involves extensive planning at a political and military level. It is a global undertaking and involves the use of quantum technologies unavailable to past generations to enable a sovereign planet.

This collection of Michelle Fielding disclosures portrays messages from a series of question and answer devolution video sessions published on YouTube, [Bitchute](#) and [Rumble](#) assembled in a single document for research convenience. Such sessions are never flawless, they are in the moment. Timelines are not cast in stone, some decisions are tentative, other still under discussion. This is an unconventional war where life is a moving target adaptable at a moment's notice.

In the final Midterm segment an amazing coalition message portends an unforeseen magical shift.

Devolution of Governance for the USA Sep. 13, 2021

<https://www.youtube.com/watch?v=8wcKqlmzkxo> 32 Min.

On the ground, the government structures, the financial institutions, political parties, education and technology will all start to change.

Good morning, everyone. So I wanted to give a little update of everything that I've been writing down over the summer as I've been having a little break from interviews and recording. I've actually been really busy with clients and really busy with keeping an eye on the progress of what's happening all around and trying to make sense of where we are in terms of the awakening and what's ahead of us. So in my last interview before I went away for the summer, I talked about how they'd [my spirit teachers] given me information about this secret army that was being put together or had already been put together for some time. And how they were comprised of about 120,000 personnel, and these military personnel had had their identities changed so that they could remain anonymous and that this secret army was made up of agents and soldiers, doctors, scientists and advisors. And then recently, I had this vision come in about two weeks ago where I saw this military moving into position in what seems like the southern parts of America. And I wanted to make a few more inquiries into what that might be about. So I've got some notes here that I would like to read out to you. So that you can hear what they said to me when I was asking about, "Is there a secret army? Is there a strategic plan the currently now being put into operation and what is that all going to entail and look like?" So what they said to me was that "the vision of the military was assigned to show that military maneuvers are already taking place on the ground in the USA."

And I said, "Why are there military maneuvers at this time?" And they said that "the military are currently preparing a new army, a new military for 2022". I think this is in addition to the 120,000 personnel that I saw before. So I think this is in addition to that secret army. They said that "going forwards, this new military, which will be set up in 2022, they will recognize a new constitutional set up which serves we the people. And it will be a military to serve solely the people's interests beyond any political influence. And it will take its direction from General Flynn and the now reintroduced and revised version of the Declaration of Independence from 1776, but it will have updates to encompass the pressing and more modern day agendas and politics which have been harmful to the founding principles and precepts of the original Declaration of Independence document and legislation."

So I asked again, "Are the White Hats in control" And again, they've said to me "Absolutely all operational control is being managed by the White Hats now." So I've been told this for some time that even though there's a huge amount of disinformation out there and things that look very fearful, this is all just part of the awakening process.

The White Hats have operational control. So they've been explaining to me that there's going to be a newly devolved government in the future and that the powers will be devolved down to the people. And so we're moving away from a two party system to just a one party system if it's even going to be called a party. So I wanted to ask "what stage of devolved government are we currently at in the USA?" And they said that "we are at the beginning of a process to devolve government to the people, including all assets." So, for example, gold and property and naturally occurring resources like oil and diamonds. And I said, "So how will this devolution look going forward?" And they said that "there's going to be a dismantling of all old structures and paradigms which currently create divides either through their politics or religion or gender or disability or ethnicity. All that is going to be dismantled. And all the old structures and paradigms were now start moving towards something called oneness or unity consciousness." So I said, "Will there be a new constitution or a reform of the Constitution or the legal frameworks? So, for example, will there be a change to the Declaration of Independence from 1776?" And they said that "a new framework is being drawn up around the world. The alliance is headed up by Trump, and they're working 24/7 to get this working template into action to incorporate the new Quantum System of information exchange, which will be Starlink and a gold-backed digital currency."

They told me that all frameworks are designed to give the power and decision making back to the people. They said that "all the audits. And all the things that are going on currently with class actions. Afghanistan, the FDA, all these different things that are going on, which we still are waiting on answers for... They're saying that these are all distractions to allow time for them to engage the world in adopting the new frameworks, to help people awaken and to steady their light for what is now ahead," and I said "steady the light?" And they said "yes to ground and stabilize all the good work already in action around the globe. A step-by-step process. Not too fast. Not too slow, a delicate balance of keeping the consciousness high and steady."

So then I wanted to know "how close are we to this devolution plan being made public?" And they said that "this is ongoing and we will not be finalized in its entirety for many years." So then I said, "Does this mean that people will be in lockdowns and have misinformation for all that time?" And they said "no, that the public and the masses will be involved

soon in getting this vast project grounded”. And I said, “How is this going to look?” And they said that “on the ground, the government structures, the financial institutions, political parties, education and technology will all start to change.”

And I said, but “when will the people be hands on involved in this new devolved system?” And they said “by 2032, the system will be fully operational.” So then I said, “What will be the first sign to the people *en masse* that worldwide devolution of power to the people is actually occurring?” And they said that “the exact process is not public yet, but it will be announced once Trump's election results are confirmed publicly.” So then I asked them, “So how and when will these results be announced? Will the media capitulate and announce the true information?” And they said “not yet. There are other parts of the strategy to implement before the official election results will be made public.” So if you want to see the details of that more fully, then please visit the video that I made earlier today with **Amy Satori**, where we talk all about when is Trump going to return? And it covers what I'm talking about now and a bit more detail. I then asked, “What are the next steps of the strategy as an overview?” And they said “one aspect will involve Biden officially stepping down, the Democratic [Party] being officially dissolved, the Republican Party being dissolved, Military law, a new system like NESARA or GESARA, the Quantum Financial System going live.” And then they said “there would be much rejoicing worldwide and world peace.”

So then I just wanted to know how the Galactics and Gaia may be helping us at this time with expansions in consciousness because this opening up and this movement towards devolution is mostly about the awakening of the collective consciousness. They have told me this a number of times. So I said, “How would the Galactics and Gaia helping with the expansion of consciousness right now?” And they said that “as the energies from the Galactics reach people, then these energies are absorbed into their spiritual hearts and upon receiving a certain quota of this light and this love, then they start to awaken.” They said “sometimes this is happening consciously through a determined effort and spiritual practice. But mostly it is happening through a subconscious awareness that the general population is unable to articulate or understand at this time.” They're saying that some people are obviously actively in spiritual practice and are receiving love and light that way, but the people that aren't necessarily consciously practicing a spiritual routine are also receiving this love and light, even though at this time there might not be a to consciously articulate that that's happening for them. So then I asked, “is this awakening process an organic expansion of love and light from the entire universe, then entering into an individual soul?” And they said “yes and no.” They said “the love and light, the sonics and harmonics are received from the universe to aid an expansion in consciousness, but also the soul contract has to be ready at an agreed moment to acknowledge this upgrade of spiritual information and only the soul can decide when the time is right.”

So I asked them, “Does this mean that anything and everything an awakened soul does or says is pointless? So if we take time to speak information to people if their social contract is not ready, are we helping at all?” And they said “No. The words and vibrations plant in and around the universe when we speak, like seeds, and at the correct moment, these seeds will germinate and grow into an awakening. But the seeds in many,” they are saying, “can remain dormant until their individual soul decides to awaken. And this is a predetermined point in time.” They're saying that “sometimes groups of souls have decided to wake up as at exactly the same time in order to fulfill their divine purpose.” They said that “our divine purpose is always to serve, and when groups of souls awaken *en masse*, they serve humanity through their expanded consciousness, and light. And light is wisdom. And this wisdom will then again be planted like seeds as the awakened souls then go about their lives with an open heart. And then at a predetermined point in time, more souls will awaken. And then these seeds also begin to flourish and grow. And so the process continues.”

So it's not pointless for us to spread words of encouragement and truth as long as we're not trying to force anyone to accept those truths in our time frame. So it's okay to speak your truth and to try and points out things that maybe you can see at the moment, but you don't need to be worrying about when that may be received from the other person or people because you are just planting the seed and that's all you need to do. You just plant the seed and then you just allow their social contract to germinate that seed at the appropriate time, which will be decided by their soul.

I then wanted to ask, “in order to reach the Golden Age, do we need consciousness and the technology of say, Starlink or Tesla to be combined with our consciousness?” And they said “yes and no.” They said “initially that technology used by the White Hats could help to harness consciousness in line with the Golden Age. But they said “as humanity awakens, then the need for any additional assistance will dissolve as human consciousness will reach levels of self-sufficiency whereby the people would be able to sustain a fine and pure vibration without the need for technology to assist them in that way.” I asked, “What is the level of light or consciousness that is being held collectively at this current time?” They said “at this current time, we have 65% light, but it is fluctuating dependent on many factors, including the weather, politics, culture and programs or stories that are running on TV.

So we do have a 65% collective light, but they're saying that it does fluctuate up and down. Then I said, “Does the consciousness affect how vaccines might be responding in people's bodies?” And they said “yes and no.” They said that “consciousness affects the unraveling of latent skills within our DNA, but is not necessarily activated. But this DNA is not necessarily activated until the soul decides.” Then I said, “How does a soul decide?” And they said “before incarnation, a soul will decide if or what level of consciousness or light is required before it awakens. An awakened soul would not accept an untested vaccine. It's soul vibration would know instinctively to refuse it.” I then asked them “what we can do at this time to help ourselves to absorb this light, this light that's coming in, these high density levels of light, which are helping us to ascend, which are transforming our molecular structure. And how can that help us at this time, because a lot of us are getting symptoms from this ascension process, the ones of us that are on the ascension pathway, particularly are finding this process quite hard work? So they just wanted to remind us to drink more pure water, herbal tea, to eat organic food, to surround ourselves with plenty of crystals and plants and animals, to rest and meditate in nature. They also said that “potassium and magnesium or tissue salts as a supplement would help.” They said “rest as and when necessary and do not strive, just be. Just try to be. Don't force it.

I then asked them, “What is going on in Afghanistan at the moment? Why the Afghanistan move at this time?” And they told me that “in order for the NESARA GESARA to be implemented, that there must be a worldwide peace with no war, conflict or instability.” They said that “the process is now allowing for the final tipping point in Afghanistan, so that it can rebalance and it will be returned to its original culture and religion.” They said “without the USA or outside interference, the alliance can rebuild and restructure from the inside, making the country autonomous in its own right, giving it the freedoms to naturally progress at its own pace into a region of peace.” They said that “the alliance is encouraging people to return to their home countries and cultures so that age-old traditions can be maintained without outside interference.”

I then asked, “what about the supposed human rights violations that we're hearing about within Afghanistan?” And they said to me that “as the lands returned to peace, the collective consciousness will continue to rise and old paradigms will disappear. As hearts open, the programming of gender, age, disability, religion will gradually disappear. And at the fifth dimension consciousness, which is the age of love, these old paradigms, which are based on false programming, will disappear.

But each sovereign being needs to play their part in being a thread in the tapestry. Each nation, each country and each being, all has its part to play. Sometimes change looks chaotic, as all the now fresh pieces and ideas are moved into

place. So I said, “but won’t lives be lost during this restructuring?” And they said that “any souls lost will have agreed at a soul level to help align each nation with the vibration of love by showing people what they don’t want so they can move more quickly into re-establishing solid ground for the future based on solid values and a desire to be in peace without outside interference from other nations or armies.”

I asked, “is this process delaying the official return of the Trump team or the new administration in the USA?” And they said “yes and no.” So I asked them to explain and they said that “the USA is strategically moving through its plan at a pace that is safe for humanity. The speed of execution of this plan is not as important,” they said, “as the need to get things accurate and completed safely.” They said that “the new administration, the new set up, will be announced and known to the masses once the remaining points on the strategic list are completed.” And I asked them, “What are the strategic points, could they tell me?” They said “there are a number of major moves still to be implemented to secure each country and nation into their zone before the new administration can be announced to the masses in the USA.”

I then asked “How will the world look for the kids as we go forward?” They said that “the world going forward is going to be a playground of love, peace and joy and new technologies yet unknown to the masses will make all aspects of being a child more happy from the birthing experience to education, and that pets will be allowed into education centers and that there will be more clean and open play areas with more clean nature and toys with nano interfaces.” And I asked them “What is a nano interface?” I’m learning all the time as well. They said “a nano interface is where a child’s needs and emotions allow the technology to create unique learner stroke, child based learning with opportunities that are unique to each child’s abilities and natural traits or interests, for example, if a child excels at language, the program will further enhance the skills in a creative way and that the focus will be on what is a child instinctively good at rather than following a prescribed curriculum that later on, this will then guide them towards how their natural aptitude can be used in service to humanity.” Then I said, “can you explain? About nanotechnology and how a lot of fear around it is not necessary. What are its benefits, for example”, because what I keep being told and understand is that technology is not good or bad. Technology is only as good or bad as the people that are in control of it. So one example they gave me of a good nanotechnology would be something like a cochlear implant. They said that “nanotechnology is the study of matter at the atomic and molecular scale, so this can create electronic devices, catalysts and sensors”.

And I said to them “Is this what the Age of Aquarius is? Is it the technological age?” And they said “yes”. And I said, “in what ways will we see technology changing going forwards in the next 10 years?” And they said “over the next 10 years and with the implementation of nanotechnology,” they said that “many areas of our daily lives are going to change. So, for example,” they said “the energy in our homes will change from electric lighting to say solar.” Well, they’re saying that the nanotechnology will affect that the electric, the lighting and maybe the solar. They’re saying that teaching will change as we start to use these nano interfaces, which will include implants or virtual reality. The implants, I think that referring there to maybe things like the cochlear implants, I don’t think they’re referring to us having technology necessarily implanted into us so that we can be programmed.

The transport system, they said there will be faster trains and flying cars as we implement nanotechnology. And there would be new computing and financial interfaces, particularly with the quantum banking. They said there will be changes in medicine. They said that the military, the future military strategy, will be less focused on ammunition and weapons arsenal, but more concerned with strategy to allow nations to remain peaceful and symbiotic in their relationship to each other. They said politically, leaders will start to work together without suspicion in the new age of love as the technology will take away the need to protect borders and resources.

And I said, “resources, what resources might that be?” And they said “petrol or oil, for example.” They said “these won’t be necessary in the future.”

So finally, for today, I wanted to ask, “is this storyline that’s going on all around us? Is it for the awakened people or for the sleepers?” And they said “it’s actually for both.” They’re saying that “the awakened need to learn patience and perseverance and compassion, and that the sleepers need to learn to trust that there is always more than meets the eye.”

So I hope you’ve enjoyed that quick update today. As I said, I’ve done a video with [Amy Satori](#) and you can have a look at that later on today.

And as always, I look forward to seeing you next time.

Bye for now.

Extra from Amy Satori video

So what they said to me about the “**timeline**” they said “at this time there is no official president for the whole world. Sorry there is no official president because the whole world is under military control of the alliance”

And I said so “what does this mean going forward?”

And they said that “the elections around the world have been manipulated for many years and a worldwide operation by the White Hats the alliance has led to many leaders now joining forces to rid the world of the cancer known as the deep state.”

They said “the USA is going into a new era, a new way of managing its affairs so there’s going to be a new legal constitutional and monetary framework and all of these are being brought into play.”

They said “this being done subtly to allow for a secure system to be put into place fairly for the people without the interference from the dark forces.” They said that “president Trump is not officially needing to lead in the future which is what you said as the new systems and mandates will allow the now awakened and awakening populace to manage their world in a new harmonious setup.” They said “the two-party system will go with power being devolved to local communities and official titles and bureaucratic measures will be minimal and will diminish as new forms of devolved governance will now cascade down to each individual and to each sovereign being.” They said “the results of the audits and elections will fade into insignificance actually once the new frameworks become fully activated.” They said that Donald J Trump was chosen to lead the charge so that the intensity could stir within the planet a tidal wave of change. His work is not completed

but his role will be different going forward for the USA.”

“People will begin to demand that new systems practices and structures be put into place as they realize that there is no place for what we currently hold dear or sacred as we now move into the new vibration and the world of love. These meaningless tasks and the restrictions have given people the harsh realities so that they have to reassess the meaning of their lives. They've had to go within and reach a point of despair or solitude to reach a point of knowing their mindset in each moment regarding important points of life. So, for example, freedom for health sovereignty and governance and a movement has now begun and it is rippling out in all directions and corners of the globe. We have started a wave which will help humanity to reach critical mass and this will be what saves and transforms the whole of humanity.”

The question was “are we going to metaphorically have a near-death experience?”

But they said “only in the sense that the ego driven pursuits and desires will die and we will walk on earth with our heads in heaven and our feet on the ground and we will know that we're in the world but not of it and that our perspectives will now change to how may I serve rather than being all about ‘what can I get from something?’ It'll be more about how can I serve so that's the awareness enlightenment process.” And they said “at this moment in the history of earth it is possible for many souls to experience the rapture simultaneously. As truths become known *en masse* many souls will simultaneously awaken creating a rapture amongst the collective consciousness

The question was “what has to happen before the quantum financial system can go fully live worldwide for us, for everybody?”

And what they said to me was that “each country has to be known to be in a state of peace and not war and the documents for the NESARA GESARA or whatever name they give it at the time because it won't necessarily be called that although the template will mean the same and the documents for NESARA GESARA and the license controls for Starlink have to have been ratified agreed and signed by the alliance and the appropriate representatives in a significant country or location.” So I asked them “How will these appropriate representatives be ascertained or decided?”

And they said that “at the moment the alliance working within military law within each significant region many countries,” they said “do not currently hold a legitimate leadership and therefore they are already under military law.”

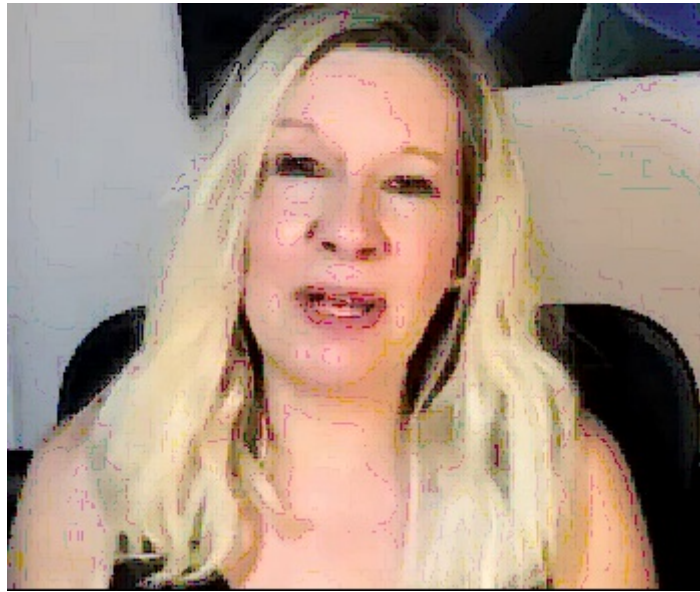

So I said, “Is this why the timing is unknown for the events in the USA” because as we've been saying all the way through this session they have to do certain things before they can finish what they need to do and then the new thing can step forward and this might be what it is this might be what the hold up is that this paperwork has to be implemented.

So they said, “Yes the implementation of the paperwork, the agreements and the new financial protocols have to be ready in each geographical location before the USA can announce its new NESARA GESARA framework, and then all the countries will follow suit.”

So then I said, “With things as they are currently how long might this process take to implement worldwide in line with these NESARA GESARA protocols?”

They said **“two to five years”**

“and also the Starlink licenses because each country will have a part of the pie of Starlink.” so it's a whole system not one geographical area can have the whole pie to itself it can only have a section of it and they're going to be obviously I would imagine protocols and guidelines for how you operate your part.

<https://rumble.com/v1h8v3z-mar-a-lago-fbi-with-michelle-fielding-spiritual-coach.html> 30 min.

The victory move or moment will be when their input is no longer necessary because the people have taken control of managing their personal affairs without the need for government interference.

Hello, everyone. I hope you're all having an enjoyable summer. It's been scorching in the UK, very, very hot indeed as you can actually see by my shiny face today as well.

In the last couple of days I've been looking at everything around the situation in the U.S. regarding Mr. T and Mar-a-Lago, and I've been asking questions all around that and a few questions around what might be happening at the midterms and who might be sort of taking everybody forward in the future in the U.S. So as usual, I will read out the questions that I presented and what information has come back and I hope you enjoy it.

And I also would like to thank everybody for your ongoing support. As you know, it's very difficult at the moment for creators to get work out. And so any support that you can offer in donations and by subscribing to different platforms is always very helpful to help us keep creating work for you all.

So my first question was "Why did Trump buy Mar-a-Lago?" And they said to me that "Trump was gifted Mar-a-Lago by the White Hats and Alliance back in 2006 to help him to get ready for his current role." And when I looked at the history of Mar-a-Lago, I saw that Mr. T's father, I think it was Fred Trump had owned Mar-a-Lago previously, and his father died in 1999. His father had purchased Mar-a-Lago in 1985 and died in 1999.

And they were saying to me that the property, though, wasn't gifted to Mr. T until 2006. Now I did try to find that information and I couldn't find that anywhere written exactly like that. But I did see that there had been some legal toing and froing over the will of Fred Trump. So I don't know if that's the handing over of Mar-a-Lago to Mr. T was delayed because of negotiations around the will and that's why he didn't get it till 2006. Whether there's some other reason for that, they said to me that Mar-a-Lago was gifted to Mr. T in 2006, and it was gifted by the White Hats and Alliance to help him with his current role.

And I said, "What is Trump's current role?" And they said "His current role is to stir up the dogma and corruption and resistance and to make things more fair for humanity on a worldwide scale or basis."

And I said, "In what way have things been unfair to date?" See, we know what they are, but I just wanted to ask and they said that "People have been living unconsciously in an enslaved system where their true passions and purpose for being alive have been thwarted. The work structures, political structures, education, financial and religious institutions have all been designed to dumb down the people and their free will and their appetite for living to the fullest extent."

And I said, "What would that look like?" And they said "It would look like heaven on earth with happy family and community units, with everyone pursuing their hearts desires whilst being in service to humanity, and by being open hearted, rested, peaceful and abundant. The world could then shift into the golden age or the age of love."

Then I asked them, "Did Donald Trump know his mission before he was gifted Mar-a-Lago?" They said "Yes and no, he always had a passion for America being great on the world stage. But that he became more aware that this greatness needs to be worldwide in more recent years."

And I said, "How does Donald J. Trump envision the world being in its greatness?" And they said "A change of financial setup worldwide, devolving power to the people and allowing people their personal sovereignty moving towards a oneness of nations."

And then I said, "A oneness of nations, like a new world order. And they said, "No." They said, "A oneness where people join together in peace and love through choice, where people from the grassroots up have a choice of policy, not necessarily choosing people, but choosing policy." And they said that, "The New World Order in comparison is where a hierarchy meshes the world together through financial, societal control with top down politics." So they're saying that the oneness of nations that Donald Trump envisages is where people from the grassroots up take control of policy and this is different to the New World Order system because the power there would be coming from above onto the people and they wouldn't have a say.

Then I've been hearing that Mar-a-Lago has tunnels or shelters underneath. So I asked "Does it have underground tunnels or bomb shelters?" And they said "Yes, it has many and one of them goes across the sea to Africa, apparently."

And I said, "What transport system is used in that tunnel?" And they said, "A magnetic technology using propulsion, which is very fast, goes from a tunnel at Mar-a-Lago to Africa."

So then I want you to know about the raid on Mar-a-Lago. And was it a White Hat or a Black Hat operation. And they told me it was both. They said the Black Hats think that they are setting up Trump for his final downfall. But the White Hats have also infiltrated this investigation to help get the truth out in the end. They said that "Things may seem desperate just

for a little while in the future as it will seem like the White Hat plan is drastically falling apart.” But they said that “This does need to happen. Trump has agreed to this role at this time in order to help the world to awaken to the levels of corruption within the worldwide political systems.”

You note that they said here that “Trump has allowed himself to carry out this role, to awaken the people to the level levels of corruption worldwide within the political systems.”

And I said, “How would this show corruption in the worldwide political systems?” And they said that “The seized documents need to be seen by the world as they implicate many leaders around the world being involved in corruption, trafficking and treason.”

And I said, “Did Trump declassify these documents so that he could legally remove them from the White House in D.C.?” And they said “No, but he didn’t need to legally, as the White House is the administrative hub and Mar-a-Lago is the military hub. Military law will take precedence over administrative procedures of the White House in the future. This is the move that is necessary to introduce the concept of military law.”

And I said, “How is this going to look? What is involved in this process and will Trump be arrested?” They said “It is likely that in order to set the stage for what is ahead for everyone worldwide, it will need to be seen that Donald Trump has been at least questioned.”

And I said, “What is the purpose of this move for the Black Hats?” They said “The Black Hats are trying to derail Trump and his party from getting into power.”

And I said, “What is the purpose of this move for the White Hats? And they said, the White Hats are needing to expose the contents of the papers and materials seized so that the truth can be seen and heard worldwide.”

I said, “What will the outcome of the FBI raid be as it currently stands?” And they said “As it currently stands, the world will see that papers have been discovered at Mar-a-Lago, and this will prompt them to question the content of the evidence that has been seized. A fuller investigation will help to turn the ship around.”

And I said to them, “So Donald J. Trump will be the fall guy?” And they said, “Yes.”

And I said, “This really hurts my heart.” And they said “It will hurt many hearts. But the overall purpose of this current situation is to create a wave of awakening and positive action towards devolving and dismantling the government and institutions of the U.S.A. as they are currently known”. They said “the dark forces have been operating indiscriminately within the FBI, CIA, policing and public health departments, amongst many others. To turn this ship around. It all has to be exposed by making Trump the fall guy. The information can then be publicly examined.”

And then I said that “I’m almost afraid to ask, but will Donald Trump go to prison?” And they said “No, because there will be no grounds, ultimately.” They said that “The papers and materials at Mar-a-Lago fall within the jurisdiction of the military, and these will be protected by military law. Trump is the **commander in chief** and oversees the military. This offers him a layer of protection because he’s outside the jurisdiction of Washington, D.C..”

I said, “Did Trump know in advance that the FBI raid was coming?” They said, “Yes, he did because it’s a White Hat operation, but the Black Hat factions have been led to believe it was their initiative.”

So I said, “Was the FBI or the authorities, were they recorded by military level surveillance when they removed the papers and materials?” And they said “No because it was a White Hat team.”

So I said “So on the whole, on the worldwide stage, is it going to be seen that Trump has taken documents that he was not authorized to have in his possession?” And they said “Initially, yes, this is how it will play out initially. This will mean that the documents are called into examination. This was the only viable route to get the documents examined in a public arena. If Trump had tried to expose their content through the normal routes, it would have been buried or destroyed.”

I said, “Did the FBI install bogus documents during the raid?” And they said “No, because the raid was a White Hat operation and if anything is installed or inserted, it will be after leaving Mar-a-Lago and will be a Black Hat initiative.”

I said, “How will America react to this news and this investigation going forward?” They said “initially the whole world will think that Trump has done something untoward or illegal. For a while. It will look tumultuous until the evidence starts to reveal truths about what has been hidden from the world.” They said “this could take up to 12 to 18 months to turn it around to its full conclusion”.

So I said, “Will the midterm elections in the U.S.A. go ahead in November 2022?” They said “It is currently on track for the midterm elections to go ahead in November ‘22, with many Republicans winning seats.” They said “by November 2023, it is more than likely that the system will be starting to collapse and the recent FBI raids should be the impetus for that.”

I then just wanted to clarify about President Trump’s father, Fred Trump, and I wanted to know had he been a Mason or part of the Klu Klux Klan or any other organization which had bad intention. They said he hadn’t been.

And then I asked, “Was Fred Trump, the father of Donald J. Trump, a White Hat or part of the alliance.” They said “Fred Trump was not officially a White Hat or part of the alliance, but was surrounded by people who were and they had a great influence on his business ethics and the way he thought about the world in broader terms”. They said that “Fred Trump was not aware of Donald’s mission on the world stage, but he would have supported it.”

I then asked again, “Will the Democrats try to shut down the midterms?” They said, “At this point, too many people are now watching the voting procedures, so it will be very difficult for the Democrats to shut down the midterms or to disrupt them in the way they have tried to in the past.” They said “The Mar-a-Lago story will provide a distraction through till the New Year, and more Republicans and White Hats will secure seats in the voting procedures.” They said “A gentle wave of change is occurring below the surface as people come back to the center.” They said “The extreme politics to the left or the right is starting to be noticed by the voting populace. They want a happy medium. Voters are starting to make choices based on policy and not people, and they are beginning to question the two party system. Many are abstaining from placing a vote altogether.” But they said that “Local action groups are forming to correct local issues like poverty, poor education, transport links, supply and demand of foods, goods and services and people are being forced to work more locally on their policy decisions. For example, they’re looking locally at things like debt, fuel poverty and food poverty. And they are helping people to come up with innovative ideas of how to support and grow their local communities and connections.” And they said that “These market towns will set an example to the wider population, and gradually this idea will spread initially to the poorest areas of the cities.”

They said “People will start to grow their own vegetables and fruit and bake their own bread. They said the old traditions are being restored and people are starting to work together more and more to find local solutions.”

Then I said, “How are the politics of the world and America, how are they maybe hindering or aiding in the golden age?” They said that “The problems and difficulties being faced by the people around the world is creating smaller communities or enclaves where people are starting to take action about their community needs. This is helping them to open their hearts, which is creating a change in vibration. The change in vibration will then affect their energetic field, their aura. And as people’s auras start to emit a loving, calm, peaceful energy, and as people start to vibrate with joy and peace from their auric fields, then this transmutes lower energies and frequencies of fear and hate and everyone begins to transform literally one by one, until eventually everyone has been touched by higher frequencies.” They said “We then move into the golden age and people’s love from their hearts will beam out like a golden ray of light and gold being the color of the angels and the golden auras around each loving person will combine to create the loving energy of the golden age.”

So I said, "How can each person start to contribute to the golden age as of today?" And they said to me, "Ask people to start to simplify their lives and look at what really serves them in each and every moment. Look at what really serves you in your life and those things that no longer bring you joy or peace. Just release them. And begin projects that make your heart soft, peaceful and joyful. And mix with like minded people to form communities of light and remember to laugh and to play and nurture the innocence in your children and to protect and love all animals and to take time to relax in nature."

I then asked, "Where are the White Hats? What are they up to in terms of a timeline?" They said "The White Hat Alliance are working through a strategy which is not dictated by time, but more by how the collective is responding. The collective is being monitored before each action is implemented. The overall goal, however, remains the same."

And I said, "What is the overall goal?" They said "The overall goal is to help the people make new decisions for themselves from a position of free will and sovereignty. Any external pressures are designed to allow the people to respond, react and adjust. Ultimately, the people will respond by emphasizing their needs. And showing what is good for the whole of humanity. We are moving into a world of oneness. The White Hat plan is to guide people towards rejecting the layers and layers of government, the government programs, and rewrite their lives from the grassroots up."

I said, "What will be the White Hat or the Alliance victory move?" They said that "The victory move ultimately is when the direction of change comes from the people internationally." They said that "In the meantime, the White Hats will continue to signpost and create events to create movement within the collective consciousness. **The victory move or moment will be when their input is no longer necessary because the people have taken control of managing their personal affairs without the need for government interference.** It will be a truly devolved system."

I asked them "When is it expected that the truly devolved system will be operational worldwide?" They said "It has already started in earnest with many White Hats helping to guide and support the people as they change direction."

I said, "In what ways are the people being supported by the White Hats?" They said "The White Hats are risking everything for the people by standing up to the old paradigms and structures and creating events and strategies to dismantle them."

I then wanted to move slightly further into the future, so I asked, "Is Ivanka Trump going to be the face of America for the new devolved politics in the future?" They said that "All the Trumps will be the faces of America going forward into devolution."

They said that Lara Trump will also hold a significant role flanked by Ivanka.

And I said, "Is this why I saw all the Trumps walking into the light?" They said "All the Trumps work for the light and collectively they hold a key role for the future of devolved America."

So I just asked again, "Is Ivanka the woman to lead America in the future?" They said "The set up in America is going to change exponentially going forward. More women will now be elected into key roles, but not necessarily the roles that we are used to seeing. They're saying that governments, organizations, politics, both local, national and world wide are all about to go through a dramatic overhaul worldwide."

And I said, "So who will lead America?" And they said that "No one person will lead America. It will be devolved to the people."

I said, "How is this going to look in the future?" They said "The main party infrastructures of law, politics and in some cases defense were all be overhauled and in some cases closed."

I then asked, "Is Joe Biden the one currently seen on the world stage? Is he working for the White Hats?" And they said, "No, he's not working for the White Hats, but the White Hats do have control of him."

I asked them to explain. They said that "The real Biden is in custody and the person playing Biden on the world stage is being instructed by the White Hats."

And I said, "So all the White Hats are creating inflation and the problems in America through Biden?" They said "No, the White Hats and the alliance are allowing Biden to follow through on Democratic policies, but Biden is not really in power. The Biden people see is a place holder, whilst Democratic policy is implemented."

I then asked about [Duchess] Meghan Markle and [Prince] Harry and I wanted to know if they are White Hats. They told me "They are both working for the White Hats and they are both trying to wake people up to the antiquated role and pomp and ceremony of the Royal family in the UK. They said that wealth in and of itself is okay, but lording it over others and influencing national policy because of it is to be dissolved and halted in the future." They said, "again, we are in a time of devolution of power to the people worldwide. Harry and Meghan are both speakers for this movement."

I said, "Will Meghan run for a political position going forward?" They said that Meghan will act as an ambassador for the White Hat movement going forward." And I said, "What will this ambassadorial role entail?" And they said "They will, both Meghan and Harry, work with people to bring power down to the masses and away from centralized control."

So I hope you've really enjoyed this information today. Please share it far and wide and I'll see you next time.

Monarchy & Quantum & 2024 9.16.2022

<https://rumble.com/v1ka8d3-monarchy-and-quantum-and-2024.html> 17 Min.

The world is currently under military law until the quantum systems and regulations are fully established and the infrastructure is put into place. Then the whole system's currently parading to the masses can be collapsed. The political structures, banking structures, education structures, medical structures, energy structures and travel structures will all be collapsed and transformed.

Good morning, everyone. Just thought I would do a little update around the recent event regarding the Queen and where we're headed from here on after.

So first of all, I asked, "Will Charles lead as king or will he abdicate to William?" They told me that "Charles is unlikely to hold the throne for many years. He is a placeholder being used to distract the public whilst the monarchy is being dismantled from the inside out. Harry and Meghan are prominent White Hats, helping to bring about the abolition of future monarchy reign King or Queen, Prince or Princess. In the future, these titles will be removed and the palaces and the royal residences will be repurposed and reallocated."

I then wanted to know if the Queen's death was one of the events spoken about after the green light, which Boris Johnson triggered through his resignation and then subsequent announcement through Liz Truss becoming Prime Minister. They said to me that, "The resignation was the start of events on the military timeline. The financial system cannot go live to the public until certain pieces of the strategy, the military strategy, have been implemented. The financial system cannot go live until Biden and the Democrats are seen to be no longer in power publicly. The midterm elections will go ahead to keep things steady on the surface for the masses. It is likely that at this time many positions will then go back to the Republicans to help create a shift of power. President Trump is likely to run for office in 2024. In the interim, much dismantling of corrupt organizations needs to continue. So a good clean sweep or clearing up can occur once we arrive at the 2024 elections. New quantum systems are being put into place so that devolution of power to the people will allow for fairer election procedures. People will vote for policy, not people. Ron DeSantis and Trump will walk side by side in 2024. The Space Force is about the setting up of satellite and space technology to secure safer networks and communications for humanity to secure safer connectivity devolved to the people through encrypted devices. This is the role of Starlink. Starlink connectivity, which will run quantum banking with no need for banks, just direct transactions between the Starlink and the end user. This concept will also be used in education, voting, energy, medicine. The Starlink will be overseen and managed by the military White Hat team. The world will be divided into regions similar to north, east, south, west. Commanders in chief will head up each region, geographical regions and how they are currently divided will change under the new regional mapping for the military. For example, Putin could head up a whole geographical region called the North, for example, which in effect could include the UK, Germany and Europe as a whole. The boundaries are currently being decided by the top people, the White Hats, the creme de la creme, for example, Jinping, the Saudi prince, Kim Jong-un Putin. It appears that there will be six commanders in chief at this time of discussions. The other two regions of South Africa and South America are yet to be decided."

I then asked about Prince William. Will he become king? "It is the plan that all UK monarchy will be dismantled before Charles steps down or dies. The Constitution of London was made null and void when President Trump visited the Queen in 2016. So constitutionally, the monarchy do not have a legal framework to be in any positions of power, royalty or otherwise. They are placeholders at this time in the same way that politicians are placeholders in and around the world. *The world is currently under military law until the quantum systems and regulations are fully established and the infrastructure is put into place. Then the whole system's currently parading to the masses can be collapsed. The political structures, banking structures, education structures, medical structures, energy structures and travel structures will all be collapsed and transformed.*

I then asked about Meghan and Harry and asked if their role is to continue to collapse the monarchy. "Meghan and Harry are working for the White Hats to bring about change in the royal setup. They are continuing the work of Princess Diana, who was silenced."

I asked, "Is the QFS the Quantum Financial System related to the Queen's death?" They said that, "The QFS the Quantum Financial System is not directly related to the Queen's death. The Queen's death is a military marker, an event in the military plan which triggers other moves. The QFS will go live to the masses once all internal infrastructure is up and running and all financial regulations are set up worldwide, for example, the financial protocols around managing a centralized banking system of digital currency, also known as CBDC. Rishi Sunak and Boris Johnson of the UK are working on these protocols behind the scenes in the UK. Tech giants like Apple are working with Elon Musk and Starlink to create the quantum technology phones, laptops and infrastructure of connectivity to run the [banking component] new Quantum Financial System in a devolved way for the masses."

I asked if XRP is going to be part of the new centralized banking digital currencies. "At this point in time, no one thing is decided with regard to what crypto currency frameworks will or won't be allowed."

I asked, "Are there two financial systems?" "There is only one Quantum Financial System and the military oversee it via Starlink connectivity. It's this Starlink connectivity that is running this centralized banking system for the digital currencies, the CBDC."

I asked, "When traditional banking switches to the CBDC, how will this look and affect the public?" "On the whole, this system is already operational and it is likely that a smooth transition will entail."

I asked, "What stage are we at with the Tesla Quantum Tech[Qphone?], which will run these QFS accounts for the masses?" "Many tech companies are working quickly behind the scenes to create technology, which is up to military standards so that the masses can easily access the Starlink centralized banking system going forward."

I asked, "Will we move to a cashless society going forward?" "On the whole, we already have a cashless society as people use Internet banking and cards to make purchases. The difference in future is that all cashless transactions will

need to be encrypted and/or backed by gold. If they are not government digital currency, it is unlikely that they will be licensed unless they are backed by assets like gold, silver, platinum, diamonds or other precious metals. The legislative and operational frameworks for future QFS systems and the centralized banking of digital currencies. The CBDC is currently being put together behind the scenes. The Saudi Prince, Salman, Jinping, and Kim Jong-un are big players in helping the establishment of the legitimate frameworks for the CBDC operations going forward. Africa and Russia, i.e. Putin, are also advising strongly on how countries currently will be backed by assets. The new systems will not allow black money trafficking, drugs, inappropriate use of power due to excessive financial reserves or income.”

I asked, “Can we receive the new Centralized Banking Digital Currencies on our current equipment or phones?” “At this moment in time, it is not possible. The delay of moving fully onto the QFS for the masses is twofold. One is the legislation and procedural set up in each location. For example, north, south, east, west, under each commander-in-chief. The second delay of moving fully onto the QFS is due to the technology, the quantum technology, and it's to do with the quantum transactions being encrypted. For example, we need laptops and phones like Qphones or Tesla phones.”

I asked, “What will the role of large organizations like the Media, CNN, Amazon, Facebook, for example, what will their role be going forward?” “All the large organizations are now under White Hat control and have been for quite some time.”

So I asked, “Do the oligarchs like Schwab, Rockefellers, Gates, etc. still have significant power?” And they said, “No. All their power, financial and networking were dismantled before Trump by the military. They are now playing a role for the White Hats to wake people up to the dark plans that were held for humanity, should the military and Alliance not have intervened? This intervention began over sixteen years ago, gaining more momentum and credence, albeit under the radar after the Twin Towers event in the year 2001.

I then asked, “What further optics are we likely to see going forward around the world with our current level of consciousness?” “The plan will move backwards and forwards with each reaction or consciousness upgrade by the masses. Timelines cannot be predicted as such, only outcomes. The outcome to all this upheaval now will be worldwide peace and abundance for all, sovereignty of nations and people.”

I hope you've enjoyed this small update today around the monarchy and the QFS. I'd like to thank those of you who are supporting me through donations, as I have to now moved my political work to Rumble and Bitchute. Youtube will terminate my platform if I put too many political items on my YouTube channel. Thank you for listening today. Please remember to like subscribe and comment and share far and wide. You can subscribe to my website at GoldenHeavenOnEarth.net.

We live in a dual universe of light and dark so that our souls can learn and expand.

Souls cannot learn if they only ever experience unconditional love.

To experience more of who we can be, we encounter challenges to help us grow.

Hello, everyone. Thank you for joining me today. I, first of all, like to thank everybody for supporting me on other platforms after it's become quite difficult to put political things onto YouTube. So if you can't remember which platforms I'm on, I'm mainly over at Rumble or Bitchute. And if you look under this video, you'll be able to see all the links to all the platforms where you can currently find me, including buy me a copy to social LinkedIn and Twitter.

So there's been quite a lot of things to look at recently. It's been getting very fast again with lots of activity. So I thought I would put together some channeling fuel and I hope you really find it interesting today.

So the first thing I wanted to look at was why are people suggesting that there was something big about to happen on or around the 24th September 2022? Because I personally and even feeling a sense of calm and like a softly, softly approach.

When I kind of tune in to the military plan and I just wanted to find out from my guides what the situation was. What they said to me was that the White Hat military plan is running smoothly on all levels and has been planned to run in the background under the radar whilst societal change and psychological change is implemented. And I said, "What sort of things do they want to change in psychological terms within the mass consciousness and how is it going?" They said that "the military plan is to move people away from reliance on government, which has been heavily corrupted and infiltrated in the past." He said "the plan is moving forward steadily and slowly and each step is being thoroughly monitored for changes in the mass psyche and consciousness."

I asked them, "What else can you tell me about this time about the White Hat military plan? Is there still a lot of outside resistance or interference, for example, from the Black Hat?" They said, "To all intents and purposes, the Black Hat factions have been removed at the upper levels. And their power base has been decimated. Their funding sources have dried up and public opinion continues to turn against them and scrutinize their every proposed move. This situation, i.e. this war, albeit under the radar and seemingly silent will be won by the people's changing attitudes *en masse*."

I ask them, "Do we have Black Hats in sleeper cells embedded deep within society and organizations? They said there are some Black Hats operating within organizations and society, but to the greater extent they are already on the White Hat radar, the quantum system, which knows the movements of these people in every moment, they know their digital code and their communications which are being monitored." They said "Their power base at this time is incredibly weak."

And I said, "So if the Black Hat power base is so weak, then why does the White Hat military psychological plan need to go so slowly?" And they said to me that "in the mass population, any sudden changes politically could destabilize society, causing unprecedented uprisings, looting and civil unrest, which could lead to citizens becoming hurt or placed in danger. The plan is to move people through these transitions as smoothly as possible without loss of life where possible". And I ask them, "what are the transitions?" They said to me that "the transitions are multilayered. A strategic template has been laid out and each move or transition links into the next with as much operational precision as is possible, albeit with the changeable nature of the mass collective consciousness at this time." They said "the Earth is experiencing historical rises in energy, changes both within her and above her and all these energetic changes affect the people on many levels. And to a certain extent, some of these reactions to upgrades on the energetic levels of the human collective are unknown day to day and hour by hour." They said that "the military knows its intended outcome, but moving everything into position requires much diligence and logistical prowess, and no one move can be a knee jerk reaction. No one move can be hurried. It's supposed to be a gentle wave of change on the whole. This is not to say that certain subsets may experience things more or less intensely. The human entity is very complex and group and cultural behavior adds another layer to the complexity to the military operations. So it adds another layer of complexity to the military operations. To the greater extent, the plan is going accordingly, sometimes more slowly than some people would like. But a military strategic plan must, to the greater extent, follow a logical course in order to be successful. Too much emotional input or analysis can weaken a military plan."

I said, "Can you tell me what the role of Mohammed bin Salman plays in this military operation?" They told me that "Mohammed bin Salman has been a key player in this worldwide war. His wealth and culture has created a staunch backdrop of support for Mr. T and the military plan worldwide."

I said, "Is Mohammed bin Salman a White Hat?" They said Mohammed bin Salman, even though providing staunch support for the military worldwide operation, prefers to remain neutral and in some respects, outside of the regulations and procedures of the military plan. He is taking a more autocratic approach to managing the changes within his area of operations."

And I said, "What are his areas of operation?" They said that "Mohammed bin Salman prefers to run his own military operation within his geographical area of supervision, the overseas more than the Saudi Arabian strategy and prefers to work alongside the military plan while still having his own level of authority and leadership within his regional areas of operation, which extend further than Saudi Arabia. Unlike some other regions like the UK, for example, Mohammed bin Salman is not a political placeholder. He is an integral part of the military plan while still maintaining his own level of diplomatic integrity and autonomy. He is being extremely cooperative with the White Hat plan, as he sees it, as a plan that will serve humanity, ultimately, and wants to contribute when and where it is possible to do so whilst keeping his own country's geographical areas sovereign. There is a high level of trust between Salman and Mr. T and this is ongoing."

I then asked, "Is the White Hat military strategy being coordinated and expedited from Cheyenne Mountain, Colorado, in the US, which I understand to be Space Force?" And they said "no".

I said, "Where is it being managed from? And where is the central location, location for these operations?" They said "the majority of operations are planned and expedited from the Arctic Circle."

And I said, "Are these bases underground?" They said "these bases are extremely well hidden and protected from all outside interference or communications." They said "it is a classified area."

I said to them, "Based on what I've heard you say today, it suggests that at least on a territorial and geographical level, that the White Hats have complete operational control."

And they said, "Exactly."

I said, "Do the White Hats and military have assistance from a galactic force, a Space Force?" They said "the Space Force is an arm of the military which oversees advanced technologies in space". And I said "advanced technologies like Starlink satellites and their Starlink connectivity". And they said "yes". They said, "this is partly the role of the Space Force. They oversee all technological changes that affect the planet from space." I said, "What are the other technologies besides Starlink that they oversee?" They said "military air travel, flights, air to land communications, tracking systems of military arsenal."

I asked them, "What will be the queen move at the end of the military plan." Some time ago, I was on an interview with Charlie Ward while we talked about the green light, and we wondered if that would be the start of military operations and if the Queen was an important marker and in that sense, she was an important marker, as we all now know, which was what was said at the time. But in terms of the queen move, the queen move will be the final move, as far as I'm aware. So I will repeat the question. "So who will be the queen move at the end of the military plan." They said that "The geographical regions of Saudi Arabia, UAE, United Arab Emirates will be referred to as the king move and the USA the Queen move."

And then they said in Capitals, "*GAME OVER*".

I said, "Meghan and Harry, are they working on behalf of the White Hats?" And they said, "Yes, they are continuing where Diana left off." They said that, "Harry didn't want to do it, but agreed for the good of humanity. Once the military plan goes live." I said, "Goes live?" They said, "yes, he agreed on the basis that the overall plan is being expedited for the good of humanity overall in the long run. He knows his mother would have been on board with that."

So I'm assuming from that, that they're saying that the military plan has gone live. So, I'm not sure exactly what they mean by that. So we'll have to read between the lines as to what they mean by military plan has "*gone live*". I've got some information further on which might help us with that.

So I asked, "The babies of Meghan and Harry, did they use a surrogate?" And they said, "Yes." And they said, "with a White Hat plan to work around the royals, these two babies and possibly a third have to be in line for the throne." And I said to them, "I thought Meghan and Harry had relinquished all ties to the monarchy and therefore their babies are not in line for the throne."

And they said that "They will be in line genetically through lineage rather than through some pretentious imposed title or superficial title. A title like *King*, etc., will not be assigned going forward, they said that, "All monarchies around the world will eventually be dismantled, not necessarily through any outside force, but more through cultural and societal changes in the future."

They said, "Royal families will not have the same significance or status."

I said, "Will Harry and Meghan continue to work for the White Hats?" They said, "For the foreseeable future they will. They both would prefer to live simple lives, though, away from this pressure, but have agreed to help with the overall plan to dismantle the royal family in the UK."

Then I went on to ask about has there been a digital invasion, which I've been hearing a lot about from other commentators, and has this warranted some kind of military occupancy or military law?" I've been getting sent a lot of videos of what looks like military activity in and around London, St Albans, near London, in North London. And I think I was sent something else where it seems to look like the military are being prepped for some sort of event. They said to me, "there has been an invasion on freedom on many levels worldwide, and the tech companies and shadow governments have had a major hand in implementing this invasion of freedoms."

They said to me, "It's intellectual property abuses of freedom to the greater extent which silences people's ability to speak their truth."

And I said, "But truth is subjective." And they said, "Yes, truth can be subjective, unless it is based on fact." They said, "Facts are being skewed in favor of subjective propaganda." And I said, "Who is asserting this subjective propaganda?" They said "Propaganda is a misrepresentation of an actual event or scientific evidence." And they said, "Both sides of the equation are using propaganda to a certain extent. However, the Black Hats are using propaganda to enslave humanity in a top down structure of control and the White Hats are trying to give people their freedoms through decentralized policies and procedures."

And I said, "What stage are we at with moving away from the propaganda machine?" They said, "We are in the midst of an information war, hence a digital war on freedom." I said, "How will this be resolved and when?" They said, "The executive orders put into place to stop enemies, foreign and domestic will be the underpinning structure and law that will ultimately clear up this area of criminal activity—terrorism."

And I said, "How will this criminal activity through digital terrorism be halted?" And they said that "The quantum computing system will be able to shut down these factions who are creating a false dialogue in the future."

And I said, "So is this not a further system for control similar to the censorship which is currently in play?" And they said, "No, that the current censorship is not attached to the new secure quantum system or networks." They said "the quantum networks must allow citizens freedoms of speech, freedom of movement and privacy. The system is programmed with backstops and balances and we will shut down if citizens freedoms are being encroached upon."

And I said, "Could this technology be used by a controlling force to enslave humanity?" They said, "Even though it is a centralized Starlink connectivity, the end users input is decentralized and encrypted. So the system is unable to control individual users. If it tries to censor individuals for speaking their truth, for example, then the whole quantum system over all the nations will be alerted to create an override function. The blockchain has been programmed to alert the entire worldwide system immediately if there is any violation to human rights, freedoms of expression or movement."

I said, "Is there a difference between being under military occupancy or military law?" They said, "There is no distinction. Both concepts indicate controlled military presence in any given geographical location." And I said, "Do we have military occupancy worldwide? They said there is a covert military operation worldwide and certain factions of that operation are using military occupancy or military law to secure the borders from the enemy."

And I said, "Who is the enemy?" They said, "In some cases it's foreign and in some cases it's domestic." I said, what is a domestic enemy? They said a domestic enemy is someone who portrays themselves as a patriot or a citizen of that nation whilst maintaining an alternative or antagonistic political strategic viewpoint to the country or region they are occupying.

So I said, "So are they a spy?" They said, "In some cases they are a spy. But mostly it is a group of people being coordinated from outside of the country or geographical region of residence. I then went on to ask, "Are the White Hat

military and space Force the people who oversee the functionality of the Starlink connectivity?" And they said, "Yes."

Then I asked, "The global shadow government, the Cabal, what is their powerhouse at this time?" They said "Their power base has been decimated at this time and that the minions have scattered. And I said, "Is this causing a delay to carrying out the military plan in real terms?" And they said "In some cases, there are sleeper cells in the system geographically that the White Hats have their eyes on. And when big dates are publicly announced, it is to see what or if the sleeper cells are activated." And I said, "Can you explain to everybody what a sleeper cell is?" They said, "Sleeper cell is military or technological planning or surveillance that is not yet activated. It is literally dormant until it gets its unique callsign or activation codes." And I said, "So are these sleeper cells in the Black Hats and the White Hats?" And they said, "Yes".

So my understanding from what they're saying here is that when we are given big dates, it's almost like a sting operation, because then the Black Hats go into action and they are already being observed or surveilled by the White Hats. So as soon as a date goes forward where they think something's going to happen, the Black Hats engage in, I assume, digital hacking or communications, which are then seen by the White Hats, and they can then locate where the remaining people are hidden or hiding out.

I said, "What will a go sign look like in the UK or the USA?" So if these military are now getting into position through occupancy and military law, I wanted to know what the go sign would look like. They said, "A go sign will see the movement of troops actively on the ground securing borders and technological resources." And I said, "Has the UK had its go command or its go sign?" They said, "It has had its go sign, which means *prepare*. It has not yet had its go command."

And I said, "What about the USA?" They said, "It's the same as the U.K." And I said, "What about the rest of the world?" He said, "Again, it's the same as the UK." They've just had their go sign, which means to *prepare*, but they haven't had their go command. And they said that, "The rest of the world is the same as the UK, except the United Arab Emirates." They said, "They are not currently signed into this part of the military plan. It is still being negotiated with Mohammed bin Salman."

I said, "Will a *go, go, go* command affect civilians?" "It is hoped to the greater extent that civilians will not be affected by military operations." I said, "So what is the purpose of these intended military operations at the point of a *go, go, go* command?" They said, "It's to secure the borders, the infrastructure and natural resources like air, water and food." And I said, "Why would these things need security?" They said, "To a greater extent they won't, but it's a precaution, mainly because it is unknown how the masses may respond to future announcements or truths." And I said, "What sort of truths are we referring to?" And they said, "The truths about the nature of their government, their constitution, and their sovereign status mainly." I said, "Is the UK going to lead with the *go, go, go* command?" They said, "It is undecided at this time."

And I wanted to go back a few steps and ask them about Donald J. Trump, because I said to them that when you say Donald J. Trump won't be president in the future because there will be a different setup, what do you mean by this?" They said that, "The new setup will be devolved under the quantum system and backed by the people at the grassroots level." And I said, "Will it be devolved under a military set up rather than a constitutional set up?" And they said, "Exactly." And I said, "Is this why Ron DeSantis will stand with Trump in the new setup?" And they said, "Yes. Ron DeSantis will run the new military setup of devolved government going forward." I said, "Is this new devolved government overseen by the military, is it going to be active in 2024?" And they said that, "It is hoped it will go live before 2024, but many moving parts and factors have to be managed before we get to that point, namely public volatility to any changes on such a large scale which will highlight changes of perception on an enormous level collectively." I said, "What role may Mohammed bin Salman hold in this new setup?" And they said, "It's still being decided." And I said, "What about China? Russia? Are they on board?" And they said, "Yes". I said, "Are all the other nations on board with the new devolved military setup?" And they said, "Mostly."

I said, "Is the QFS related to the military plan of devolving government to the people?" They said, "The Quantum Financial System is only relevant in so much that's on an operational level on the ground, resources need to continue to flow as things switch over to the quantum system of devolved governance for the people."

I then asked, "If Biden is a puppet, a placeholder, then how could this fake inauguration have activated the Law of War manual, which is to eliminate all enemies, foreign and domestic?" And they said that, "Biden as a placeholder is not the activation point." They said, "The activation point was in November of 2020 when the votes were tampered with. This was the start of the activation under the Law of War manual to pursue all enemies, foreign and domestic and this has been ongoing under the radar for many months with perpetrators being held for questioning, being arrested or executed."

And I said, "Does Trump use secret hand signals in his speeches to give military code?" And they said, "Yes, he does". And I said, "What are his current hand signals at Ohio currently saying?" And they said that his hand signals are currently saying *hold steady and prepare*." And I wanted to ask about the flag at the Ohio rally where the stars were blacked out. I wanted to know why. They said, "The flag is being used in different situations to give military code."

"The stars blacked out," I said, "What was that code for?" And they said again, "It stands for *hold steady and prepare*." And I said, "Well, preparing for what?" They said, "Prepare to activate the next step of the military plan, *take your positions*." And I said, "The next stage?" And they said, "The next stage is to secure borders, resources, land, air and water."

And I wanted to know, "Has the whole White Hat and Black Hat storyline been manufactured?" And they said, "No. There have been two factions to date who have been working on opposite sides. And I said, "Opposite sides." They said, "The White Hats work within the parameters of God and for the good of humanity, their freedom of choice and free will, and that the Black Hats in most instances do not recognize a God and want to control people for their own gain."

And I said, "But not recognizing a God, could that mean they recognize a universal energy, for example, rather than, say, a man with a white beard?" And they said, "The Black Hats do not recognize heart centered love or the love vibration. Their creative center, their heart, their spiritual heart is closed and they are not awake to the goodness and freedom of the oneness, the center of unconditional love."

So I asked them, "So are all people who are not awake, are they Black Hats?" And they said, "No". They said, "Being awake means to soul search and people who are not awake are able to soul search at any given time, whereas a Black Hat does not have the capacity to soul search. Their vibration is below the level where soul searching begins. Light can only be absorbed through a connection to God or Source, the Prime Creator."*

So then I asked, "So are the people like Soros, Gates, Fauci and there are many more, are they Black Hats?" They said, "No. These people are outside of the Black Hat organization." And I said, "The Black Hat organization?" And they said, "Yes, these players are in positions over and above the Black Hats. They are the opposite to the Alliance." And I said, "Who are the Alliance?" They said, "The alliance are a small group of pure hearted men and women who are working on behalf of the good of humanity to help humanity stay free and sovereign." And I said, "So does this organization, who's in opposition to the Alliance, have a name?" And they said, "It is collectively known as the Masons at the Highest Order. But it does have other names like Order of the Black Sun or the Black Knights Templar."

I said, "Is this organization of the Black Hats more powerful than the White Hats or the Alliance?" And they said, "No, because the light of God and unconditional love renders the evil doers powerless." And I said, "Yes, but they do cause destruction and delays."

And they said, "Yes, they do. But ultimately, this darkness serves the light as people see how this causes destruction and chaos. The harder the Black Hats try to destroy goodness, the faster it grows. Well, anything exists. The opposite must also be true. We live in a dual universe of light and dark so that our souls can learn and expand. Souls cannot learn if they only ever experience unconditional love. To experience more of who we can be, we encounter challenges to help us grow."

I said, "So what is the role of Hollywood actors, singers and musicians in this storyline or situation on Earth at this time? People like Tom Hanks, Ellen DeGeneres, Oprah Winfrey, and there are many more." They said, "These people have all witnessed the actions of the Knights of Darkness. They did not willingly participate, but were coerced in a corrupt or perverse industry to turn a blind eye. However, in recent years their more bizarre behavior, for example, Celine Dion, Gaga, The Weekend and Bieber was to out the perversion within the entertainment industry. In some cases over and above entertainment value. Some actions were shown deliberately to try to get the message out and to create awareness to stop the perversion within the upper echelons of the entertainment industry."

And I said, "So are these people working for the White Hats?" they said, "Mostly the Hollywood stars, which are showing outlandish, perverse images, are working on behalf of the White Hats to help get all the perversion stopped. Some have taken significant roles in trying to expose a deep, dark underworld, which is mostly hidden from view, where acts have been blatantly exposing the dark occult like behaviors. They are mostly exposing the Black Hats and the perversion corruption of Hollywood."

And I said, "Political leaders, are they doing the same as the Hollywood actors and musicians?" And they said, "In some cases, yes."

And I said, "In some cases?"

"Some politicians are tied to the corruption and dark perverse cults through family lineage."

I said, "Have they chosen to move away and support the White Hats and Alliance?" And they said, "Not in all cases, no."

So I asked, "How will this play out going forward? Will these corrupt perverse leaders of governments be allowed to continue?" They said that, "In time society will move away from the need to elect politicians and governments, so this structure will automatically fall and their power base will be diminished."

And I said, "Who is behind this devolution of power in government?" They said, "Ultimately it will be the people moving away from the centralized government control through devolution of systems, policies, finances and decision making."

And I said, "How long might this take?" They said, "It is currently estimated that such a huge shift may take 10 to 15 years, but plans are in place to stop this process as we speak. The process of changing public perception and opinion has been ongoing for many years, especially the past few years."

Then I wanted to check in about NESARA GESARA, so I asked them, "Is this NESARA GESARA real?" They said, "Yes."

I said, "Is it part of the QFS?" And they said, "Yes and No." They said, "NESARA GESARA is more about changing and restructuring the balance between the government and its people. A fair fiscal system is important to underpin the essential day to day transactions of goods and services. But ultimately NESARA GESARA is a program of psychological change towards devolution and the removal of all corrupt organizations, hierarchies and doctrines that no longer serve our new evolving world. The Golden Age begins in 2032. So many harsh and critical changes now need to be made to move the social program towards devolution, freedom and sovereignty."

And I said, "Social program?" And they said, "Yes, a program of enforced changes to make the transition easier for those who to date have not been aware of the level of control within the matrix that they have resided in. This program of events which are mental, physical and spiritual, are creating monumental social and political change nationwide and worldwide. Changes will only come faster and harder until the people push back and create their own new structures and setups."

And I said, "What control do the oligarchs and elites still hold?" They said, "The millionaires and billionaires with good intention will lead the world forward through these times of tumultuous change."

They said, "Those millionaires and billionaires with ill intentions are systematically being thwarted by the White Hats and the Alliance. But ultimately, the people have to remove their power by disengaging from their narratives. At first it will seem like only tiny steps of progress are occurring and it may look like one step forward, two steps back. But once social change begins, it will be like a snowball coming down a mountain and as it does so, it will gather momentum, weight and speed. We are seeing in action sociological change and revolution on a worldwide scale, which is no easy task."

I said, "Is Schwab a part of the storyline to create a baddies versus goodies kind of setup?" And they said, "No, Schwab is all for the New World Order, but the White Hats cannot just intervene as people must have their free will to be able to choose."

And then I ask them, "With current reactions by the masses, are we on track to reach the Golden age by 2032? And they said, for some people, yes."

And I said, "For some people?" They said, "Those that choose to work on their spiritual vessel will reach the vibration of the Golden Age before or by 2032." So I asked them, "What will happen to those that don't do the spiritual work. They said, "They will continue in duality and not experience the oneness."

And I said, "How is this going to look practically on the ground?" They said, "Different communities will evolve where people of different vibrations will gather based on their spiritual resonance and perspectives. Many spiritual people will choose to live alone in small communities."

I said, "So in reality, we can't have a system of non-control from government because people are not able to self-regulate yet.? They said, "Exactly, which is why we have the Starlink connectivity. It will replace the cumbersome government organization and layers of bureaucracy so that people have a taste of being in control of policy and not having to rely on a nanny state."

And I said, "So people really need the structure." And they said, "Most people don't have the mental or spiritual resilience to be just plunged into a world with no structure because anarchy would prevail with much vigilante action and mental breakdown. Hence, the Starlink connectivity will provide the safety net as people learn to self-govern in a new safe way."

So I'd like to thank you all for listening today. Please remember to like, share and subscribe. And I'd also like to thank all of you have been kindly supporting me through donations and subscribing to my website, which is at www.GoldenHeavenonEarth.net. And thank you all today for listening.

People must learn to govern themselves eventually through a devolved system of governance.

Good morning, everybody. I just wanted to do an update today about the upcoming elections in the USA on November 8, 2022. I've been looking at this about a week ago, and it looked to me at that point they were showing me a vision of people sitting around a table, still strategizing about how they wanted it to go. And they also showed me a vision of people trying to adjust the votes to balance them on the night. So as one vote comes in on one side, they're trying to balance it on the other. So I had those two visions and then I did some channeling to try and find out what those two visions may or may not mean going forward.

So the first question I asked was, "Will the mid-term elections on the 8th of November in the USA, will they bring clarity?" And the answer I got was, "No". They told me that "This is not the purpose of the exercise at this time. People need to pull back from the left or the right and the whole system needs to collapse."

So then I said, "How is this all going to play out?" They said, "Trump will be brought forward for justice and this will prevent him from openly engaging on an open forum. It will be a kind of house arrest rather than a censorship. In addition to this major move in the military planned operation, Biden will also suffer a major defeat. There will be no true winners. A new structure and process will need to be implemented going forward."

So I asked them, "So in effect, will both leaders, Trump and Biden, be seen to go down?" They said, "No. Both leaders will be seen as being equal in the status with no clear delineation between either faction."

So I said to them, "Will this be a manipulated situation or an organic situation?" They said, "It is a manipulated situation, this is a manipulated story to help awaken humanity, to collapse the old paradigms. Neither side is right or wrong. The only problem is in the division itself. Everything has to be brought together into a position of center, of oneness."

So I said to them, "How will this look in practical terms following the elections of the 8th of November 2022?" They said, "It will seem to be an undecided outcome with no true leader being appointed, a type of dual government will be witnessed. The left will need to work with the right, and the right will need to work with the left. Things have to be brought to the center ground."

I said, "How will the midterms be manipulated? Will it be a bias in public reporting by the media? Would it be the counting of the ballots manually or electronically, or will it be something else? And they said to me. That all the above methods are being used to manipulate the votes to the center ground. It has to be seen by the public, by the collective, that there can no longer be any left or right, that there is no right or wrong.

Then I asked them, "Is Trump going to be incarcerated before the midterms?" And they said, "No, but Trump's outreach will be curtailed, but not through censorship."

And I said, "So is Trump going to be put on a sort of house arrest?" And they said, "No, the mid-term results will create a natural hiatus where no one person has any overall status or impact."

I said to them, "How will this be seen to affect the general voting populace and the USA citizens?" They said, "It will create frustration and shock. It will also create people to become disillusioned with the current system of central government."

I said, "Do the White Hats want the voting to go awry?" And they said, "Yes, both the White Hats and the Black Hats want it all to go awry, but for different reasons. The White Hats want the system restructured, devolved to humanity to have their own individual sovereignty. The Black Hats want the system to be more structured and controlled to prevent freedoms and diplomatic sovereignty.

I said, "Has Trump been subpoenaed?" And they said, "Yes."

And I said, "What will be the outcome of that?" They said "Ultimately, after all the noise and discussion, it will amount to nothing. Everything is set up at this time to get a public reaction. People must learn to view everything from an apolitical center ground, so we can move into a higher vibration as a collective. People must learn to govern themselves eventually through a devolved system of governance.

So I said to them, "In effect, it feels like we are already under the rule of a new world order." And they said, "Exactly, this whole process over the past few years and beyond has been to get the public, the collective, to see that they are already controlled and that it's now time to raise the collective consciousness to a new wave of harmony. The people need to break free from what has already been a new world order system of programming, a matrix."

And I asked, "Is Biden going to be seen to be arrested or have a fall from power in any way?" They said to me that "Both sides will be seen to have equal status after the midterms.

I said, "How does this affect the rolling out of the new financial system, the Q.F.S. They said, "It doesn't, that is already well on its way with the BRICS nations and the setting up of the centralized banking systems using digital currencies. The introduction of these two systems of local currency and digital currency are being integrated for future consumer options to be regulated and backed by gold or precious metals or assets. All nations will become equal in status and stature with

the introduction worldwide of this new financial system, without excessive stature, status or power, no one country will be able to initiate war. All will be equal in diplomatic relations and stature.”

I asked, “So how will the hung government in the USA after the midterms move forward? Will a union be made between the Republicans and the Democrats?” They said, “Not exactly, the hung election will initially leave everything in a political limbo. Biden could be removed from the race completely because of an ill health issue and Trump may be temporarily out of action due to a legal situation. So there will temporarily be a hung government with no leaders.”

So I said, “How will this play out in that situation?” They said, “It will require a military intervention at this point until Trump's legal situation is more clear.”

I said, “Will this continue for many months?” They said that “Trump's inactivity politically could go on into the early part of 2023 when it will then be resolved and he will be able to reconvene his leadership duties. He may form an alliance with Nancy Pelosi initially, as Biden will have been removed, possibly through ill health. Trump will not create an alliance with Kamala Harris in the longer term. She will either step down or be superseded by Nancy Pelosi. It may come to light in the future that Pelosi has been working with the White Hats.

Then I asked them “What role will Tulsi Gabbard hold going forward? Will she partner with Ron DeSantis, for example?” They said that “In the future, Tulsi Gabbard will hold a major political role in America. She is a guardian within the Quantum Financial System and she is high up in the military plan and structure known under the 17th letter of the alphabet. In the future, prominent players will be Donald J. Trump, Ron DeSantis and Tulsi Gabbard.”

I said, “Will Donald J. Trump be the president of the USA for the foreseeable future if there is a hung government?” They said, “Donald J. Trump will hold office in a slightly different role after the midterms and other players will come to the forefront, players like Ron DeSantis, Tulsi Gabbard, Lara Trump, and maybe even Candace Owens. Many things are about to change in how the voting elections and governance takes place in America going forward. These midterms of 2022 are going to be the catalyst to how things are now totally overhauled.”

I said, “How many people know the upcoming plan for America?” They said, “The players within the military alliance know what is intended for longer term restructuring of the voting political setup in the USA. Leaders such as Putin, bin Salman Jinping and Sunak (UK), they are all privy to how the voting stroke political structures need to change, not just in the USA but worldwide. They will follow suit in their political set ups once the USA has set the template going forward.”

I said, “Is Rishi Sunak a White Hat?” They said, “Rishi Sunak is working for the White Hats. His task is to finish setting up the centralized digital currency frameworks whilst the Treasury of the UK reprint the physical gold and silver assets to back it.”

So I said to them, “Do you mean print the physical gold and silver with the head of King Charles?” They said, “Not necessarily, the new physical currencies may not have the head of a monarch on them.”

I asked them, “Will the next prominent woman to stand in the White House, will it be Tulsi Gabbard?” They said “No, the next prominent woman to stand in the White House will be Nancy Pelosi. Nancy Pelosi and Trump are likely to work together initially. By January, there will be more major changes and a new set up will start to be seen, more like a one party system, something completely new never seen before. Tosi Gabbard and Ron DeSantis are big players in the new set up. It is likely that unelected officials will also be involved in the new American set up, people like Candace Owens, Kanye West, people from different backgrounds and disciplines were all pulled together to create a huge movement of change. It will be the Truth Social movement. They will be brought in to pull everyone into the middle ground, no black or white, no straight or gay, no Republican or Democrat, only *We the People*. Massive tech giants like Google, Apple and a new social network by Musk will start to create the momentum of a censorship free media. Old media paradigms will either begin to shift or die.

In the background whilst the USA is making massive social changes, the rest of the worldwide White Hat players will be setting up the financial systems so that the world economies are all on an equal footing. No one country will be higher or stronger in military or financial stature. All will be equal. Without the need to compete for financial or physical resources, there will be world peace. More smart cities will be developed with the freedoms and peace of the citizens being the uppermost incentive.

The New World Order, which has already been in operation for many years, will be *dismantled* as world leaders move towards community cooperation and sovereignty. Many Hollywood players, actors and music giants or influences will step forward to create a peace transition movement in the USA, *One party, one people*. A movement of wanting to move to the center ground politically will now come forward very fast. New systems and structures will be set up quickly to allow local states and communities to implement policy for the greater good. The Quantum Voting Systems would allow people to vote for policy and not people. Large concerts similar to Live Aid, may be put together to bring the people together. It will no longer be fashionable to associate with a political doctrine on the left or the right, people will move to the center, to individual choice. All the political noise will start to quiet down as peace and progress begins to ensue over all nations. Tech giants like Elon Musk will be behind a lot of social change as social networks start to bring dialogues back to the center. People will become tired of extreme dialogue, of views that go to the left or to the right of the political spectrum and will naturally move towards allowing personal sovereignty. For example, *your body, your choice*. No pushes for medical sanctions or chemicals on people unless it is their choice. A lot of previous medical agendas will be dropped and children and adults will choose on an individual basis what, when and if to have medical pharmaceutical intervention. We are moving very fast towards sovereignty of nations and sovereignty of people. The new Quantum Travel System will see borders being opened. The world was not designed with postcodes. Technological advancements will be used to work in harmony with all citizens. Many more freedoms are coming, freedom from the rat race, financial freedom, political freedom. All the seeming noise of the recent years will start to quieten. And people will start to relax in their nervous systems. They will begin to breathe more freely and deeply. They will begin to think more openly. Without divisive politics and media, people will come together through their natural affinity. Communities of like-minded people from all walks of life will begin to grow exponentially. The biggest obstacles to future positive development on this planet will be people learning to walk in their sovereignty, to self-govern and to self-regulate. The culture of people overseeing us from above, the culture of citizens telling on their neighbors, the pettiness of trying to control your fellow citizens, this is all going to change. The emphasis will be on self-governance, on responsibility for your own actions. People with reduced capacity, physical, mental or moral will be cared for by the larger community where feasible and appropriate to each person's needs and sovereign rights.

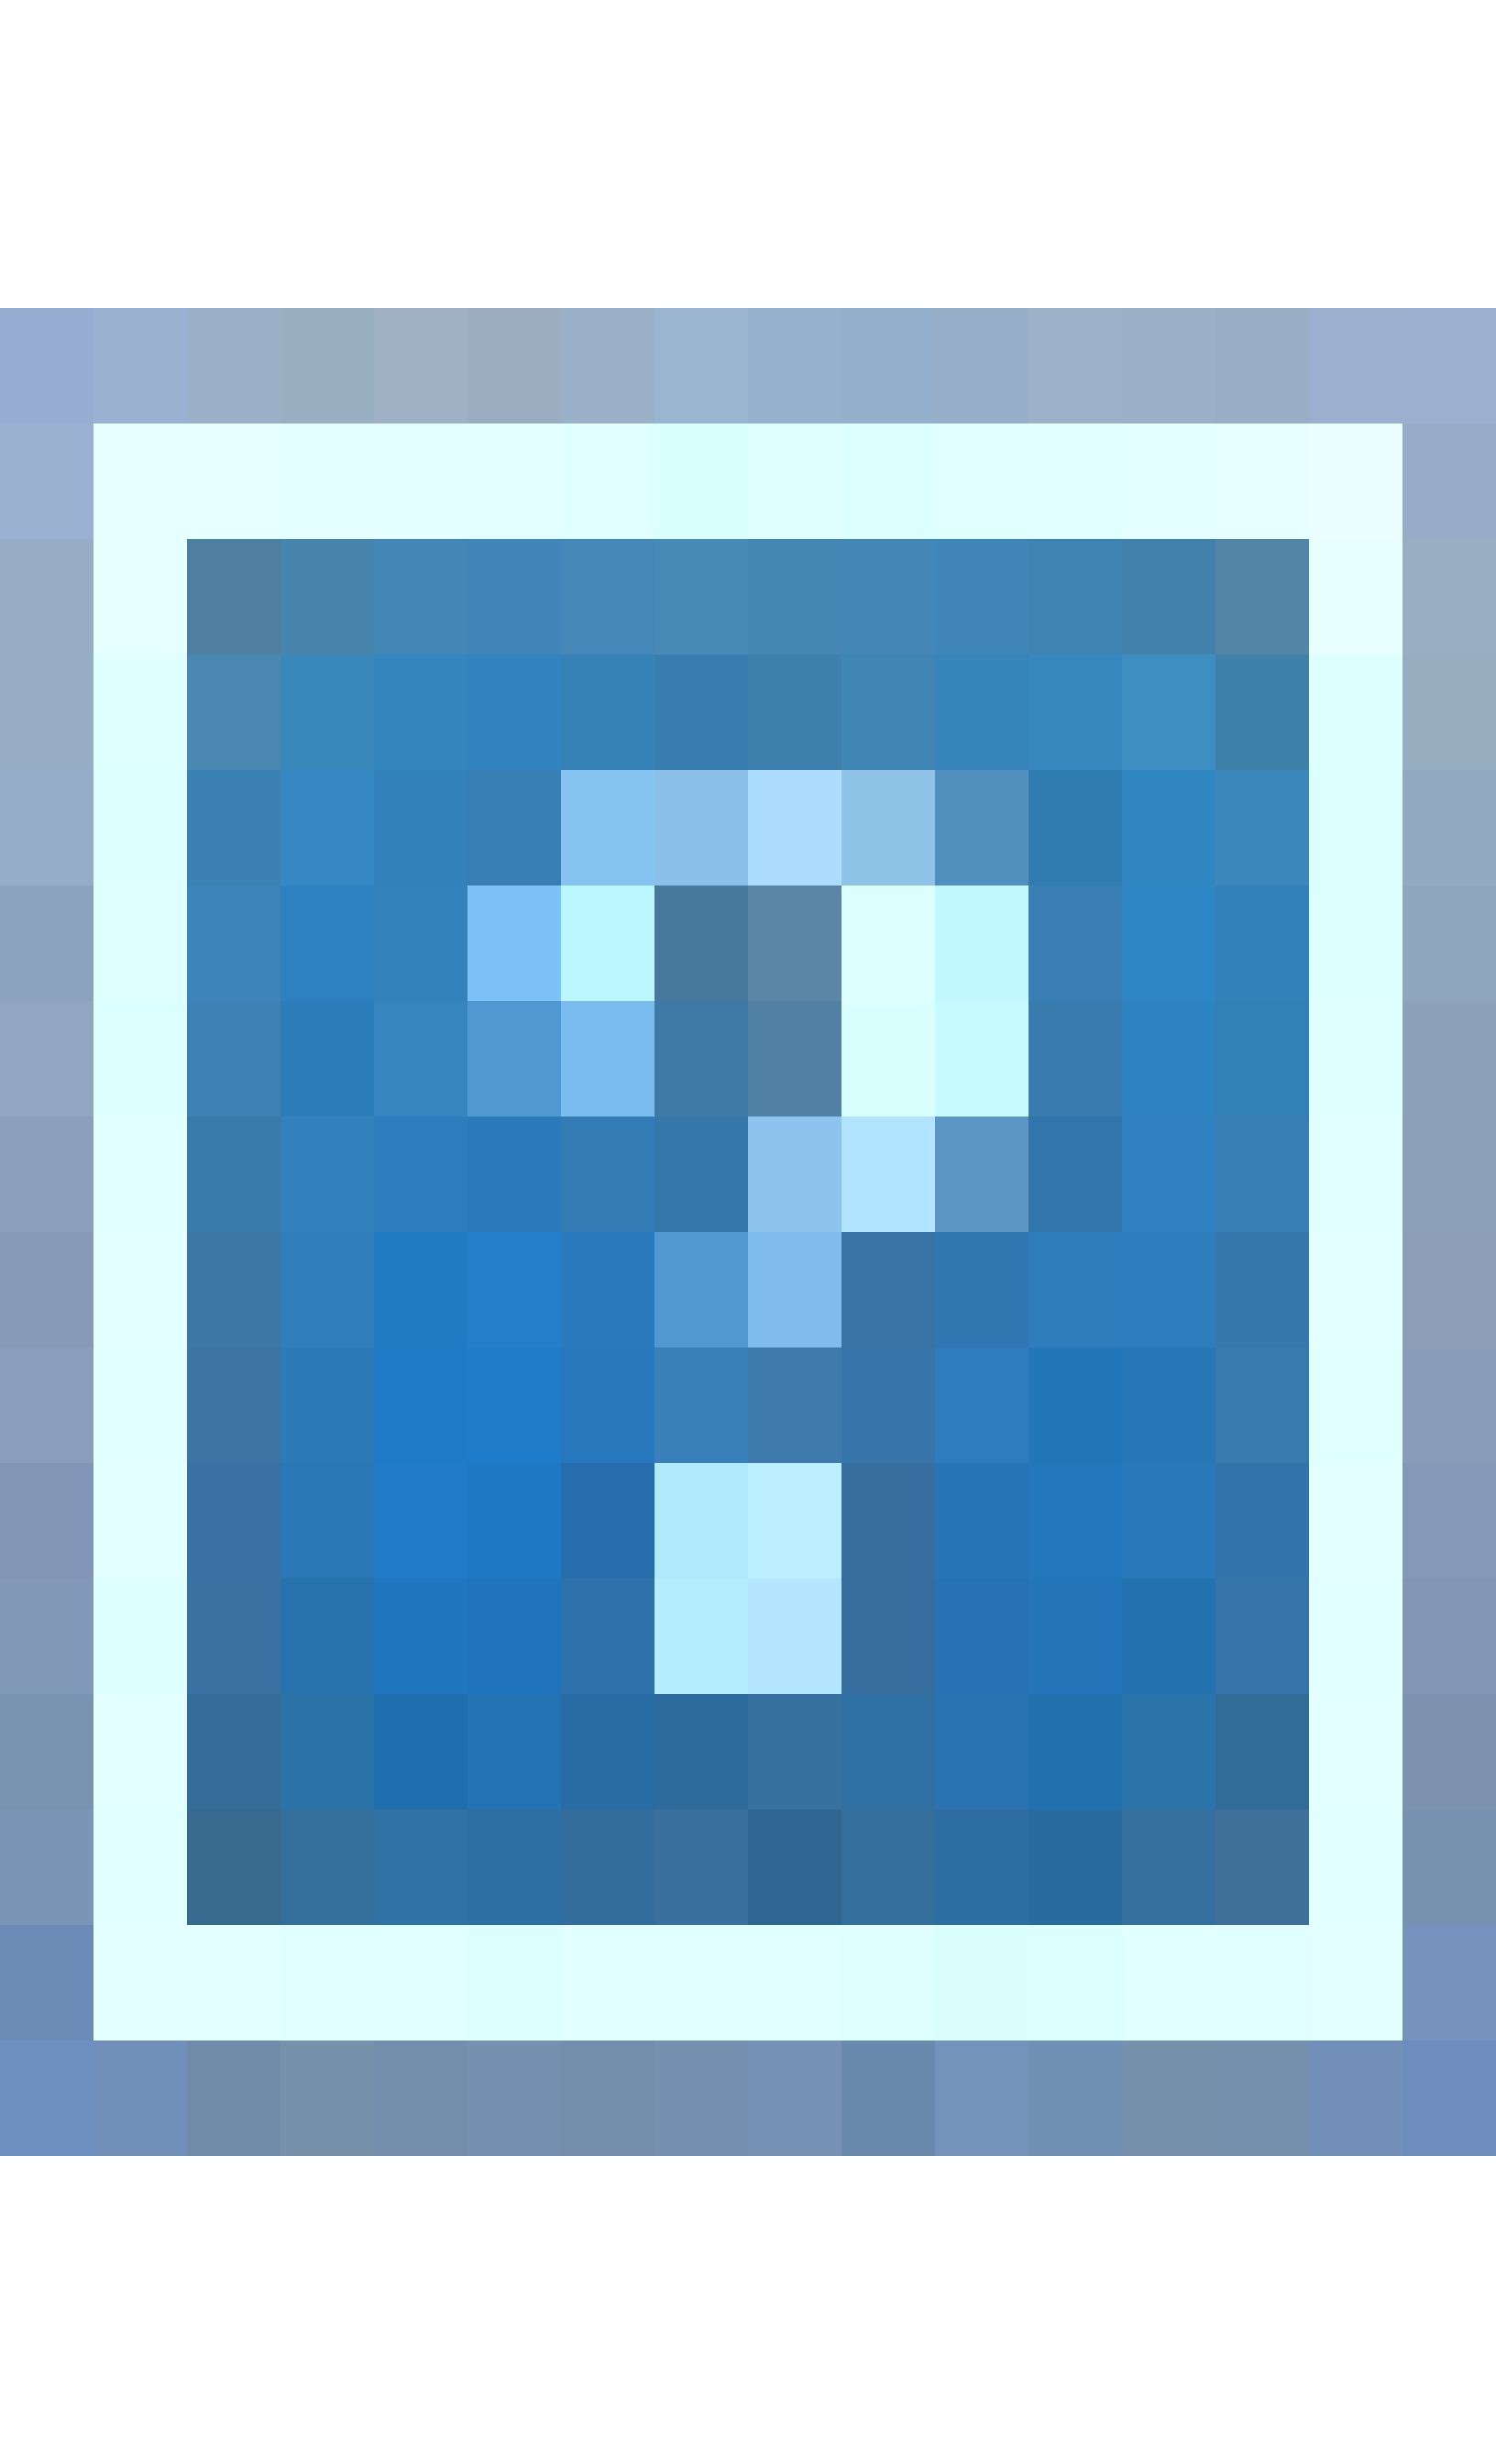

All problems will not just disappear overnight, but cultural change is coming very fast. It will gain momentum and more

peace will eventually be the outcome. Technology will bring a lot of benefits to our lives, freeing up our time, creating healing solutions to people and cities. Financial resources will be distributed fairly among the citizens, and responsibility for law and order will be devolved and rewritten. The New World Order has served the people in that it has clearly shown how people do not benefit from being controlled in a matrix, a matrix of debt and psychological slavery. The bad players will be disabled as resources and power are systematically pulled away from them. The whole concept of military and policing and its culture will change. Technology will, to the greater extent, change military and policing paradigms. Players previously seen as good may now be seen as no longer relevant. Players previously seen as bad may now be shown to be the unique catalysts to societal growth that we will all now witness.”

I then wanted to ask about the smart cities like Neom in Saudi Arabia. “Are these being developed for cultural, military or strategic change?” And they said, “All of the above. They said the underground networks at Neom and from other smart cities will eventually all be aligned to connect continents together for fast transport links. Air travel in its current format will become more and more obsolete as faster methods of moving around via propulsion are developed, for example, vehicles moving along tunnels at high speed via propulsion.

I hope you've really enjoyed this information today and I look forward to seeing you next time.

[Michelle Fielding](#), [Bitchute](#) and [Rumble](#)

INTRODUCTION – 2023-24

The symbolism and wording of the 2016 inauguration speech are unmistakable and any corrupt elements in positions of authority had good reason to think twice about being in office. That moment was decades long in preparation, not just an idle boast.

For too long, a small group in our nation's capital has reaped the rewards of government while the people have born the cost. Washington flourished, but the people did not share in its wealth. Politicians prospered, but the jobs left and the factories closed. The establishment protected itself, but not the citizens of our country. Their victories have not been your victories. Their triumphs have not been your triumphs and, while they celebrated in our nation's capital, there was little to celebrate for struggling families all across our land.

*That all changes starting **right here and right now** because this moment is your moment. It belongs to you. It belongs to everyone gathered here today and everyone watching all across America. This is your day. This is your celebration, and this, the United States of America, is your country*

—[Donald J. Trump](#).

"Sometimes you can't tell the public the truth.

YOU MUST SHOW THEM."

—Q

The last two administrations are a study in *contrasts*. Each had a narrative of claims to offer the public about peace and war, a stable healthy economy, a philosophy about fair elections, a mixed standard of health, morality, truth and a method to present them.

Comparison, Visibility, Reeducation and Change are the watchwords for 2024. Just how many people have been paying close enough attention to the excuses for ineptitude, clarity of personal enrichment, favoritism, censorship, influence, whistleblower testimony, public interest activism, constitutional veracity, sexual misbehavior, infotainment? Are things up to snuff? Is the two-party system workable or an excessively corrupt cesspool of disinformation, unfairness and slavery?

How is it possible to effect sweeping and lasting change for the better in a manageable timeframe? Is there some kind of masterplan at work behind the scenes? Was the promise of 2016 idle political fluff?

Freedom cities are being proposed to harness the good in all things, to support the citizens to their full capacity in their health, their finances, their freedom, their education, their nutrition, their water, and alternative healing, transport which is safe and clean, and obviously devolved decision making, no more election busybodies messing with the counts.

At the core is an aware burgeoning Truth Social Movement that is a group of respected people who are advocates for a new, devolved and decentralized system of voting on issues, not people, finance, and freedom of speech that is cryptographically protected by a Starlink infrastructure overseen by the specially trained military guardians employed by Space Force. This is a continuity of governance, not government, where no one political party has an established authority or mandate over a country.

This social devolution mechanism is also variably referred to as the New Setup or the military peace plan

The year 2024, which is the Year of the Dragon, is the year where magnified disclosure starts to be seen and where the masses begin to unmistakably connect the dots with a frequency that may seem overwhelming at times. This reeducation/awakening will unavoidably foster rapid change and feel threatening to manipulators that are used to going unchallenged.

Worldwide Military Peace Plan Spaceforce part one [New Setup]

Mid-2023

<https://rumble.com/v36tnx9-worldwide-military-peace-plan-spaceforce.html>

The old two-party system of politics which creates division and creates sides and animosity is going to be dissolved. A new framework, technological framework, is being written to oversee fair leadership, supervision and protection worldwide... The Elections are all a facade for a bigger plan going on in the background. A worldwide Military Peace Plan - overseen by SpaceForce

Hello everyone. I have a very big update for everybody today regarding Space Force and what's ahead of us in terms of the elections of 2024 and how that's linked in to what they're telling me about the new military worldwide peace plan. So I'll just start with my questions as usual and I hope that you really enjoy everything that's been channeled for us today.

So the first thing I wanted to know was **“Will President Trump be part of the 2024 election?”**

They said “No, President Trump will be the face of a new military setup which is currently on track for America around 2026 to 2027.”

I said to them **“What is meant by the new military setup?”**

They said to me that “The old two-party system of politics which creates division and creates sides and animosity is going to be dissolved. A new framework, technological framework, is being written to oversee fair leadership, supervision and protection worldwide. It is overseen by the military and it is currently classified.”

Then I asked them **“How is it intended that this new system will operate? At what point will it be available to the masses?”**

They said “It is intended that on a worldwide level all countries will integrate the new system into each geographical region by 2026-27 going forward.”

So then I said **“The worldwide military operations and training that we're currently having reported to us that are on the ground, are these part of the New Setup?”**

They said “Yes and no. The worldwide military operations on a strategic Space Force level are for the New Setup of 26-27 going forward but the military operations and training personnel on the ground are just normal military training operations.

I said to them **“So the New Setup will be run by Space Force and all of its counterparts and subdivisions worldwide?”**

They said “Yes.”

I said **“What level of development and integration are we at currently?”**

They said “It is currently operational albeit in a beta in approximately 80% of the worldwide military strategic teams.

And I said **“Military strategic teams, are these the counterparts to Space Force in the USA?”**

They said “Yes they are.”

I said **“At the military strategic levels of Space Force it would appear that on a worldwide level everyone is working towards a worldwide operating peace plan.”**

They said “Yes this is correct.”

So if you've been following me on my locals.com channel you'll see that I've been putting up lots of news about how different countries are signing into Space Force including Portugal, Japan and the UK are just some of the most recent ones that I've put on my feed at locals.com.

So then I said **“So in real terms is a war on the ground going to be necessary between any countries or continents?”**

They said “It is not anticipated that there is a need for war in any location going forward under the new worldwide military peace plan.”

And I said **“Is this a white hat military plan?”**

They said “Yes and any dark players are being tracked and removed on an ongoing basis and all information about citizens their locations their operations their intentions is now already on the superior military quantum web and infrastructure.”

And I said **“Is this infrastructure what you've been calling web5 web7, well that's the label they've given to me.”**

They said “Yes in some cases web5 7 is multi-layered and it has different versions.” So for example they they're saying “There's also a version 9, 11, 13, 15 and 17 and each layer is designed to tackle different emerging threats with key personnel.”

And I said **“Key personnel?”**

They said “The web5 7 software can detect anomalies within the parameters of how military personnel are operating.”

So I said **“Is it an AI system?”**

And they said “Partly.”

And I said **“When you say that it can detect anomalies within the parameters of military personnel do you mean all military personnel?”**

They said “No, it can detect anomalies in the behavior of the operators and programmers within the currently classified web5 web7 setup.”

And I said **“What would an anomaly look like under the current conditions?”**

They said “It would be where an operator was trying to reprogram outside of current protocols which will ensure the safety to the citizens.”

So I said to them **“So are you saying that the strategic military operations which are currently classified can detect if an operator programmer or a guardian is trying to program the system outside of the peace treaty protocols?”**

They said “Yes that is correct.”

Then I said **“What is the role of the military guardians in this currently classified area of military strategic planning and operations?”**

They said to me that “The military guardians are a step below this classified strategic military plan and operation at the moment.”

Then I said **“So who has access to the strategic military plan worldwide?”** They said to me that “There are six commander-in-chiefs worldwide who currently know about these operations but none of them know the classified content of the others outside of their own region. Only a handful of people worldwide know the full strategic and operational goals of the military going forward.”

And I said **“Is Donald Trump one of those people?”**

They said “Yes, although again for his own safety certain details are kept under lock and key and on a need to know basis, but Donald J Trump most definitely has the biggest albeit broadest overview of the worldwide military strategic plan.”

I said **“Is Space Force all about fighting war or is it about maintaining peace so is it in an offensive or defensive position in terms of its strategic planning?”**

And they said to me that “Most of Space Force is set up in a defensive strategic role but some specialized operations within Space Force will run the offensive operation strategies.”

So then if you look at the [diagram](#)

[10 min point] that I'm now going to put up for you you'll be able to see the delta wing of the space operations command and you'll see there are quite a number of them and they fall within the space war fighting architecture and I wanted to know because I was drawn to this diagram especially the Delta arms.

I wanted to know **“Are the Delta forces on this diagram within this hierarchy, are they defensive or offensive.?”**

And they said “Both.”

And I said **“What does this mean exactly?”**

They said it means that they are both active and proactive in strategic planning regarding how operations will run within Space Force in order to maintain a worldwide peace plan and I said what is the difference between offensive and defensive in military terms they said “Offensive is where a proactive approach is taken ahead of a perceived potential threat and or unknown threats.”

I said **“So offensive is like a what, a strategy.”**

They said “Yes, defensive is more a reaction to an ongoing threat or a newly activated or discovered threat. Space Force worldwide does need to do both.”

So then I said **“In the space war fighting architecture hierarchy what happens under space operations command?”**

And they said to me that “Space Operations Command is more concerned with strategy and developments of software and operations and who and what will be included in the overall design of the worldwide peace plan. Most of space operations command is classified and has a counterpart in each geographical location of the world i.e. north-south east-west. The commander-in-chiefs work closely

with space operations command.”

I said “Where on this hierarchy does the legislative arm of DC fit in, the White House?”

And they said “It doesn't. The Space Operations Command is not governed directly by the White House or its administrative or legislative arms or departments. The space operations command is a separate entity.

So then I wanted to find out a little bit more about who are these Delta arms which you can see on the Space Operations Command [diagram](#)

[12 min marker] and they said “These are the programmers.”

So I asked “Are these the programmers?”

They said “Yes, the deltas, the Delta sections are the programmers.”

And I said “To what can you tell me that isn't already public knowledge or published they said the strategy of the military the leaders and the commanders in chief of the North East-South West regions of the world is to proactively establish protocols to enable a worldwide technological system of programming to prevent wars and keep all countries in a state of freedom for its citizens. There appears to be slow progress to the day-to-day citizen as these infrastructures and programs are to the greatest extent still being tested and the whole system is being assembled so that it remains hack proof. On the ground political parties will become obsolete as this new decentralized system of managing decisions infrastructure money education and health care is rolled out to keep the streets safe during this handover. Everything has to appear to be business as usual on the ground to the saying that elections and bureaucracy will continue to run the same, at least on the surface levels, until the military are completely happy that the new system can run on a relatively standalone basis

I said “Stand alone how can it run on a relatively standalone basis?”

They said to me that “The intention is for this worldwide program to be implemented with the same rules of engagement and interaction all over and this requires that all countries abide by the precepts without deviating from the practices and principles to keep it all running smoothly and efficiently on the ground it is already running in the background with teams of specialized personnel trying to hack into it into it to test its capabilities.”

So then I asked “What are the actual capabilities of the Delta arms of the space operations command?”

They said “The Delta arm is the operations part of the strategic Space Force division that is highly classified. Delta is deliberately broken down into components so that no one department has the overall strategy, that they only know they're one piece.”

I said “But isn't on a need to know basis like the normal practice within the military strategy in operations anyway?”

They said “Yes and no. In regards Delta strategy and operations they are still being designed and are changing hourly. In other sectors of the military protocols are already ratified and documented as procedural protocols, but Delta is not yet documented or ratified it is a developing area of the military with many unknowns, so procedural protocols are not exactly ratified or in place in the traditional sense. Technology, AI, and the knowledge about cybersecurity is an ever-evolving situation always changing growing and needing immediate decision-making, no referring back to the law of war manual as this is an outdated protocol in the cyberspace environment, for procedures, rules, and protocols are literally being designed as each event unfolds.”

And I said “What sort of events?”

They said mainly cybersecurity events exposing where potentially the styling system has weakness of vulnerability.”

So I said “The concepts of war and peace as written in the law of war manual, will they be completely rewritten to adapt to cyber and space operations?”

They said “Exactly.”

I said “My understanding is that space is an infrastructure for peace, so wouldn't it be called the Law of Peace Manual?”

They said “That’s it exactly.”

Then I asked “How are the military operators and strategists, how are they adapting to this changing landscape and operations in space?”

They said that “The emphasis is on training and encouraging more recruitment around programming innovation and strategy particularly with regard to thinking outside of the box. The old military protocols were developed for operators to follow a chain of command but in the modern structure of space command it is being encouraged to think outside the box and to bring innovation and to experiment.”

And then I said “So this new way of managing peace around the world how will it be introduced to the citizens they said in

some instances it will not be public information as such.”

And they said “That how it will be promoted, in general it is a fun new space age generation foster which fosters in innovation a new style of culture around the military careers is being introduced at the concept of guardians.”

So then I said **“Is our space operations command developing any sort of EBS system?”**

They said “Yes and no. EBS which would be an Emergency Broadcast System has been put on hold, but operators are working on a worldwide transmission system which can communicate to every citizen simultaneously.”

I said **“Wow, what would be the purpose of reason or needing to communicate to every citizen worldwide at the same time?”**

What they said to me was to bring in peace for the hold of humanity then the information needs to be structured and delivered to reach everyone at the same time it's a culture change for humanity changing psychology on a global scale it needs accuracy and stability within the network to allow for this worldwide broadcast of peace it is not an emergency broadcast system it is a peace broadcast system.

So then I said **“How will it be delivered to the masses?”**

They said that “It is intended that TV networks radio stations and mobile phones will run the new worldwide objectives for peace.”

I said **“Will celebrities politicians and spiritual leaders be used during this process?”**

They said “From the military standpoint this is currently undecided.”

I said **“Is the peace broadcast overseen by the Northeast Southwest divisions and their commanders-in-chief.?”**

They said “Not exactly, the peace broadcast is another arm of space operations command.”

I said **“Where is all this peace broadcast system being physically designed? Is it in, say an underground facility?”**

They said “Yes and some of those underground facilities are in Idaho they also said that there is a peace broadcast counterpart in eastern China in Russia and in Australia and the Arctic Circle is also being utilized for the peace broadcast operations.”

I said **“What is the name of the worldwide space collaboration is it still Starlink.”**

They said “Yes.”

I said **“Is this the official name or the name you would like me to use and they actually said both then I asked them the operations and the quadrilateral operations that were publicized recently were they part of Starlink?”**

They said “Yes and no I've put that actual item on my locals.com channel if you want to go and look at that the quadrilateral operations and but what they did say to me was that anything you see on LinkedIn or publicized for everyone's consumption is a very watered-down version of what is coming they said it is a soft psychology drop to get people accustomed to being protected and overseen via Space Force sorry via space.”

Then I asked them **“How would the official announcement of Starlink the space plan and Space Force how will it be handed over to the citizens?”**

They said “It won't have an official handover as such more that it will look like systems are changing on the ground becoming more modern for the next generation.”

So I said **“So it's like a next-generation marketing campaign?”**

They said “Yes.”

I said **“Will this be in all sectors like in banking?”**

They said “Yes.”

I said **“In education?”**

They said “In the tech side of education yes.”

I said **“Health care?”**

They said “To a degree changes to diagnosis protocols with more AI and telemedicine will be introduced. In communications this will be the biggest area of change in the internet technology changes and brought more biometrics.”

So that's all for this video I'm going to do a second video on the biometrics so this video is not too long and as I said if you study the diagram around space operations command and the delta wings then you'll be able to see how everything's starting to fit together from the Space Forces position of trying to create a worldwide peace plan alongside our counterparts in other countries.

So I hope you found this video very interesting today and I'll see you next time. Bye for now.

Worldwide Military Peace Plan Biometrics part two

<https://rumble.com/v37diqt-worldwide-military-peace-plan-biometrics-part-two.html>

Hello everyone, this is part two of my military is the only way and space operations command video and we left off with them telling us that in the future we're going to have communications with more biometrics.

So I just wanted to go in a bit deeper and find out firstly about the biometrics and so I asked them **“First of all, what is a biometric?”**

They said to me that “A biometric is a personal piece of a person's biology which is used for data analysis and identification. So an example of a biometric could be fingerprints, the retina of your eye, blood, like DNA, saliva and possibly even say a brainwave.”

And I said **“Brainwaves?”**

They said that “Each person has a unique way of thinking and feeling which produces a unique consciousness ID.”

I said **“How is this analyzed or recorded and how is this data regarding brainwaves currently being gathered, this consciousness ID?”**

They said “It's being gathered through speech patterns on say Alexa for example and also how you use the keyboard so like your keyboard techniques something called *haptics*. They also said that through experiments in labs and testing how brainwaves respond to different scenarios.”

And I said **“So who is doing the brain cognitive and consciousness research to gather this data on our personal biometrics?”**

They said “Mainly this is being gathered through the AI in our technology and in the cloud.”

And I said **“Who is collecting or analyzing the data after that?”**

They said to me that “Many private organizations have been contracted to work with the military to establish consciousness biometrics.”

And I said **“Are they succeeding?”**

They said “Very much so, it is already running on beta in the military classified locations in the northeast, south and west.”

And I said **“So this isn't just going on like in America?”**

They said “No that worldwide counterparts are trying to piece everything together.”

And I said **“Are these White Hat? Are these White Hat counterparts?”**

They said “Yes.”

“Are they military White Hat counterparts?”

They said “Yes along with contracted highly vetted private organizations.”

So then I said **“Are people like Google enrolled?”**

They said “No.”

And I said **“Facebook?”**

They said “No.”

“So what about meta?”

They said “Yes.”

So I said **“So isn't like meta part Facebook?”**

They said “No meta is a different arm to Facebook meta is only concerned with virtual reality and AI.”

And I said **“Are there other White Hat organizations working alongside the military and Space Force?”**

They said “Yes.”

I said **“Is the UN working alongside them?”**

They said “Actually no.”

“Is it NATO?”

This was “Yes, and others like the quadrilateral counterparts,” which as I said there's a document on my Locals.com about how other counterparts are signing in.

And I said **“Is there a White Hat that has still been set up to work alongside the military and Space Force?”**

They said “Not exactly, but there is a military council currently operating the beta testing of all quantum systems and future military protocols and documentation. It is in a highly classified sector under the Semper Supra structure.”

And I said **“What is the Semper Supra which you can see that it's actually listed on the hierarchy there [on the diagram]?”**

They said “It's the motto for Space Force basically meaning everyone under one umbrella.”

And I said **“Is it a protective umbrella?”**

They said “Yes.”

And I said **“How will Trump be seen to the masses once all this New Setup is revealed to everyone?”**

They said “Most people will not see how any of this is connected to Trump.”

And I said **“So when will this new system become apparent to the masses, this new Space Force system?”**

They said “In the foreground an ongoing campaign to show generational progress change and advancement will be promoted and in the background the highly classified system is currently on beta. It is anticipated that it will start to roll out to the masses in 2026-27 and it will be seen as new exciting advancements in tech as far as the public are concerned.”

And I said **“Once it starts to roll out officially to the masses will it be fast or slow?”**

They said “In some industries like banking it will go fast, but in technology and AI and biometrics it will move more slowly and this is to allow for safety and protocol updates. Much personal data will be used, so it has to be a very safe tech environment to hold this level of personal data which will create your new biometric ID, your unique ID which cannot be hacked and it has your DNA biometric attached.”

I said **“Where is the DNA biometric coming from and how has it been captured?”**

They said “It would have been captured through your blood, your dental records and your hospital records. Even pets would have had those taken from their pets records. Plants will also be registered with a DNA biometric. It is all on the blockchain.”

And I said **“Is anything within any vaccines being used to create part of this biometric ID?”**

They said “Yes, the nano. The nano is also in in the air the land and the food and the nano creates a unique biometric within each human.

And I said **“Is this currently operational?”**

They said “In some instances, yes.”

And I said “Is it going to be used for good intention like freedom.

They said “Yes a bad system will be reversed to give freedom of speech, movement and sovereignty.”

So they're saying that the new biometrics will replace what they currently are calling a bad system and the new system with the biometrics will give you freedom of speech, freedom of movement, and sovereignty.

I said **“Does the nano biometric connect our ID to the new financial system?”**

They said “Yes in some cases.”

And I said **“In some cases?”**

They said “It is intended for full financial freedom and the biometric ID will have a financial and nano component in, on or around the body.”

I said **“Will 5G towers be used to monitor the biometric IDs?”**

They said “No, 5G will become obsolete in the freedom cities. For example, healing frequencies may be transmitted if the citizens vote for that feature. All features of the freedom cities will be decided by the decentralized voting authority. In the future even certain areas of a freedom city can be set up with healing frequency and not the whole thing, if the people decide that. People will decide, for instance, if they want healing frequency in the whole city or just in certain places within it. So you could have a healing garden or something like that.”

I said **“Will Space Force oversee these freedom cities?”**

They said “Not directly, no. They only oversee the safety of the worldwide network, its stability, and the worldwide peace plan .The freedom city administration and technology will be managed by decentralized citizen management voting.”

“So then, just for you to clarify again, will there be some sort of peace broadcast to the people which we've currently had labeled as like an Emergency Broadcast System but they're calling it a peace broadcast?”

So I said **“Will the masses be told the truth's going forward and what role will the toxic media play, if any?”**

They said that “The dual narrative of the Truth Social Movement and the opposing conspiracy labels from the toxic media will continue for quite some time. People are still being taught to think for themselves. A toxic media will throw truths into the mix to gradually acclimate people going forward. This slow burn is not intended to change for some time.

For some people the TV and news is like a religion, so too much change too fast could create too much instability and it could lead to revolutions and violence.”

So they're not intending to do it that way, in a fast way.

So then I said **“So will there be a broadcast of some sort worldwide in the future explaining all the changes necessary for a move into the quantum world of freedom cities?”**

They said to me “There will be an unfolding of information worldwide but not necessarily in one blast as had previously been as you previously had it described to you in the narratives around an Emergency Broadcast System.”

They're saying that “The emphasis is always going to be on peace, calm and re-educating for sovereignty. So there'll be no sudden shocking moves that might provoke revolution, again a slow burn to acclimate the people.”

So then I asked if there was going to be a new currency coming just to check if they're going to try and tie together the biometrics with the currency.

So I asked them **“Is there a new currency coming?”**

They said “Yes.

And I said **“Can you explain this?”**

“The new currency will be a global digital currency backed by assets at the worldwide virtual vault.”

If you don't know about the virtual vault you can see that on one of my other videos called the worldwide virtual vault.

And I said **“What will this currency be called?”**

They said that “Each region will call their digital currency something different in the northeast, south and west regions.”

And I said **“Who will curate and distribute these digital currencies? Will it be the central banks?”**

They said “Initially it may be seen to be the central banks as this would be more normal for the citizens as they get used to the new concept,” but again it's because they're trying to keep things calm. They said “Once the digital currencies are established then their true origin of control which is Starlink will take over and the banks will on the whole become obsolete and people will speak to the Quantum Financial System directly from their decentralized phones and laptops etc.”

So I said **“Will the new digital currency be attached to these biometrics like the eye, the retina, the fingerprint, the DNA, the voice recognition and the consciousness id i.e. the brain waves?”**

They said “All of the above.”

So then I asked them **“To what extent is the biometric system already set up and running?”**

They said “It has been running on beta for many years, but until recently we didn't have the quantum computing capacity to make a generational switch?”

Then I said **“When will this biometric currency and other biometric facilities start to be introduced to the masses?”**

They said “It has already started in most areas, but will be normal as time progresses, Freedom cities will run entirely on biometrics including voice recognition, brain waves and facial recognition, for example. Biometrics are multi-layered creating a unique id for each citizen. It will not be based on one biometric, but on a combination of many.”

I said **“Is the technology available now to run these freedom cities with these biometrics?”**

They said “It is currently being put together and it's highly classified in most instances.”

I said **“Who is coordinating the research and development of the biometric IDs?”**

They said to me that “Many private specialist organizations have been contracted by governments to look at how this technology can be used safely in all walks of life worldwide.”

I said but governments in their current format, they will become obsolete right?”

They said “Yes, hence the reason for biometrics, so that the day-to-day functions can run smoothly and safely without the need for all these layers of government and this will change the face of policing as well. There will be a major structural and cultural reorganization of policing in the road ahead of us. The concept of policing will look very different as technology steps in in most cases. This is about 10 years out in the current estimates and policing will be one of the last concepts to be seen to radically change.”

I said **“Will the new generation of military guardians oversee the policing duties going forward?”**

They said “In some respects policing in the future will be overseen by the new generation of military guardians. Guardians are being trained to run operations from space-based technology and this is how the freedoms it is and future development of civilization is soon to be headed at this current time. It's a new concept designed to create a worldwide peace plan.”

Then I said **“What are the pros and cons of a currency linked to a DNA biometric?”**

They said “The pros are that you'll have safe clean transactions, no black money or illegal trading like trafficking. You'll have non-dangerous criminals who could still be functional in society whilst working out their sentences, for example. The DNA biometric adds another layer of security to each of our personal unique quantum IDs creating more safety. If one layer was compromised through a cyber attack. It wouldn't affect the whole biometric ID.

The downside is that it may be seen by society as invasive and it will require cultural retraining to move fully into this digital quantum biometric system.”

So hope you found that information about the quantum biometrics and the biometric ID linking into the financial system, I hope you found that interesting.

It looks like the whole thing is going to run via the space with various layers of Space Force and space technology overseeing our safety and biometrics in the future. So I hope you found that interesting about the biometrics that are intended to be brought in in the future which will run with the military structures and will allow us to operate within what they're calling freedom cities giving us freedoms of speech, movement and sovereignty.

Thank you for listening.

Elon Musk- Truth Social Movement- Trump

Apr 28, 2022

<https://www.youtube.com/watch?v=uf23dwtvMBg>

As people move to new platforms which are uncensored then a movement of truth will prevail for We the People.

Good morning everyone. I've got lots of notes on my pad so I thought it was time for us to do an update. And before we start I wanted to refer you back to a video that I had recorded back in November 2020 which was entitled Predictions USA Elon Musk and I think it says some other things in the title as well. And in that video I said that Elon Musk is working with President Trump and is likely to run or manage a new social network possibly Facebook but it will be rebranded and reformatted and there will be no more censorship or misinformation. So obviously we're just starting to see that now with the buying out of Twitter by Elon and I wanted to just update you on some of the information I've been getting for some weeks about Elon Musk regarding everything that he's doing in the world and looking at whether he's a White Hat or a Black Hat and what his strategy is and just having a really thorough look at Elon Musk today and some other things going on in the world as well.

So first of all the thing that was coming into my mind was how does Elon Musk produce so many new products so quickly. So if you think about when Steve Jobs was the front man for Apple he used to take about a year for each new product so we would queue up for our new iPhone each Christmas and it would take that whole year for them to come up with the innovation and then to manufacture that behind the scenes so that they could get that to market. So I know that technology has moved on a lot since then but even so if Elon Musk is sort of making a spaceship on Monday and a Tesla car on Tuesday and a quantum phone on Wednesday and solar energy on Thursday etc. etc. that's an awful lot of infrastructure that needs to be available in order for him to manufacture all those new products.

So I wanted to look around all of that and find out was Elon Musk and Tesla and SpaceX the only components to his strategy or did he have some sort of support from somewhere else so I'm going to go through what I've been speaking to them about recently. These notes go back about three weeks and everything's happening very fast at the moment with Elon Musk so that some of this stuff has already occurred obviously but the notes and channeling were taken down before those events rapidly occurred.

So firstly I wanted to know **“Is Elon Musk a White Hat or a Black Hat?”**

They told me that “He does play both sides but he does this in order to strategically move forward with his plan.”

And I said **“His plan?”**

They said that “Elon Musk has a great plan for humanity and has technological information and designs that can serve the greater good. So going back to my corporate and strategic business days we used to have a tool in our strategic toolbox called a SWOT analysis which stands for strengths, weaknesses, opportunities, and threats. It's a way of looking at the corporate environment around you i.e. looking at what other businesses are doing and what threats are potentially out there in terms of how you run your business.

So when they say that Musk plays both sides what I feel this means in this context is that he works with the SWOT analysis and different types of corporate and strategic analysis to find out what competitors are doing which is what you need to do in business. You need to be on top of, obviously, what everyone else is developing so that you can stay one step ahead.

So my feeling about Musk is that when people think he's playing both sides, I think that's more about knowing your enemy. The next thing that started to come through to me was Elon Musk seems to have a very powerful position right now. It's becoming more and more obvious to me and I've known this for some time anyway.

So I wanted to know **“Is Elon Musk leading the White Hats?”**

And they said that “Elon Musk is not leading the White Hats but he is working with them to bring forward technological revolution and evolution.”

So I then slightly repositioned the question and I asked **“Is Elon Musk an ambassador for the White Hats?”**

They said “No, because Elon Musk is above that level he is not their leader, but he is on an even par with the White Hats leader.”

So that was very interesting he's not an actual leader of the White Hats but he's on but his level of authority is on an even par with the White Hat leader, whoever that might be. So that was very interesting and shows he has a lot of power.

So then I asked **“Is Elon Musk the face or the front man for the military?”** Because again I'm thinking all these technologies that he's bringing out so rapidly, he needs something behind that in the back office. He needs a manufacturing backup, a distribution backup.

They said that “Elon Musk is working with the military to bring out technology that has been hidden from humanity for hundreds and thousands of years.”

And I said **“What technology is that?”**

They said “New forms of healing through frequency vibration and sound, new transport which will be cheaper, cleaner, faster and safer and new communication systems which will be secure and encrypted for the people.”

And I said **“Is social media included in any of these new communications?”**

They said that “He wasn't interested in social media platforms initially, but now he's seeing how freedoms of speech are being curtailed and he has joined forces with other super tech individuals to devise a plan to bring free speech platforms back to the people.

And I asked **“Who are some of these super tech individuals that he might be working with?”**

I was told “Julian Assange, Edward Snowden and other military intelligence.”

And I said to them **“So what are Elon Musk's intentions around Twitter?”**

And they said that “Musk will reinvent a new social media platform which will outrun Twitter over time.”

So whether that means he's going to set up a second platform that will work against Twitter or whether he will rebrand Twitter and upgrade it, we will have to see how that unfolds.

I asked **“Is Musk working with White Hat or Black Hat military?”**

They said “Both, he likes to strategically know all angles of the project [like doing the SWOT analysis that I referred to before] so that he can make a plan.”

I said **“What would a SWOT analysis for Musk look like?”**

“Under strength, he has a large following. He has good leadership. He's innovative and he's a humanitarian. And a weakness is then potentially the [need for] money for the bigger projects. That might be a weakness for him going forward. Under opportunity, he's in an expanding market and under threats, he might be seen as a monopoly.”

So that's how a SWOT analysis is worked out. You look at the strengths, the weaknesses, the opportunities and the threats surrounding your business that was also just a very basic SWOT but if you were doing it for corporate business you would feel that in a lot more detail and that's why you need to work with but you need to know everything that's going on in your environment whether that's the good guys or the bad guys.

I asked **“Is Elon Musk going to be part of Truth Social?”**

They said “No, Elon Musk will work separately to the Truth Social app, but will be part of the Truth Social Movement.”

And I asked **“Like Truth Social Movement, what's the Truth Social Movement?”**

They've been kind of showing me for some time this vision of like a circle of pieces like apps and different types of media and different types of groups and they're all like White Hats and truthers they're all working for the truth and they've been showing them moving together as like moving forward together, coming in and recently I was told that all of those pieces together will create something called the *Truth Social Movement*.

And that's already now in full swing and so we're now starting to see the repercussions of that with the takeover of Twitter and I would say about a year ago they said that people had already infiltrated and gone into the mainstream media and were already working out a plan for this to happen so all those pieces whether that be mainstream media White Hats, the alternative media, the new apps are now becoming available. All of that together creates the movement called Truth Social.

So I wanted to know **“Is Elon Musk part of that?”**

They were saying “The Truth Social Movement is all of the White Hat media which is currently being restructured or developed and is forming a movement. The Truth Social Movement is what it's going to is what it's called. As people move to new platforms which are uncensored then a movement of truth will prevail for We the People.” They said again, “This is a movement,” and they said in capital letters the, “Truth Social Movement and Truth Social as in the app is an umbrella term.”

So I asked **“Is MXM, [which is the app that's been set up by Donald Trump jr] is that part of the Truth Social Movement?”** And they said “Yes.” I said **“Rumble?”** and they said “Yes.” I said **“Obviously the Truth Social app.”** they said “Yes.”

I asked them about **Fox News** and they said “Not yet, but it's in transition,” and **CNN** they said “Not yet, but it will be rebranded and repositioned to join the Truth Social Movement in the future.”

So as I said I saw the military White Hats moving into the media organizations a good 12 months ago probably longer and they're saying to me that “The White Hats military have been restructuring the face of all media from the inside out actually for many years in some cases on a strategic level.” And they gave me the example of Netflix.

I said **“Will the Truth Social umbrella term, will it create a comprehensive media for We the People?”** and they said “Yes, the strategy has been to come at it from all angles creating not just new platforms like Telegram but to restructure existing media from within. The White Hats have been positioned for some time to do the groundwork.”

I asked **“Are all the technologies being brought forward by Elon Musk from the military so that's not to say the things that he's already created like Tesla and SpaceX but the things that are coming forward perhaps in the future or right now are they being brought forward from the military?”**

And they said “Yes, Elon Musk is the front man so these hidden technologies can be brought in free of politics. Elon Musk is apolitical and only wants to serve humanity.”

They also started explaining to me that Starlink which we're kind of been talking about a lot in our previous interviews me and Nick Veniamin we've been talking about how all the countries have to sign into Starlink in order for us to move forward with lots of different things going on at the moment in terms of financial restructuring and some other things going on like banking, education, internet and I started to feel like Starlink was again another umbrella term so even though there is an internet called Starlink, I was starting to feel like Starlink was a term like Truth Social Movement.

So I said **“Is Starlink just the internet concept which we have in our home office?”**

They said “No, Starlink is the umbrella term for all technology linking together in the future to create a worldwide network of digital communications for money, health, transport, education, and security.”

And I said **“Security?”** and they said “Starlink will allow borders to be opened with free flow of movement by the people. The world was not invented with post codes or borders and Starlink is a concept to bring peace to the world through connectivity.”

And I said **“Connectivity.”** and they said “The Starlink integrated system of communications, transport, banking, education and power will bring everyone together. It is a system designed for humanity.”

I said **“So how important is Elon Musk to this White Hat military strategy?”** “Elon Musk has been and will continue to be a key player for the military White Hat team.”

I asked them **“Did Elon Musk ever intend to work with the Black Hats to go against or control humanity as part of the New World Order?”**

They said “No, Musk finds the whole idea of the New World Order plan abhorrent beyond words. It physically sickens him that humanity could become enslaved by such an abhorrent system of control. Elon Musk is a humanitarian. He wants the world to be bright, not just for his kids, but for everyone's children now and in the future, which is also why part of one of his projects that he's involved in is called Ad Astra. The new education system for children which he's developed called Ad Astra is where children learn through their natural aptitude and not like an enforced doctrine.”

So I understand that this education system already runs for SpaceX employees and I'm not sure if this is an education system which they are setting up to run universally to be available worldwide.

I said **“Will it be openly revealed in the future that Elon Musk has been the front man for the military?”**

They said “No, Elon Musk is in fact a genius in his own right, but these multiple projects he's leading or introducing do need a big setup and infrastructure and the military are providing the production / strategic infrastructure behind the scenes.”

I said **“Is Elon Musk valued highly by the White Hat military?”**

They said “The Alliance works side-by-side with Elon Musk and in some respects Elon Musk has the final say and is respected.”

I said **“Is Elon Musk involved with [off-worlders](#) ?”**

They said “Yes. Elon Musk works with technology and intelligence from higher dimensions and galaxies and the military supports

him.”

I asked **“Is Elon Musk was involved in terraforming?”**

They said “No, Elon Musk believes in keeping things in line with nature and not interfering with earth's natural ebbs and flows from the level of the weather.”

I asked **“Was Elon Musk behind the 17th letter of the alphabet?”**

They said “No that the 17th letter of the alphabet was a psyop to awaken the people to create the impetus to the Truth Social Movement.”

I asked **“Is Musk working with Trump?”**

And this was interesting because they said “No, not at the moment.”

They're saying something quite strange that I haven't seen before they're saying that “Trump is no longer the front man for the people's movement.”

And I said **“Front man?”**

They said that “Trump was only the catalyst to get this movement started for the people and now other members of the Trump family are being moved into strategic positions in order to take the plan forward after the midterms in 2022 and 2024.”

And I said **“Is this what is meant by the ending won't be for everyone?”**

They said that “The ending will see a new political setup to evolve to the people and no one leader or group will enslave or control the people. The people have to be in their sovereignty to navigate the new world ahead of us.”

I wanted to know **“If based on what Elon Musk had discovered about the Black Hats was he trying to take some form of revenge?”**

They said “No, Elon Musk is trying to restore balance in a world where the narrative has become very skewed towards a dark agenda of control and censorship restricting freedom. He abhors restrictions such as these and is dedicated in his path to providing humanity with a broad spectrum of technological idealist ideas to free people and to allow free speech and movement.”

I asked **“Is Elon Musk a part of the 17th letter of the alphabet team?”**

They said “No, he is above their level of clearance. They would essentially report to him,” which was very interesting so the team behind the 17th letter of the alphabet would report to Musk “and they would be doing that whether that was directly or indirectly.”

I then started to look again around President Trump and is he the leader of the White Hats, because over here they were saying that he was not the front man, he was only the catalyst to get the Truth Social Movement, the people's movement, running.

So I wanted to know and check **“Is President Trump the leader of the White Hats at the moment?”**

They said “No, that that position has recently been filled by a woman.”

And I asked **“Is it Melania Trump?”**

And it was denied and so I just wanted to check **“Is Melania Trump known by any other names within the White Hat hierarchy and beyond?”**

They said “No she is known as Melania Trump.”

So when they deny something, it doesn't mean they're saying no. It means that they can’t answer at this particular time because it might be sensitive.

So then I wanted to know **“What is Elon Musk's strategy with regard to social media in general?”**

They said he will develop a new integrated network accessible through the quantum phones and technologies” so that will be like the laptops etc. “and it will be encrypted end to end and it will be unhackable and it will be free of censorship.”

And I said **“Is there an element of secrecy around all this venture?”**

They said “Yes and no, the secrecy was more in the past while they were developing the plan strategically. The plan was to show the people how biased the social media platforms have been and how they have been controlling the narrative with a dark agenda and this is now known by the masses then the already developed platforms can now be launched and these will upgrade what is already available so, for example, Facebook, YouTube and Twitter.”

So I said **“Are the new platforms integrated and in what way?”**

They said “They are designed for quantum technologies and will form part of the Truth Social Movement, the movement for the people towards autonomy and sovereignty and free speech.”

I said **“How powerful is Elon Musk with the White Hats and the Black Hats?”**

They said “Elon Musk's word is sought by the White Hats and that the Black Hats have no leverage with Musk and they have been aware of this for many years.”

And I said **“How many years?”** They said “Ten years minimum.”

I said **“Is Musk going to buy out Amazon or Facebook?”**

They said “No, all his products will replace the use of the above eventually through consumer choice, consumers will naturally migrate to his fairer systems.”

Then I went back to ask them again about the Ad Astra which actually means “to the stars” and this is the education system that Musk and a company called *Synthesis* have put together, it's an education platform.

And I said **“How will this school template influence the masses?”**

They said “This template of allowing children to develop their natural aptitude over a prescribed doctrine will once again become part of the quantum education system and the masses will choose to migrate to this freer system of education for their children and this school that's currently running is available for SpaceX children and his kids.

And so I asked **“When will it reach the masses?”**

They said that “This concept / platform will be launched with the quantum package over the next 10 to 15 years.”

And I said **“What is the *quantum package*?”**

They said “The quantum package is a combination of space, internet, social media, health, phones, sustainable housing, smart cities, and healing technology like Tesla.”

I recently heard that Elon is putting together an underground city in New York. So I said **“The underground city in New York that Elon Musk is involved in, is it for disclosure or to show how tunnels will be repurposed?”**

They said “Both, Musk will repurpose spaces underground i.e. tunnels to make super fast highways and travel systems.” And they said that “MagLev which stands for magnetic levitation will be used and this is in action in some parts of the world already but is top secret. A Maglev network of trains, cars and transport is running from each continent already. CERN has been a hub of activity around the development of this technology, a super fast highway also exists between the Arctic and Antarctic to transport high risk people prisoners and people of interest.

I then asked about the Neuralink project. I wanted to know **“Is the Neuralink project for control or for freedom?”**

They said “Neither, it's a medical advancement to aid in paralysis recovery.”

“So Elon Musk is also involved in a smart city development in Africa and my understanding is it's going to be a smart city which is going to house all of Musk's technological innovations?”

They said “Yes and no. That is the case, but it will mostly be a showcase for sustainable living under a dome using permaculture where everything will be grown organically. Transport will be first non-polluting and safe the city will be powered by solar and the trains will run on magnetic levitation or Maglev or similar and this city is currently under construction so this is a smart city that Musk is currently putting together in Africa

I said **“Will it be above or below ground, because I've heard obviously they talked about a dome so I'm assuming it's going to be above ground?”** But they actually said “It will be both, some of the technology to harness obviously the sun and solar will be above ground and the magnetic energy which will be which will also be used for propulsion will be used underground for the transport systems.”

And I said **“Does Elon Musk want to introduce free energy like Tesla?”**

They said “Yes, he does but he also wants to introduce more solar energy models and vibrational or magnetic models of free energy also. This is all in the pipeline.

I then asked about the pi phones. I said **“Are the pi phones near to being available to the masses?”**

They said “Yes, over the next two to five years quantum phones will be available worldwide and they will be powered by solar.”

I said **“Could Tesla that energy help with heart math?”** Heart math is the energetic field that's generated by your heart

They said “Yes Tesla energies are compatible with the magnetic field around the heart helping it to align and expand which allows for a natural expansion of consciousness.

I wanted to ask **“Why did Musk set up Starlink in the Ukraine?”**

“In reality it was already set up beforehand as the Ukraine is all part of the strategic plan by the White Hats and the Alliance to clean house. The Starlink system is able to track those people who might be trying to escape digitally like the bad players can be monitored online and on a digital basis. So the Starlink story is not really about supporting one country against another but it's more to help track and remove bad players or assets.”

I said **“What is a Q phone? Is it the same as a pi phone?”** The pi phone is the name of the one that Musk is currently putting together. “They said they are both quantum phones but they're just different brands with different capabilities.”

I just wanted to ask them again about the Starlink system.

I said **“When you speak to me about Starlink are you using it as a blanket term for quantum connectivity.”** They said “Yes.”

And I said **“Can you explain?”** They said “Starlink has been an umbrella term to encompass connectivity between all modes of quantum tech including phones, internet, laptops, servers and space tech.”

And finally I had a channeling where they wanted to speak to us and so I'll let you know what they said:

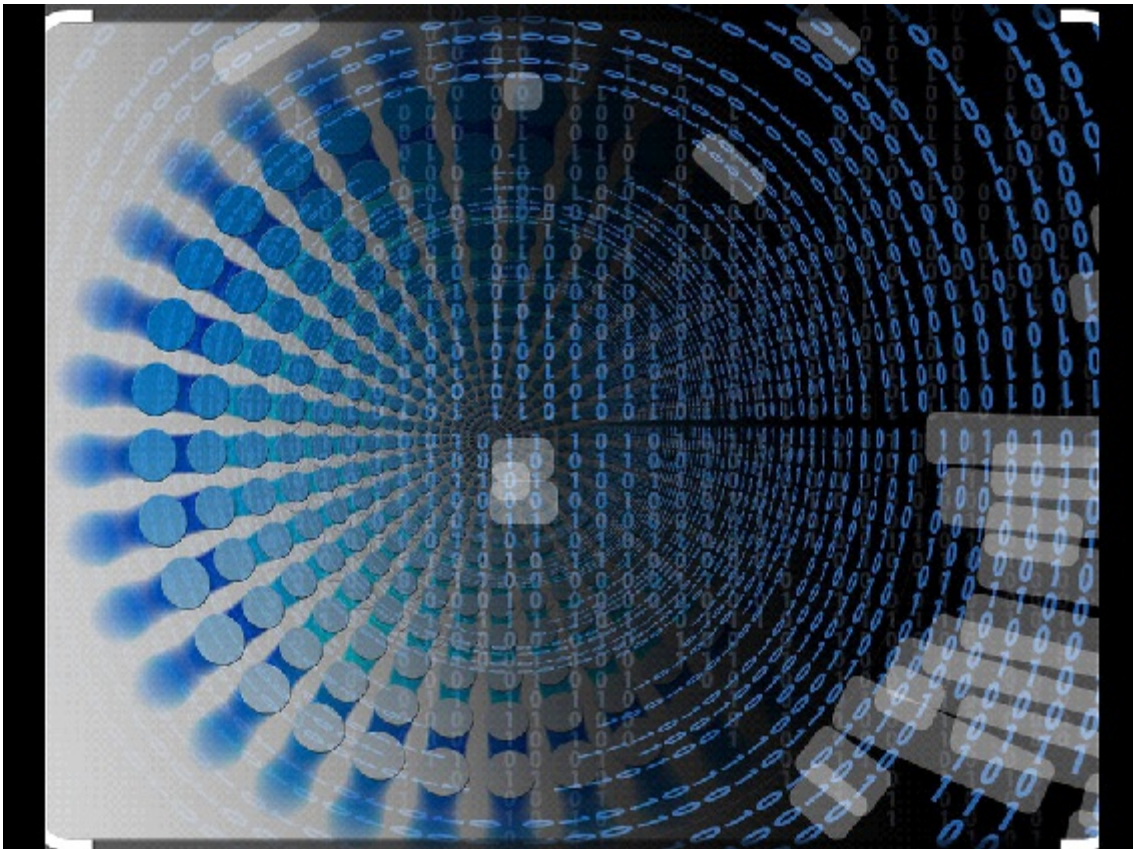

They said “Dearest beings of light. A great change is now being witnessed as people step into their sovereignty and speak their truth. New media is now working with you and for you to help humanity rise up and over the tyranny of the censorship and oppression that has formerly been instigated by the dark controllers. The controllers of the matrix of this platform of control is rapidly falling apart as major new players step forward in a synchronized plan of bringing in the new world beings of light. This is your time keep speaking your truth and this was a channeling from Sanat Kumara.

I hope you've enjoyed this information today and I look forward to seeing you very soon

Quantum Worldwide Virtual Vault (QFS) Part I

April 2023

<https://rumble.com/v29nkqa-quantum-worldwide-virtual-vault-qfs.html>

The Quantum Financial System is a complex, highly regulated financial system, much superior to the old banking system. It is integration with blockchain, cryptocurrency and Starlink connectivity that creates a superior product or system which has not been seen or managed before."

Good morning everyone. Today I am going to try and explain to you about the Quantum Financial System starting with an introduction to what is the Quantum Financial System and then I'm going to make other videos which are going to try and break down the different components because lots of people write to me and they say that they don't understand what the Quantum Financial System is and all these different terms that we hear like cryptocurrency, wallets, Bitcoin, blockchain, tokenization, I mean there's just so many different layers to what the Quantum Financial System means. So I don't know all of it myself so I thought that a good way to learn would be to break it down into sections and then to put videos out to you guys in a channeled way so that we can understand it in a more simplified version. So we effectively turn very complex structure into something that we can all understand in day-to-day terms. So today I'm just starting with the overview of what is the Quantum Financial System.

So first of all I wanted to look at the whole concept of banking and banks at the moment and so I asked them **"Are the banks going to collapse?"** That was the first thing that I think a lot of people are concerned about.

They said to me that "The banks in their current format will be restructured."

And I said **"Is this already happening?"**

And they said "Yes, the banks have been undergoing radical changes in setup in the recent past."

And I said **"What are these changes?"**

They said "The changes are mainly to do with how the money is recorded, stored and transmitted."

And I said **"Do you mean physical money?"** And they said "Yes."

And I said "Is the physical money being replaced by digital or crypto assets? And they said that in some cases it is being replaced."

Then I said **"Why is physical cash being replaced by digital or crypto asset?"**

And they said that "The whole banking and financial world setup is being regulated to prevent black money, hacking, drug trafficking and tax evasion amongst other things."

And I said **"So are the banks handing over to a different system called the QFS which we understand to be the Quantum Financial System?"**

And they said "Yes, they are."

I said **"Will all banks be or are all banks currently on the Quantum Financial System?"**

And they said "Yes, mostly they are."

Then I asked them **"So what is the Quantum Financial System?"**

"The Quantum Financial System is a complex, highly regulated financial system, much superior to the old banking system. It is integration with blockchain, cryptocurrency and Starlink connectivity that creates a superior product or system which has not been seen or managed before."

So I said **"To what extent are banks and financial institutions currently using the QFS?"**

And they said "Most are now switched over behind the scenes."

And I said **"Why is this process so secretive?"**

They said "The system internally needed to all switch over at the same time. So it was on a beta test initially. And bankers and financiers were under military NDAs or Non-Disclosure Agreements during the beta phase. And to the greater extent, these agreements are still in operation. They reduced the risks of public anxiety during the handover process. To avoid a worldwide financial crisis with cash flow, then the system has been kept below the radar. There is a strategy in place to avoid financial collapse worldwide."

And I said **"Who is it that's planning to avoid the financial collapse? I assume that you're talking about a White Hat Alliance or military situation."**

And they said "Yes, a combination of all of those due to complexity and the scale of the initiative."

So then I said to them, **“So what have been the building blocks to the Quantum Financial System and how far along are we in its design or strategy?”**

“They said that the QFS couldn't begin its journey to the public arena until Starlink's connectivity and regulation was 80% agreed.”

Now, if you go back and watch videos of me and Nick Veniamin are which probably about two years ago now, we've been talking about this regulation, where everybody had to sign into the system worldwide. They were all on the same set of protocols. The Quantum Financial System couldn't begin its journey to the public arena until that happened. This was a big factor in this strategic plan and this overhaul of the worldwide distribution of money.

And then I said to them that **“I noticed that you’ve called it the worldwide distribution of money rather than a banking system.”**

And they said “Yes, by definition, people view banking as a punitive system, which is corrupted and open to manipulations. Well, that's how it's been seen in the past.” The Starlink system is a fairer system for the distribution of wealth to humanity.

I asked them, **“Is this in line with the Nesara or Gesara precepts?”**

And they said, “Partly, it is in line with the humanitarian system of wealth distribution and world peace, as designed in the Nesara Gesara framework.” But it's much bigger than that. The Starlink Quantum Financial System is a tool for psychological and cultural transformation on a global scale. The transactions on the Quantum Financial System will encourage nations to build their own community wealth and enable citizens to be locally sustainable. It's a worldwide network, but it's not based on capitalism. For example, it is not based on profit before people, which is what we've been used to in the past. It's based on fair distribution of wealth, community building and local sustainability, keeping prices lower and more stable and controllable. So when you build local communities and you create sustainability on a local basis, then this keeps the prices more stable and more controllable. Local competition will keep pricing affordable. So if you keep your goods and services within your own regions, then you're competing against each other. And so it keeps the prices down, keeps everything affordable. The concept of international trading will change with the Quantum Financial System as it will become more desirable financially to trade within your own respective geographical and natural resource regions.

And I said, **“So what does this mean in real terms? Are you saying that oil, for example, will be encouraged to be sold only within its country or location of origin?”**

And they said “In some cases, yes, as oil, for example, will not be a necessity going into the future as different types of energy will be brought forward to replace the need for oil. And so these new technologies will replace the need for oil to be distributed outside of its area of natural occurrence or production. So this will be the same for precious commodities like silver, gold and diamonds. In the future their value will be most effective in their local region of natural occurrence.”

So I said, **“I'm not sure that I understand this concept entirely. Doesn't gold and silver, for example, need to be held in each financial location of the world to create an even supply or fund?”** And they said “No, because the gold silver assets will belong to the centralized system of the Quantum Financial System as a whole.

And I said, **“Kind of like a big holding pot?”** And they said “Kind of yes, they said that the QFS, the Quantum Financial System will be a virtual vault for the world's assets, precious and precious materials. So their place of origination from where they originated from will be unimportant.”

So I said to them, **“So why are the gold, silver and precious assets going to be stored on the Quantum Financial System virtual vault?”**

And they said to me, “If all assets are virtually stored on the Quantum Financial System, then they can be fairly divided between all nations.”

So I said to them, **“Just to be clear, so the actual gold, silver and oil, or the precious assets, they're not going to be stored in a country's vault physically.”**

And they said, “Yes, the assets for each country will still be physically held within their geographical regions. But their value for trade and distribution will be added to the total virtual fund on the Quantum Financial Systems virtual vault, where it will then be distributed out to the whole of humanity, fairly.”

diagram, where they had the Quantum Financial System at the top. And they called that the central virtual vault. And then they showed me, like you might have Saudi Arabia here, who's got oil, and you might have Africa here that's got gold or diamonds, and you might have oil over here with the USA. And the value of all of those assets will then be held in the virtual vault. The actual assets will still remain in those countries. They're not actually going anywhere. It's just the value of what those assets are worth will be reflected into the virtual vault to create a total fund. So all countries will have their assets, and it will be reflected into the Quantum Financial Systems virtual vault.

So I said to them, **“So the Quantum Financial Systems virtual vault will have a total central value, based on the valuation of all the assets combined from all regions worldwide? And they said “Yes.”**

And I said, **“So are all these countries and regions signed into this agreement right now?”** And they said “On the whole they were.”

And I said, **“What is the percentage of that worldwide?”** And they said “85%.”

And I said, **“So how will money be fairly distributed from the vault, from the virtual vault? In what format will it be? So we've got all the countries here with their assets, and their valuation that's then reflected into the virtual vault. But how does that vault itemize that value? How does it distribute it back to humanity? So I wanted to know, will that vault the reflection, the value, will it be in tokens or crypto or digital or e-cash? And I said, and also who's going to decide what is fair when they're distributing it back out to humanity?”**

They said to me that “The money will mainly be distributed using digital tokens. And that the distribution will be fair in the sense that exchange rates will no longer be used in different countries. So each coin will be worth one. So for example, if you've got one We the People coin in the USA, it will be worth exactly the same, one We the People coin in another country, or whatever their coin might be called or their token. So the Quantum Financial System virtual vault will divide this total fund, which has been reflected from the assets of all the countries. And it will divide the fund fairly to every human, regardless of where they live. So everybody in the world puts all of their assets together into the virtual vault and it creates a total amount, which is then turned into tokens. And then all that pot of tokens, going to be distributed out to humanity fairly. So each country doesn't lose any of their assets. Maybe it isn't losing anything. The virtual vault is just a reflection of what each country currently holds in terms of asset.”

So then I said, **“So will international business cease?”**

And they said “No, international business and trade will still continue. But without an exchange rate, it will look very different to how business currently operates”

And I said, **“So in basic terms, if I can't access say bananas or say coffee in my country without necessarily important without importing it and how is this going to look in real terms under this new Quantum Financial System business system?”**

And they said to me “The items that we can't get in our own country, like say bananas or coffee, it can still be imported. But one We the People coin in the country of the origin of the products will be the same value in the country where they're taking, where they're making the goods go to, or where the goods are destined.”

So I'm I don't understand economics in any great detail. But if anyone can see any flaws with that, please make comments. Please explain to me, if you're an economist, how you see that working or not working.

So then I said, **“What will happen to people's funds and savings, and their bonds and their pensions, once this central virtual**

vault goes live to the people?”

And they said to me “Everything that you have in your accounts as a credit or an asset will remain. But instead of it being reflected as pounds and pence or dollars and cents or whatever your local currency is, it's going to be revalued at this central virtual vault. And you will be given the exact same amount in a digital token or coin. To just as the countries had all the assets being reflected into the virtual vault, so will you have the same. So if you've got a personal pension, and some money in bonds, and some money sitting in a savings account, and a trust fund, and some money for your children's education, all of those assets and funds will be digitally reflected into the virtual vault.”

And I said to them, **“So will you spend it in the same way, or will it like lose its value when we get this, when they reflect it into the virtual vault? When we get our tokens will we be able to spend it in the same way as the value of the assets that we had previously, or is it going to lose its value?”**

And they said, “It would just be exchanged for the new currency method at that time, whether it be a regulated crypto or a digital token.”

So then I asked **“So people that are already millionaires, well, who already consider themselves to be fairly well off or wealthy, will it still be valid the same in financial terms for them?”**

And they said “Yes, but instead of a millionaire in pounds or dollars or whatever currency that they are a millionaire in, it will equate to a million of whatever the Quantum Financial System, central virtual vault issues. So for example, if this the virtual vault and the tokens are now called We the People tokens, then your million pounds will be worth 1 million We the People tokens.

So then I said **“Will humanity all be wealthier after the redistribution from the virtual vault of the Quantum Financial System?”**

And they said to me “The redistribution will allow for a fair economic situation for everyone, and it is anticipated that prices for goods and services will dramatically reduce and that people will have a fairer work / life balance. People will still be able to work whatever hours they choose, but with but without the outside financial pressures of society, they will move to a shorter working week or day overall.”

And I said, **“So will people still like buy properties to say create a lifelong asset? Most people aspire to owning a property.”**

And they said “How buying and property acquisition in the future will be affordable to everyone. So there will not be the pressure to work long hours so that you can have a roof over your head and food and warmth, etc. This concept of the rat race where you work all these hours or week just to keep a roof over your head and to feed your family. This is now becoming an outdated concept, because we're moving into a new paradigm called the Golden Age,” which in my spiritual channelling they call it the Age of Love.

So I said to them, **“So if the system is a simplified wealth distribution system, then why do we have all these different systems like ripple, stellar, ethereum, what are all of these?”** Now I haven't studied all of these yet, so I don't even know exactly what all of those things do, but I will be breaking that all down for you in future videos. But just for now, I just blasted out any names of things that I know are connected to the Quantum Financial System. And I wanted to know, “So if the system is a simplified wealth distribution system, then why do we have all these different aspects of it?”

And they said to me, “So even though the concept of wealth distribution is simplistic, the process is an infrastructure to achieve it are very complex to allow for the many scenarios in business, culture and population. So even the type of transaction will require a different type of software or network solution.” So they gave me an example. They said, for example, some transactions will require the blockchain and some transactions won't. They said a rare commodity or item of value, as viewed from the buyer's perspective, could use, for instance, a non-fundable token. And that might be a very straightforward process. I've got something that you desire, you pay me with an NFT, and then you get the license to that product, that virtual product. So that's a fairly straightforward transaction. In a complex financial transaction, where you are going to require a system, where more than one party is in where you're going to require a system where more than one party is involved in that economic timeline. And you might involve a more complicated network of blockchain structures. So if you make some goods over here, and you want to send them to the shop, they go through the blockchain. And somewhere in there, there's a financial transaction. The shop is buying something from the supplier. Now the goods are here at the shop, and along comes the customer, and likes the goods and wants to buy them, and that creates another transaction through the blockchain. So you've got more than one person involved, more than one bank, more than one situation going on in this financial timeline. Because before the goods got to the supplier, they will have had other distribution networks down here. So in a more complex financial timeline, you need a more complex setup with the blockchain and infrastructure for the Quantum Financial System. Plus, the Quantum Financial System is now a decentralized system. So everything is not being held in one central location like it used to be. Now all the data from all of these transactions and all the people involved, it's being held in a decentralized way. So rather than it going to one place, it's now going to a network of places, it's becoming decentralized, not one person holds the data.”

So I just wanted to **confirm with them that their definition of the Quantum Financial System, that it's going to be a worldwide virtual central vault.**

And they said “Yes.”

And I said to them, **“Where does military strategy fit into the operation of this worldwide central vault, the QFS?”**

And they said to me “The military oversee the security of the Starlink connectivity worldwide. The military are more involved with the security of the hardware and the programming of the software to maintain world peace and to keep the infrastructure working effectively.”

So the military are more concerned about keeping that structure safe so that all these transactions can continue. Because if for instance, there was an attack on the infrastructure, that would obviously disrupt all of those transactions that we've just been talking about.

So then I said, **“Can you help me to understand the components of the Quantum Financial System starting with the blockchain? So what is blockchain? And is it part of the Quantum Financial System?”**

And they said that “The blockchain is an integral part of the Quantum Financial System. It is a system of backstops, checks and balances, where all the transactions pass through, and are then issued a unique ID or transaction code. The code is visible to all. And this code being visible to all prevents fraudulent transactions like money laundering and child trafficking.”

So if we go back to our simple transaction, we've got some goods here, say in a digital format, and this person has seized it as a high value to them, and they want to buy it using a non-fungible token. So as they make the transaction to the seller, it goes through the blockchain, and if you think of it like a track with a block in it, like a window in it, the information goes through the block, and as it's going through the block, the block is making an ID for that transaction, which is visible for everyone to see. Nothing can be hidden. Everybody knows that that transaction has occurred. It'll be on an open source platform, if that's my understanding.

Open source means that everybody can see it. I'm not explaining this correctly, and anybody is listening that understands blockchain, and what I'm talking about, please, I welcome your comments below, because I'm learning as I go. So then I wanted to know, does this ID code disclose what you've actually bought? So as the transaction goes through the block, and it creates this ID, which is visible to everybody, it could be a bit concerning if everybody could see exactly what it was you bought, the actual item.

I said, **“Isn't that like a privacy issue?”** You wouldn't really want everybody knowing exactly what that item was on the open source network. So I asked them to **“Explain that to me.”**

They said to me, “The transaction ID is the only information that the people on the open source network can see. So they can see the ID of the transaction. The details behind that ID, i.e. what you actually bought, will be on your private ledger or wallet”

So as it goes through the blockchain, as you're here, and here's your item, you send your financial transaction through the blockchain,

it gives you an ID, but it doesn't say exactly what it was. The item that it was will then go to your ledger, which is in a decentralized place on your phone or your laptop or wherever it's stored, and it will say in your ledger what it was you actually bought.

So if you bought a piece of artwork that had value to you, it will say in your ledger that you bought a piece of artwork. If you bought a trump card, which was recently for sale, it would probably say in your ledger that you bought a trump card, but on the open source network it would just show an ID number for that transaction. And your ledger in your wallet is going to be a bit like a bank statement, so it's not much different to what you have now. It will look exactly the same, but in the ledger it will come with a lot more metadata.

So then I said to them, **“So if the transaction ID, so the ID that you get as your money goes through the blockchain, if it does not reveal the description of the goods or the services that you bought, then how is it going to stop child trafficking, black money, etc. Can they explain that to me?”**

And they said “The transactions as they go through will be assigned like a generic code on the blockchain. And they gave me example. So for example, if you're going to be buying food, then you'll have a generic ID. So let's say that the generic ID for food was say number 21, just for an example. So the issue in ID 21 and then a lot of other code next to it, but the 21 generically means that you were buying food. The food itself will also have been allocated a unique ID at source.”

So each item of food that you bought, before it got to the store, it was also given its own unique ID. And as that food moved along its own financial timeline to get to the store, then the ID for each item will have been stored on the blockchain. So here you are with all your pieces of at the supplier is all the foods. They all get shipped over to the store. And then they all have their own unique ID. So the bread has an ID, the potatoes has an ID, etc., etc. You get to the store, you come along, you make your transaction at the store, that produces one ID, which says that you went and bought food. But each of those foods also have their own unique ID. And the system knows. And this ID that the each food source has of its own shows the network where the food was grown, where it was shipped from, where it was delivered to. And these are just examples of what the IDs can do. And then it will all be shown on the open source network as a basic ID of 21, because it's food. So all the IDs that we use to get the goods to the store will be somewhere over here in the blockchain. But when you make the transaction to buy that food, it might just say ID 21. And then all the other information, and what's been going on is that food came to the store will be in the rest of that code on the open source network. When you made the purchase, and it just said ID 21, which equals that you bought food, it didn't say what type of food you bought, and it didn't necessarily say where you bought it, that will be shown in your decentralized wallet. So when you open your wallet, you'll see that you went for food and you bought it at Walmart, and you might actually see what you bought.”

So then I said, **“Is there not a potential for the ID code at the beginning of the process chain to be altered? So when all the goods are over here, we're getting ready to go to the suppliers. Could they not be given the wrong code? Like let's say we've got a loaf of bread. Could it not be itemized that it's a loaf of bread and it's actually say a drug? Could be drugs. How do they stop that?”**

And they said “The process along the blockchain will know that it's not food, and it will know that it's drugs by the unique ID. And it will do this by knowing the orientation of the product, and they'll know that the orientation of the product doesn't match with what's being scanned as it passes along the transaction or financial timeline. And the reason it will know is because when you've got your loaf of bread, it's got ingredients in it, it's got flour, which will have an ID, and it's got yeast, which will have an ID, it's got salt, which will have an ID, it's got sugar, which will have an ID. And all those things then curate the loaf of bread. So if they try to then assign that to say a drug, it would not have its blockchain's IDs attached to it for the yeast, the flour, the salt, and the sugar. So the blockchain would know there's something not right there. The ID packets that are assigned to a loaf of bread would be missing, or would be suspect. So they tried to label that as bread, but there wasn't a packet, an ID packet, which said yeast, flour, salt, or sugar. Then as it traveled along the financial timeline, the rest of the blockchain would know it would notice there was something wrong.”

Now, if any of this is not exactly how it's going to happen on the ground, then please contact me and come on to a show with me, because I've just channeled this in a way that I asked them to explain it to me, is simply as they could so that I could explain it to you, that we could all understand it in very basic terms. But I'm open to anybody coming towards me and explaining this in a way that we can all understand. So I looked on the internet for what is blockchain in a simple terms, like what would the internet call a blockchain?

It said “The blockchain is an advanced database mechanism that allows for transparent information sharing within a business network.”

So then I wanted to know **“Why is this Quantum Financial System so important right now?”**

And they said “The Quantum Financial System is very important right now, as many corrupt organizations and people in positions of extraordinary power, were creating a depraved and corrupt financial system of enslavement for humanity. This enslavement goes against citizens, human rights, and their divine free will. And it was time to introduce the new technologies that can then elevate the populace to a new level of living, being, and working. The Quantum Financial System will provide a fairer, more secure framework of conducting financial transactions across the entire world.”

And I said, **“What role did the pandemic play in getting this system into operation?”**

They said that “The pandemic storyline is all part of the psychological training and development of humanity, so that people question everything and allow for safer and fairer systems of work, trading, banking, and governance to be implemented via community consensus or decentralization. The Quantum Financial System is a platform integrated for an integrated structure, allowing for growth and movement of information in a decentralized way. Information will be secured and stored in a decentralized way, meaning that no one organization corrupt or otherwise can hold all our data or information. Data and information will no longer be held in one location.”

Then I asked them, **“What does the Quantum Financial System protect us against?”**

“The Quantum Financial System and the quantum computing network called Starlink is a system of connectivity which protects us from overbearing controlling governance, corrupt officials, hacking, and it will provide freedom of movement across borders whilst allowing the first and accurate apprehension of fugitives, traffickers, money laundering, scams, and all these things will be halted.”

So then I wanted to do like a strategic overview of what the Quantum Financial System looks like. So in strategic management, you do something called a SWOT analysis which stands for Strengths, Weaknesses, Opportunities, and Threats. Now I wanted to ask **“What would a SWOT analysis be like on a Quantum Financial System right now?”**

They said to me “The *Strengths* would be the ability to streamline and secure multiple streams of information including financial, personal, and sensitive information. The *Weaknesses* of the Quantum Financial System at the moment is getting all the components within the structure to align and run smoothly. The *Opportunities* currently available to the Quantum Financial System are that you will have safer financial transactions, you'll have less imposed government bureaucracy, you'll have the growth of strong local communities in trade. World peace will be achieved as all countries will be signed in to the central, financial, virtual, and will not want to risk being shut out of the distribution of the digital assets or the tokens because these tokens that are in the virtual vault are what you're going to use to trade worldwide. So if any of the countries start to not be in their peace, they won't be allowed to have the tokens, the tokens will be stopped. So it's in their interest to stay within the precepts of Nesara, Gesara, and that's how we maintain peace because the trading of the tokens will be stopped if those countries or regions don't abide by the precepts. The *Threats* to the Quantum Financial System are the timescales, going live and the connectivity of all the components in a coherent form. So basically at the moment we're looking, the threats are how long it might take to go live with this connectivity because we're looking at how all the components are going to work together in a coherent way.”

And finally I wanted to ask **“What about the Quantum Financial System from another strategic model called PEST, which stands for Political, Economic, Sociological, and Technological, and do the same thing.”**

“So under *Political* of the Quantum Financial System, the political aspects of it are getting all of the countries signed in. So it sounds

like they've more or less got that completed. They're telling me now that's completed. So those that are going to sign in have signed in. That was step one on the political level. Then the *Economic*, the economics associated with the Quantum Financial System is the costs of transferring all the associated banks onto this tokenized or digital network. So that's one of the strategic areas that they're having to look at. They're from a *Sociological* standpoint. They're having to look at how to explain and train the public on all these moves going forward. How to explain to the public that we're going to have a centralized virtual vault and then their money is going to be reflected back to them in a tokenized form. And then the *Technological* aspects of the strategy are that they're tying together. It is that they need to tie together all these components in a coherent way.”

So I hope that's been really helpful for you today. That was actually quite hard for me to explain and I'd be happy to explain it again. I would even be happy to do it live if that's what people want. Just let me know in the comments below. We can go onto a live and you can ask me the parts that you didn't understand might involve a whiteboard or a flip chart or something if we do it live.

So please let me know. And again, if you're somebody involved in the blockchain and the quantum financial structure and you want to perhaps speak to me about these things in a way that we can explain it better to the public then please again email me. You can find my email on my website which is at www.goldenheavenonearth.net

I hope you've really enjoyed this update today and I look forward to seeing you when I've downloaded some more information about some other aspects of the Quantum Financial System. Have a lovely day and bye for now.

Is Oprah a White Hat - Military world-wide peace plan

<https://rumble.com/v2us15e-oprah-president-usa-white-hat-military-world-wide-peace-plan.html>

41m mid 2023

The White Hat military plan to take back control for the people... has been secretly underpinning political strategy for over 25 years.

I've got a lot of really nice information today regarding Trump, Oprah Winfrey, the elections of 2024 and lots more. And so it's a question and answer session that I've channeled. So I'll just get started and I hope that you really like it. So the first thing that I wanted to look at was everything around Donald Trump and the 2024 elections and you know everybody as we're running up to that.

So I first of all I asked about the indictment of President Trump and I wanted to know **"Is it a Black Hat led operation?"**

And they said to me "The indictment of Donald Trump is the Black Hats creating the storm. But this will back fire as eventually the wrongdoings of the Biden crime family will also have to be examined."

And I said **"So what will all this look like going forward? I suspect the elections in the USA in 2024."**

They said to me "The elections will run, but the lineup may be different to what people expect or even want." [This idea shifts moving forward in time.]

So I said, **"Will Trump be in that lineup?"**

And at this time, it is unlikely that Trump will be in the final lineup for the election for 2024. But this is actually the intention. Trump is a sting operation to bring the dark players out into the open.

So I asked them again **"Is Trump not supposed to be the president, because he's a sting and is he a sting in order to dismantle the old two party system and what will be created in its place?"**

And they said to me "Trump was sent as a sting operation, essentially to weed out the bad players and to dismantle the divergent narratives caused by a two party system. The new system will be devolved and it will not require all the layers of bureaucracy. It will use the quantum computing satellite infrastructure, and it will be overseen by the military guardians."

So then I said, **"Do we have a potential lineup yet for the 2024 election?"**

They said "It is still being decided and strategized."

And I said, **"Will Robert Kennedy, Jr. make it to the 2024 elections and beyond?"**

They said, "Yes, he will, but he may step back politically due to health problems. He is working with Trump and the whole White Hats to bring a narrative back to the center to bring the narrative back to the center ground. And then they can put the new set up into place."

So then I asked them, **"How is Robert F Kennedy, Jr. going to how is he doing in his campaign for 2024?"**

"It is not necessarily intended for him to win the presidency. It's more that in his campaign, he can expose more truths surrounding the Kennedys and corruption, etc."

I asked them again, **"What is this New Setup that they continuously tell us about, the one where we won't have two parties?"**

They said "It's going to be a devolved voting system using advanced software on the styling structure, and it will be overseen by the military guardians."

I said to them, **"Are the military guardians specifically trained for the new devolved voting system. And do they also oversee private organizations contracted to work with the military for software development of the web five web seven above?"**

They said to me that the military guardians will be trained in all aspects of modern warfare, which is different in nature, as we move into *The Logical Age*, *The Age of Love*, or some people understand it as *The Golden Age*.

I said also **“Will the military guardians work with private organizations who are contracted to do the software for the Starlink?”**

And they said, “Yes, the military guardians will be trained in all aspects of nonkinetic warfare. The military guardians are being recruited worldwide, not just in the USA, and they're being recruited by all the other space force regions. So in different parts of the world it might not be called space force as I said in my previous videos, but it will be that type of organization, and they're all recruiting their military guardians in each location. This is a worldwide White Hat military operation to secure peace within all countries and all regions. Once set up, then the full package of benefits can be disseminated to the people. And they said, for example, all the quantum benefits of quantum finance, which will be tokenization and digital money, redistribution of wealth from the quantum virtual vault, quantum voting, quantum internet, and quantum transport, for example, like flying cars, Maglev and intercontinental systems and the quantum border, which will mean open borders. So you won't need people like the border force, which I understand in the USA is called the TSA.”

I asked them, **“Is Elon Musk a Democrat or a Republican?”**

They said to me “Elon Musk is apolitical, and he is helping to bring the narrative back to the center ground also. And he is voicing support for Donald Trump at this time, during the indictment, as he believes in a democratic fair and just system going forward.”

I said, **“Will any of the future leaders of the Golden Age, will they be female?”**

And they said “It is intended that there will be a strong female presence to balance the outdated imbalances of male female energies. You could see a female in North Korea, but not until 2028, which is when they've told me the new system will start coming in. And they've also said you might see a female leader in South Korea by 2032.”

And I said, **“Will there be an American female leader?”**

And they said, “This is the current plan.”

In fact, I actually said, **“Will there be American female leadership, which might be more than one.”** And they said, “This is the current plan.”

I asked them about Caroline Kennedy. Now Caroline Kennedy is the daughter of John F. Kennedy. And I said to them, **“Will she change roles from the US ambassador to Australia and will she move towards center ground?”**

And they said to me that “A powerhouse of women is being assembled to help lead America, the USA in the New Setup.

And they gave me some and I suggested some names. **Carrie Lake**, they said, “Yes, **Marjorie Taylor Green**. They said, “Not so much with her because she's got other plans. **Candice Owens**, who said “Yes.” **Kayleigh McAnamy**, she was the White House press secretary to President Trump and then **Marianne Williamson**, who is a spiritual teacher and writer. And then we have got two interesting ones. We have got **Oprah Winfrey**. They said, “Yes.” And **Lady Gaga**. They said for Lady Gaga, “she will be involved in that she currently has an administrative role, but that will become a bigger role.” And she's been in capital letters, much bigger. She's going to take a much bigger role.

So I wanted to look at the Oprah Winfrey information because I've been getting a lot about Oprah Winfrey recently. And as I've been saying before, a lot of people that you have thought were working for the dark players. There's going to be a twist to that storyline. And I've been seeing Oprah Winfrey quite strongly now coming forward. So I said to them, “Will Oprah Winfrey be running for office?” They said, “Yes.”

I said, **“Will she replace Diane Feinstein as the California senator?”** They said, “No. It is intended that she will take a much larger political role as we move into the New Setup.”

And I said, **“What will this new role look like? And is it a White Hat role?”** And they said, “Yes, Oprah Winfrey has been a White Hat sting operation to draw out all the bad players, especially around the child trafficking and abuse.” And they reminded me that back in 1985, she appeared in *The color purple*, the film, the color purple. Now the color purple, which is based on a 1982 novel by Alice Walker, centers on a black southern woman in the early 20th century called Seeley, who is abused by her father and husband. And Oprah Winfrey plays the part of Seeley.

So I said to them, **“But Oprah Winfrey has been seen like socializing with these high profile sex offenders.** And they said, “but Oprah herself has spoken of her own abuse when she was younger, and is an advocate for children and abuse to work for the White Hats to pull out these dark, deep dark players in the adrenochrome and child trafficking sectors.”

And I said, **“So we'll, Oprah Winfrey run for president of the USA. And it's, it is intended that Oprah Winfrey will run alongside Marianne Williamson?”** Now Marianne Williamson, as I've said before, is a spiritual teacher and writer. And she has recently in the political scene.

They're saying that “Marianne Williamson is an American author and political candidate. She studied theatre and philosophy. She started her professional career as a spiritual leader for the Church of Today, a unity church in Warren, Michigan.”

So what they're saying is that “It looks like Marianne Williamson will be running and alongside her will be running Oprah Winfrey. It is likely there will be success if these two work alongside each other.” So they're not saying necessarily they're going to work together. They said “The roles of the Democrat and Republican will go in the New Setup.” So they repeated that again. And they said that “People will vote for policy and not people.” So let me add a date here that Oprah will run for the next election. And it makes it sound like it's 2024. But I'm wondering if it might be a bit later than that. So we might start seeing her more active before 2024. And the overall strategy is to bring her in for the New Setup, which in I feel will be beyond 2024 and not necessarily just around the election of 2024.

And then the last question was from Leskey recently said that the Supreme Court justices Amy Conan Barrett, Brett Kavanaugh and John Roberts had overturned the election of 2020 in favor of President Donald Trump.

And I asked them **“Is it the truth?”**

They said, “Yes, these Supreme Court justice justices have done that.”

And because Phil had said that these justices now need military protection, and that John Roberts actually needs NATO protection. They said “They all have high level secret service military protection.”

And then back to Oprah. I have been informed that she has recently been seen out and about. And she is surrounded by secret service as well. So this would make sense that she's a White Hat. Otherwise, why would she need secret service when she goes out. I also have information that when Lady Gaga was making her video and the video was called *Rescue 911*, in which there was an angel.

Now somebody that has been in touch with me said they were actually on that video, and that Lady Gaga was very much herself that their friends with her. And that was back in, I think, early 2021. And again, some of these stories that we've been told around some of the Hollywood people has been a distraction, while they allow them to keep pulling out the dark players.

But then I went back to Marjorie Taylor green. And I said **“She hasn't been coming up as a ‘yes’ when I ask about her being a candidate in 2024. And then going forward.”** And I said **“Why is that?”**

And they said “Marjorie Taylor green may decide to step down from politics to pursue some interests.”

So I feel like she's going to give her support for now, but that her long term vision is different. Maybe she'll be part of the New Setup in a different way.

I then asked, **“Is Oprah Winfrey working with Candace Owens as a mentor?”** because I keep seeing Candace Owens is going to be stuck part of this new female setup as well in the future. And they said, “Oprah isn't working with her yet, but these two are likely

to align in the future on significant projects to push forward with the New Setup.”

So surrounding the indictment of Donald Trump, I asked **“Did Biden tell the DOJ Department of Justice to press these charges against Donald Trump?”**

And they said “No, but this was all orchestrated long ago to open up a debate across all political parties to see how leaders may or may not have been carrying out illegal activities. The Trump indictment now sets up a precedent for other political leaders to have their taxes, their personal relationships, and their business dealings to be scrutinized in a public forum. And later, this could lead to the examination of the Biden family, the Clintons, the Obama's and many others.”

And then I said to them, **“Will we see in office Caroline Kennedy the daughter of JFK of John F Kennedy?”** and they said, “Yes.”

I said, **“Will we see Robert F Kennedy the brother of John F Kennedy in office?”**

They said, “Yes.”

When I said, **“Would we see John F Kennedy junior in office?”** I got a “No.”

I asked again. **“So Robert Kennedy junior is not supposed to actually run for president. He is just here to bring truths out during the election campaign and the run up?”**

And they said, “Yes. Robert Kennedy junior is unlikely to be president in the New Setup and the strategy is that he can pull out truths and bring narratives back to the center, using his campaign. And it's a way for people to start understanding that all these people can work together on both sides of the current political spectrum and this is the beginnings of a stellar White Hat lineup across all parties.”

So I did talk about this in detail in my last video, which was called the *White Hat checkmate. Trump / Kennedy powerhouse*. So you might want to go back and watch that again. So you've listened to this video.

I recently heard Donald Trump saying that the indictment and the court cases that are currently running, he said they should be deemed as election interference.

I said, **“Is this a possible avenue that can be successfully explored?”**

And they said, “Yes, the indictments are to stall the president from his election campaign and this is all a ruse as president Trump intends to support the new White Hat political setup going forward, which is going to collapse the two party system and create a billion individual voting systems by devolving decisions to the people through quantum voting.”

And I said **“This quantum voting, are we still on a timeline for this to happen between 2024 and 2027 and for this to be like publicly available to us?”**

And they said “It is currently estimated that the rollout of the devolved voting will be around 2026 to 2027.

And then I said **“The election of 2024 in the USA, is this still like just like a holding pattern then, like setting up a façade until this new technology and the military guardians are ready to roll out the full system between 2026 and 2027?”**

“There's a lot going on with developing software that can't be hacked in the background and the military are working with many organizations and private companies worldwide to secure this multi layered secure network to keep all quantum operations safe.”

Just going back again to Oprah Winfrey I did ask them again.

“Why did Oprah Winfrey recently visit some public places, one being a restaurant, accompanied by secret service?”

And then again “Oprah Winfrey has been a big player for the White Hats. She's been gathering intel against those involved with child trafficking and extortion. And she wants to run for a rolling government in the New Setup. And it is likely that Oprah Winfrey and Candice Owens will team up to make a White Hat powerhouse going forward. And Marianne Williamson also will be a strong contender going forward. These ladies will support her.”

So what they mean there is that when Oprah Winfrey and Candice Owens will support Marianne Williamson. This they are saying “They are all part of the new Truth Social Movement and Gaga will also play a major role and has been working as a White Hat for quite some time gathering Intel.”

I then said, “Will President Trump be reinstated as president of 2020 in retrospect?”

And they said, “Yes he will be, and it will all be sorted out for the history books, and the legacy of America going forward.”

So now moving into the military's questions.

I said **“Is the strategy by the White Hats to still do military operations behind the scenes or boots on the ground?”**

And they said “Boots on the ground is not intended. But using the Startink infrastructure overseen by the military, i.e. the Space Force, it is intended to be the way forward in the future for all military protection and warfare.”

And I said **“Warfare? Aren't we moving away from the concept of war?”**

And they said “Absolutely. They said everyone is signing into the new military satellite software system. So I've spoken about this many times, all the countries are signing into a set of protocols so that we can run the world in a peaceful way using the Starlink infrastructure. And they said we have to overcome the issues surrounding the military industrial complex.”

“How do we manage loyalties to the New Setup?”

They said “The military industrial complex, we're all but cease to exist going forward. And the surrounding defense is moving away from initiating war, thus decreasing needs for military arsenal in the way it has been used to date. The starting worldwide structure will be implemented in such a way that no country will want to not comply with its precepts of peace to citizens. The New Setup system has the capacity to shut whole countries out of internet banking and communications. So every country will want to be part of this inclusive system. They said corporations involved in selling military equipment will no longer be able to lobby the military under the new system. The new system will maintain peace by simply switching off countries who don't abide by the peace treaties. Space force will oversee the peace treaties and the military guardians will operate the system. The guardians of the star link will be highly trained.”

So then I asked, **“Is there going to be a military takeover?”**

And they said, “No, it's that the military have control in the background and are fulfilling their humanitarian role to protect We the People. They do not intend to take over any control or region. It is not part of their remit now or going forward.”

I said, **“Will they need to provide boots on the ground under the White Hat military plan?”**

And they said, “No, it is not intended that the military will have boots on the ground during the unveiling of the White Hat military plan.”

And I said, **“What is the White Hat military plan?”**

They said that “The White Hat military plan has been devised to bring a peace plan to the world without the need of coercion or violence. The plan is for all countries to participate in this peace plan, using ultra sophisticated technology to oversee the function of international surveillance to keep nations safe.”

And I said **“Surveillance?, Surveillance of what exactly?”**

And they said “Surveillance of potential military threats, arising and using the strategic peace plan to prevent them either beginning or escalating.”

I said to them, **“Is this the Starlink infrastructure, the satellites and the supreme software development that will be used for the peace plan?”**

And they said, “Yes, we will be using the Starlink infrastructure, the satellites and supreme software, plus highly trained military personnel and AI.”

To what level is this supreme software currently developed? Is it still at web 5, web 7?” and they said, “Yes. But other versions will be following in the background called web 9-12 and web 15, 17, for example.”

And I said, **“What do the version numbers refer to? Is it anything important?”**

And they said that ”The version numbers, for example, web 5, 7, web 912, web 15, 17, they said the version numbers and their numerology are related to military code. And all numbers are significant in military code.”

So I think we need somebody like Derek Johnson here or somebody who's well versed in military code to see if those numbers, in their opinion, mean anything.

I said **“To what extent is the development of these infrastructures and the software White Hat controlled?”**

They said “It's 100% White Hat controlled and anything outside of regulations or protocols is immediately detectable and shut down.”

I said to them, **“What are the worldwide White Hat military currently working on?”**

And they said to me “They currently, they are vetting and sourcing private independent organizations, personnel and market leaders in AI programming, cybersecurity, analytics, and logistics, like quantum analytics, and logistics.”

And I said, **“What is the difference between normal analytics and logistics, and quantum analytics and logistics?”**

And they said that “Quantum logistics has many more complex variabilities. To some extent, once it's programmed, it is unable to be changed or amended. It is impossible to delete it. So it needs highly skilled operators to oversee its inception, its development, and its maintenance at each stage.”

And I said, **“Is there a threat from any country or region who want to sabotage this military system?”**

And they said, “Not at this time. All leaders around the world can see the benefits at this time to creating a worldwide system for peace, for world banking, communications, and internet.”

And I said, **“Are non-kinetic attacks a possibility though? And exactly what is a non-kinetic attack?”**

And they said a non-kinetic attack is something like a frequency attack, whereas a kinetic attack is a direct force, like maybe a missile or a weapon, but a non-kinetic attack is a frequency or its disruption to say information.

And I said, **“So how does a frequency cause an attack?”**

And they said “It can disable a satellite and its communications, for example, by harming the infrastructure.”

And I said, **“Has this been happening?”**

And they said “It has been tried, but if you destroy one unit within the Starlink infrastructure, the rest of the system will reboot to take up the slack.”

So I said, **“So kinetic and non-kinetic attacks are a possibility?”**

And they said “In theory yes, but the people capable of running the equipment to create that interruption to the system are all currently on board with the worldwide peace plan.”

I said to them, **“To what extent are the Black Hats wielding a power in the military at this time?”**

And they said “It's negligible, and that it's quickly found if they're in operation, because surveillance of the military and government and three-letter organisations is now very advanced and successful. And they gave an example of the NSA. They've got a very sophisticated surveillance system already in place. So any negligible Black Hats that are still trying to wield power within this system are quickly identified and brought out.”

I said, **“Are people in the military and the previously mentioned organizations posing in certain roles good or bad to create a sting operation?”**

And they said, “Yes. Basically people in the government, the military and the three-letter organisations are working in roles pretending to be good or bad to create sting operations.”

So then I said, **“So are we saying that future warfare could be kinetic or non-kinetic?”**

And they said that “In the future the new White Hat peace plan will render war practices obsolete. But if any risks still prevail they would be non-kinetic. So for example, they would be EMP, digital warfare or frequency warfare.”

And I understand that EMP stands for Electrical Magnetic Pulse.

And then I wanted to look at the nanotech. I wanted to ask them if there's any nanotech in say the vaccines or foods, waters or medicines, as we've been told that there is.

I said, **“Can the new quantum structure use this tech to direct healing, for example, Tesla healing, a Tesla healing frequency to heal people? So could it basically, the new quantum structure, interact with this nanotech that's already in most of our systems to create a healing?”**

And they said, “Yes. This is the intention of freedom cities to harness the good in all things, to support the citizens to their full capacity in their health, their finances, their freedom, their education, their nutrition, their water, and alternative healing, transport which is safe and clean, and obviously devolved decision making. And again, they referred us to the organization called Quantum.gov, where a lot of this is being set up.”

I wanted to know **“When did the 17th letter of the alphabet come into existence?”**

And they said to me that “Lincoln and Kennedy had started the foundations of a White Hat military plan to take back control for the people. This plan was then put fully into action after the [Twin Towers](#) and it has been secretly underpinning political strategy for over 25 years.”

So this White Hat plan has been in the background running for over 25 years.

So then finally, I wanted to look all around the Truth Social Movement and how that's progressing alongside the X app, which is Elon Musk's social network, which I predicted some time ago now. I think it was back last year around March or April I said that Musk could be bringing in a new social media network different to Twitter. And he's now incorporated that new X app, which is the internet of everything.

So I wanted to look at Tucker Carlson.

I said, **“Is Tucker Carlson going to be the lead for the Truth Social Movement?”**

And they said, “Yes.”

And I said, **“Does Truth Social Movement equate to We the People?”**

They said, “Absolutely!”

And I said, **“Is this new movement the reason that Musk has been creating this new social network called the X everything app?”**

And they said, “Yes, the X app will work alongside the Truth Social Movement to create reforms to social commentary and free

speech.”

Trump's friend billionaire Trump donor, Jeff Zucker, who is a billionaire and a friend of Donald Trump has taken over CNN recently. This was back in February, 22.

And I said, **“Is Trump's friend who did the CNN takeover going to be part of the Truth Social Movement?”**

They said, “Absolutely. Big organizational and policy changes are being currently developed within CNN. And future reporting will need to be more transparent under the law, because new laws are coming for social media and news broadcasters. And the people will be able to vote in the future for how they see and hear the news and broadcasting.”

And I wanted to ask about **“What is the censorship industrial complex?”**

They said “The censorship industrial complex is where private organizations are able to lobby and pay for what aspects of information can be deemed misinformation. They can literally lobby to change the trajectory of indisputable evidence and facts. But under the new quantum media, for example, the Truth Social Movement and the X app, which is the everything app, this type of censorship by the industrial complex will be stopped and monitored. There will be new governance around standards of public information and educational information that is available to the consumer.”

So I hope you've really enjoyed that update today. If you want to see the evidence to a lot of these things I've been talking about, particularly around the Starlink development, the recruitment of the guardians and the governance that's being set up in order to get these organizations and countries all onto the same playing field with the Starlink peace plan, then go to my locals.com channel. You'll be able to find all these videos that I do, plus all the background information that I'm finding where we can see that they are setting up these systems and these personnel.

So I hope you've really enjoyed everything and I hope to see you all next time.

Thank you very much for watching. Bye for now.

Elon Musk to take presidential role?"

Oct 2023

<https://rumble.com/v3lhjt1-elon-musk-to-take-presidential-role.html>

I believe that Truth Social is the greatest and hottest form system and platform of communication in America and indeed the world today.

—Donald J. Trump

Hello everyone. I've got some very interesting topics for you today that I've been working on. Sorry that this video is a little bit delayed but I had a family bereavement which has meant that I've had to be dealing with that for the last couple of weeks. So this video is a little bit late in coming out so I apologies for that now. But today I'm going to be talking about Elon Musk and is he going to have a presidential role going forward? The 2024 elections. I'm going to be looking at Truth Social and the Peace Broadcast System, Ron DeSantis and where he is at the moment and where he might be headed in the future. The We the People movement. I'm going to be looking at Hollywood and Oprah Winfrey. The UK government, China and BRICS. And I'm going to be looking at the National Security Agency, the NSA and social media platforms like Facebook. And finally I'm going to be looking at the BRICS and the Quantum Virtual Vault and a meeting that I clearly saw happening in the Arctic last week. So there's quite a lot to get through today. So I hope that you're going to enjoy it.

So the first issue or the first point that I've been looking at is around a post that Donald Trump made on the Truth Social platform. And on this announcement, he said that "I believe that Truth Social is the greatest and hottest form system and platform of communication in America and indeed the world today. And that's why I use it. And there is nothing that comes even close."

So when I looked at that initially, I looked at the words hottest form and I saw hot test. And so it got me thinking about what this message might mean. So I wanted to channel it.

So I asked my team, **"Is this a coded message in this statement and what is the coded message?"**

So what they said to me is that this is a statement implying that Truth Social is being tested to run worldwide for the Truth Social worldwide movement."

And I said, **"What is it being tested for?"**

And they said that this platform runs on a system which is digital and analog and can run even when the normal digital networks fail."

And I said to them, **"So do you mean it has military parameters of communication ability?"**

And they said, "Yes, it does."

So then I said to them, **"What is the reason for Truth Social having military backup in its processing capabilities?"**

And they said that Truth Social is the preferred platform, logo, parameters, system and form that the military currently want to be able to run a worldwide broadcast if need be. I don't know what all those words mean like logo, parameters, system and form. So if anybody knows what they might mean, please message me below."

So I said, **"But Truth Social is only known in the USA or is only in the USA."**

And they said "It is only known as Truth Social in the USA. But the capabilities of Truth Social are mirrored worldwide in other military communications programs."

And they reminded me of the Mars project, which is the communications platform for the military, which I mentioned probably about a year ago now on one of the Nick Veniamin interviews, where I talked about Elon Musk always mentioning Mars."

And I asked **"When he talks about Mars, does he mean the planet Mars or does he mean the Military Auxiliary Radio System, which is M-A-R-S Mars?"**

So in this context, they're saying "The Truth Social platform has capabilities which are mirrored worldwide. And they're mirrored in other military communication programs like the MARS program, which is this one, the Military Auxiliary Radio System."

So then I said, **"Will the Truth Social set up be used for some sort of worldwide broadcast?"**

And they said, "Yes."

And I said, **"Is this the broadcast of disclosure?"**

And they said "No."

And I said, **"What is the broadcast intended to do?"**

And they said to me "The Truth Social broadcast is intended to calm people in the event of any panic or unrest when the systems switch over."

And I said, **"What systems?"**

And they said, "When all current systems get switched over to the quantum system."

And I said, **"Do you mean for the banking?"**

And they said "Partly, but it's more concerned with when the systems switch to the quantum worldwide system for the military."

And I said, **“Haven’t they already been like set up for the switch?”**

And they said, “Yes.”

And I said, **“So what aspects have already been set up?”**

And they said “The infrastructure has already been set up, the regulations, the operations and the procedures.”

So I said **“To what what is still outstanding?”**

And they said, the switch to the public.”

And I said, **“What aspects will be switched to the public?”**

And they said, “Banking, communications, internet, which is web five, web seven, and voting in 2026 and 2027.”

So I said to them, **“So the Truth Social app and the platform, it's a military platform and app?”**

And they said, “Yes.”

And I said, **“So is it set up differently to other social media apps or platforms?”**

And they said “Very much so. They said it has a web five, seven cybersecurity and layers of protection worldwide. It is programmed in analog. And in some areas, it also runs on an analog system.”

So I said, **“What is an analog system?”**

And they said “An analog system is where if there's a power outage, or there's some sort of outside interference, like to the system running generally, then they can still run it manually.”

And I said, **“So are you saying that the Truth Social platform can do this?”**

And they said, “Yes.”

So then I said, **“So when Trump said that this is a hot test form, what's he sending the order to do a live test?”**

And they said, “Yes.”

And I said, **“What was the test exactly?”**

And they said “To check its capability and to stand by.”

And I said, **“What was the stand by referring to?”**

And they said “The standby was referring to each location like North South Eastern West. And they're saying that each location is primed and ready. It's primed and ready now to release a broadcast. If such a need arises, it said the systems are tested and they are ready for the public.”

And I said, **“Did the public directly or indirectly observe or witness this testing this hot test?”**

And they said, “No, because it was at military levels of clearance only.”

And then I said, “Is Elon Musk involved in this Truth Social broadcast system?”

And they said, “Not directly. But they said the starlings of the sorry, they said the satellites are Starlink are part of the Truth Social military broadcast system.”

So then I said, **“So are we saying that Truth Social is a military broadcasting system?”**

And they said, “Yes.”

And I said, **“So why are we creating a social media app for military broadcasts?”**

And they said, “It's not for military broadcasts, it's just military infrastructure, which will support Delta in the space operations command. So a few weeks ago, I did a video called worldwide military peace plan. And in there, I talked extensively about the cyber operations at space operations command, which are called Delta. And what they're now saying to me is that Truth Social is part of their broadcasting system in the event that they need to put out communications to the public. And I then wanted to just reiterate again, **“So what is the Truth Social Movement?”**

And they said to me “The definition of the Truth Social Movement is that it's a group of people who are advocates for a new, devolved and decentralized system of voting and governance with freedom of speech. It's a movement and an infrastructure overseen by the military space force.”

So the next subject on the chat was Elon Musk, and whether he was going to take a presidential type role in the future. And I have looked at this before. I have looked at **whether he's going to run for president.**

And they said, “No.”

So, but I am getting a feeling he is going to be running for some significant role in the future. And I don't know if in the New Setup, that might be what it's going to be. So I wanted to have a little look.

So I said, **“Will Elon Musk run for a presidential type role in 2024?”**

And they said, “No, he will not run for this type of post in 2024, the 2024 election. But he will be a prominent figure going forward into the New Setup.”

And I said, **“The new military setup?”**

And they said, “Yes, the new military setup.”

And I wanted to ask what will be his role in this new military setup and how is the New Setup going to look for its members who are not military personnel? So obviously, when we've talked about this before, we know that the Delta space force is putting together some infrastructure so that we can run the new devolve setup, We the People can then vote for the things that we want going forward.

I wanted to know **“If the players within that setup that aren't military, how will that look for them? How would that operate? And so if Musk was to run for that type of role, how would that look?”**

And they said to me “People in the future will be voting for policy and not for people, and that Musk will be a designated overseer of the system, which runs cyber operations, possibly worldwide currency operations, social media and banking.”

And I said, well, **“That sounds like a big role.”**

And they said, “Musk will have a large prominent role in the New Setup.”

And I said, **“Is this going to be a White Hat setup?”**

And they said, “Yes.”

And I said, **“Is it going to be a military setup?”**

And they said, from the security aspects of it, like the cybersecurity, yes, it will be a military setup. Essentially the new system will be driven by We the People.”

And I said, **“So is this New Setup due in 2024?”**

And they said, “No.”

I said, **“Is it due in 2026-27?”**

And they said, “It is anticipated that it will begin in 2026-27.”

And I said, **“So we must cover, a title like president or something similar.”**

And they said, “Musk will have a unique role going forward, not president, or not president of the USA. But he will be elected for his policies by the people.”

And I said, **“Will this be in a public role? Or will it be part of his x.com?”**

And they said, “It will be both.”

So I said, **“Can you explain that?”**

And they said that “Musk and Dorsey will be prominent leaders for free speech. And the development of tech that allows for autonomy and for management by We the People.”

And so I asked them, **“So will their roles be around x.com or associated with social media platforms, like say, YouTube or Facebook, for example?”**

And they said, “Yes, they will be the face of a changing landscape in social media.”

And I said, **“What about Google and Microsoft?”**

And they said, those platforms will be restructured. And all policies will be overhauled.”

And they said, “This will happen quite shortly after the social media networks and platforms merge and are cleaned up.”

And I said, **“The social networks are going to merge?”**

And they said, “Yes, it is intended that YouTube, Facebook, and maybe Twitch and some others are all going to merge under the Truth Social Movement.”

And I said, **“Will this mean that they're going under the x.com structure?”**

So they said, “In some cases, yes. But in other cases, they will be cleaned up and restructured in line with the freedom of speech narratives in the Truth Social Movement, which will also go under the Truth Social app. They said that the Truth Social Movement is a project overseen by the military.”

And I said, **“What other roles apps or businesses will Elon Musk be overseeing or working within the future?”**

And they said to me that “Musk will be working closely with President Trump in the future to create the freedom...”

I wanted to look around Ron DeSantis. Ron DeSantis recently removed himself from the presidential run. And I wanted to look at what's going on with him both now and in the future.

I said to them, **“Will DeSantis come back around in some form to lead America?”**

And they said “In the New Setup, DeSantis will be a prominent mentor to the people.”

And they said, he'll be a peacemaker for the New Setup. If they said he's going to be an ambassador for peace, but there will be many.”

And I said, **“So is it possible that the New Setup could begin in earnest before say 2026 27?”**

And they said “It is, unless it is it possible that it could happen in 2024. In current estimations, it is anticipated that the new Truth Social Movement and the new devolved political setup will be available in 2026 2027.”

And I said, **“What is this timeline currently dependent upon?”**

And they said “It's dependent upon the infrastructure within Space Force, their cybersecurity. And it's all part of the worldwide military peace plan,” which I talked about in my previous videos.

So I wanted to just clarify, **“Ron DeSantis, why did he remove himself from the presidential run for 2024?”**

And they said to me that “Ron DeSantis, like Trump, is a sting operation and he was being used as a sting operation to pull out any bad players, and any allegiances to the dark plan. And he is being trained and being made available now for the new military setup, which is Space Force. And as we've just said, that's due to go in the public eye in 2026 to 2027.”

So then I said, **“So when you say military setup, aren't we effectively under military law, like worldwide right now?”**

And they said, “Yes, most countries are currently operating under military law to allow for a smooth continuity of government.”

And I said, **”So are we saying that continuity of government is where no one political party has an established authority or mandate over a country?”**

And they said, “Yes.”

So I said, **“So really in actuality, it's continuity of governance, not government?”**

And they said “Exactly.”

And I said, **“How did this come about?”**

They said, “Most countries have had election interference, and most leaders have been placed in the past through election fraud or tampering. Leaders in positions now are working under military supervision, under military law, while the new cyber system, Delta, is being put into place.”

And I said, **“So running up to 2024, how will it look on the ground where more people suddenly like pull back or pull out like Ron DeSantis has now left the race?”**

“For instance, will Robert Kennedy, Jr. pull out?”

And they said, “He will.”

And I said, **“Will there be others?”**

And they said, “There will be others, like, for instance, Gabby Tolsard, she might stop running or being involved, because she's part of the military setup.”

And in fact, I said, **“Is that because she's going to be part of the new military setup and the strategy?”**

And they said, “Yes.”

So then I said, **“So are we saying that all prominent candidates could drop out?”**

And they said, “Yes, particularly if they are linked to anything to do this new military setup, which we're planning on seeing in 2026, 27.”

So I said, **“Is this to leave Trump in the race?”**

And they said, “No. Trump is not supposed to be president going forward, because the New Setup is now ahead. They said, however, Trump will be given the role in retrospect.

And I said, **“So will election fraud finally give him his rightful title president in retrospect?”**

And they said, “Not exactly. The election fraud does not affect Trump's role as commander-in-chief now or in the future. And his role was to oversee this transition to the new military setup by creating a diversion.”

I wanted to look all around the 2024 election and where the Trump would be on the ballot and whether it would go ahead. And I was given what looks like a couple of scenarios. So I don't think they have an absolute plan yet as to how they want to play it.”

One of the questions I asked, **“First of all, will Trump get taken off the ballot for 2024?”**

And they said, “Actually, that he wouldn't get taken off the ballot. So that was **Scenario A**.

And I said to them, “**So will the election of 24 go ahead?**”

And scenario A is that the election will go ahead so that it can create a diversion whilst they continue setting up the new system in the background. So that was the first scenario.”

And I asked them again, “**Will Trump be on the ballot for 2024?**”

And this time they said in **Scenario B**, at this moment in time, it's not necessary. So I wanted to know what scenario B meant.”

I said the 2024 elections. “**Can you tell me the proposed plan outcome or strategy at this current time? Is it intended that Donald Trump will be on the ballot in 2024?**”

And now they said, “Not at this time.”

And I said, “**What is the reasoning for that?**”

They said that “Donald Trump, President Donald Trump, is going to oversee the next and New Setup for the freedom city movement.”

So I said, “**So how will 2024 look? Will Ron DeSantis be brought back in?**”

And they said, “Not yet, all the main players will be seen to be moving in and then back out as they are setting up the stage for the New Setup of 26 and 27.”

So I said, “**So Ron DeSantis is working with Trump?**”

And they said, “Very much so, they are best friends.”

I said, “**Robert Kennedy, will he get to the 24 election?**”

And they said, “No, he'll be one of the people that's pulled back.”

So I said, “**So who is being put into position for the truth setup, the New Setup?**

They said, “The New Setup will have advisors. And the people will be able to vote for their policies rather than for the people themselves.”

So I said, “**Who are the people that are likely to be in the new lineup, this new arena? Would it be Trump?**” This yes,

I said Musk? Yes, Ron DeSantis? Yes, Tulsi Gabod in the background? Yes, Jack Dorsey in the background? Yes, Oprah Winfrey? Yes, as an advisor, John F. Kennedy Jr. And they said, “No, he will pull back because of bad health. Candice Owens? Yes, she'll be involved. Julian Assange? Yes, McAfee will be in the background and Snowden will also be in the background of the New Setup. So that was **Scenario B**.

So then I asked, again, “**So will the 2024 election run?**”

And they said, at this point, it is not intended that the 2024 election will run in November 2024. They said it may get delayed until 2025.”

I said, “**What would be the cause of a delay?**” So this is **Scenario C**.

And they said “A series of world events will shift the emphasis away from the 24 elections.”

And I said, “**What sort of events might they be?**”

And they said, “There might be many events that could happen close together. You could have a financial event, a weather event, a political event. And all these things will destabilize the election of November of 24. And so the election will be postponed or possibly abandoned.”

And I said, “**So if it's postponed or abandoned, who will be running the entity called the USA? So it will effectively have no We the People leadership and will covertly be managed under military law.**”

And I said, “**Will military personnel be deployed on the streets as a result of this?**”

And they said, "It is not anticipated that this is going to be necessary.”

And I said, “**Will the Truth Social network movement and the app? Is this going to be involved in sort of maintaining the structure and the peace at this time?**”

And they said “All of the above.”

So then I said, “**What else can you tell me at this time in terms of, for example, is Nancy Pelosi? Is she working with Trump on the 2024 situation and beyond?**”

And they said “In the past, Nancy Pelosi has been instrumental in helping President Trump and the New Setup, the new military setup with their strategy.”

And I said, “**In the future, what role is somebody like say Oprah Winfrey going to hold?**”

And they said, “Going forward, Oprah Winfrey and other Hollywood actors, singers and entertainers, they're all stepped forward to be voices for the Truth Social Movement. They said, Oprah Winfrey will act as an ambassador for peace.”

I said, “**At any point in the future, is Trump going to be placed under some sort of like a house arrest?**”

And they said, “Yes, but this is really for his own safety during these times of transition.”

And I said, “**So what are these transition times?**”

And they said “The expected tumultuous times ahead as the old political voting system is dismantled and this new system is put into place and rolled out. That might be why he has to be in sort of a safe position, maybe under house arrest.”

And I said, “**When you say rolled out, does that mean it's going to be like advertised?**”

And they said, “Not exactly. It's going to be implemented in like a piecemeal fashion.”

So I said, “**All the people that Trump is endorsing, will they be considered as part of the New Setup going forward?**”

And they said, “Trump is trying to create a strong team of White Hats, who the public can work with as the new set up starts to be unfolded.”

And I said, “**How will these players that Trump endorses, how would they help with the rollout of the New Setup?**”

And they said “They're going to provide a stable message for people as these people move into voting for policy and not people for unity and not division. They're going to be working towards a one party called We the People movement, where we're going to be voting in a decentralized system.”

And I've talked about this many times before. Then I had a few questions on continuity of government. And I wanted to ask, “**Has continuity of government been enacted in the USA since 2020?**”

And they said, “Not exactly. They said, the whole process was actually dissolved. And in real terms, the military have been running operations worldwide since 2016.”

And I said, “**Has the green light been enacted?**”

We heard about the green lights some time ago. They said that the go, go, go command is still to be delivered. But the green light worldwide was in 2016, when Trump became the president. And in effect, the government was dissolved worldwide in its current form.”

And so then I said, **“So what will provoke the go, go, go command?”**

And they said, “Once the infrastructure is set up within space force, then this command will be given.

And I said, **“What will the command be actioning?”**

And they said, “It will be the sign to switch on the decentralized computer systems worldwide to the masses. These systems are currently only being tested on beta worldwide.”

So then I wanted to know, **“Was the UK government dissolved as part of a corporation?”**

And they said, “Yes.”

And I said, **“What was the purpose and what does it mean for the structure of the UK now?”**

And they said **“The UK corporation was dissolved and replaced by a new leadership set up called continuity of government, the same as the USA.”**

And they said “Most countries and regions are now signing into the new worldwide military peace plan, and that they are dissolving their old governmental structures, legally. And they're doing this in order to sign into the space force. Space force is the military overseer of the new set up going forward. And most leaders and politicians that are seen at this time, are really only playing a role under the military White Hat instructions to hold everything steady until we begin to release the new set up. And this new set up, they said, is going to happen in or around 2026 to 2027.”

And they said, “This is to keep the masses calm the way that there are any things at the moment. And to keep the masses under the illusion that they are still being governed so that we can maintain peace and order amongst the civilians.”

And I said, **“The green light, how's that already been enacted in the UK?”**

And they said “Boris Johnson resigning was the green light in the UK.”

And I said, **“So what did the green light stand for in the UK?”**

They said “The green light was the confirmation that the UK was now moving away from the corporation into continuity of government, whilst being overseen by the military and a military law.”

So I said **“Is the Department of Defense in the UK overseeing this military law and continuity of government?”**

And they actually said, “No, they're not.”

And I said, **“Who is overseeing it?”**

And they said, “It's the Space Force agreements and treaties are the framework for the continuity of government in the UK. They said all countries are signing in and will be operating in a similar way. So they said that in effect, no leaders are truly in control of their countries, if they have now agreed to sign in to the worldwide military peace plan. They said the We the People leading policies going forward will be decided by the citizens of each country, each region, and it will be through decentralized voting. So countries are effectively holding things steady by appearing to be running business as usual.”

So then I asked them, **“Who is leading the operations in the countries who have signed in? Is it their military chiefs of the Space Force divisions?”**

And they said “In some cases, it is a Space Force command operation. But also, it is through dedicated operations to chief military personnel in each location or region where they have already agreed to sign in.”

So I asked them, **“So do the people in government know about this? And are they signed to sort of non-disclosure agreements?”**

They said “Most of the government officials, like the civil service, the military, etc, there are actually unaware of this continuity of government and the protocols that are in place in each region.”

And they said only a few top officials in the military in the government and the security personnel know the aspects of what is occurring around the world with regard to the worldwide military peace plan.”

And they said, a handful will be reporting directly to the top team, which is the Q team.”

And I said, **“What is the difference between military law and continuity of government?”**

And they said, one is concerned with operations of peace on the ground, i.e. military law. And the other is concerned with the day-to-day running of the infrastructure and the operations, which they need in order to maintain stability within a country or region. So for example, the government departments and financial systems and things like that.”

So then I asked, **“Are the USA military, are they waiting on a go-go-go call from Donald Trump?”**

And they said, “At this moment in time, a go-go-go call sign or event is not anticipated. They said a go-go-go command would be relevant if a country were in a state of war.”

And they said, at this moment in time, a military go-go-go command is not anticipated. They said that all strategy is on creating peace and maintaining business as usual, where possible from the White Hat side.”

And I said, **“What about the Black Hat side?”**

They said “The black hats are burying themselves deeper and hiding where possible whilst they're trying to regroup.”

And I said, **“It sounds like they've been hit hard and disbanded?”**

And they said, “To the greater extent, the top players have been halted. But the foundations and the tentacles of the Black Hats goes far and wide and it's an ongoing operation to identify emerging groups and bad players. Eventually, the new quantum cyber systems will lock them out of any power moves.”

So next, I wanted to look at China, which is something that I haven't really sort of ventured into before. I wanted to ask, **“Is China one of the locations which is signing into the worldwide military peace plan?”**

And they said, “Yes, it is.”

And I said, **“To what stage is China at with regard to signing in? And is it a White Hat operation?”**

And they said “China are ahead of other nations with regard to setting up the infrastructure within their region. The diplomatic matters of how they merge into the worldwide military peace plan, though, are ongoing. “

I said, **“Is China a threat to the USA with their technological infrastructure?”**

“At this moment in time, it is a precarious balancing act trying to incorporate some regions into the worldwide military peace plan. China is one of the precarious regions along with Taiwan and Indonesia.”

And I said, **“So how is this being addressed?”**

They said, “The White Hats are continuing to gain momentum within these regions with careful surveillance and assistance from organizations outside their geographical regions.”

And I said, **“So are we saying that in order for the White Hats to maintain a foothold in these regions, they are receiving White Hat assistance through surveillance from other regions of the world?”**

And they said, “Yes, that is exactly the position.”

So I said, **“How far along are China and these regions in adopting White Hat control and infrastructure so that they can join the worldwide military peace plan?”**

They said that “China is about 60% along. Taiwan is about 40% along and Indonesia is about 30% along.”

So I said, **“So is this holding up the rest of the world?”**

They said, “In some cases, it is holding up diplomatic negotiations for the peace treaties, but it is moving forward at a faster pace daily.”

I said, **“So at this stage of moving forward, are China a threat to the world with their technological infrastructure and their space operations?”**

And they said, “Not exactly because the White Hat factions want to join the worldwide peace plan. They said the White Hats are purposefully cleaning house in China of the deep state factions.”

And I said, **“So how far along are they?”**

And they said “65 to 70% in most cases, some regions require more focus than others. Outside surveillance is assisting them.”

I said, **“Is America assisting them with this surveillance?”**

They said, “No.”

And I said, **“Is Russia?”**

And they said, “Yes.”

That was interesting. So talking as surveillance, I then wanted to look at the NSA, the National Security Agency. Now the NSA, which is the National Security Agency, is a national level intelligence agency of the United States Department of Defense.

And I wanted to know **“To what extent they are working with the White Hat plan?”**

And they said to me “The NSA, the National Security Agency of the United States of America, is about 80% White Hat controlled at this time. And that a big cleanup operation is ongoing.”

I said, **“Do the NSA work with the worldwide military peace plan?”**

And they said, in some departments of the NSA, there is a dedicated team who work with each section of space force. The Space Force teams of the NSA are currently 99% White Hats. The other 1% are known and will be systematically removed as and when required. They said that the NSA do play both sides. Essentially, they are acting as spies. And they can be useful for vetting people and they can be useful for security details. But essentially, they are still trying to work out this cleanup in the main parts of the NSA as they only have it 80% controlled at the moment by the White Hats.”

So I wanted to ask **“Is the frequency in the USA. deliberately being held low for some reason?”**

They said to me, it's not being held low, the frequency, in fact, it's the opposite. It's going through many challenges at the moment. That's We the People. But it's to force the civilians or the citizens to go within and to assess why they are feeling uncomfortable. And it's, and so it's designed to get the people to question the government. So it's a reverse psychology operation. And the more events that create stress or uncertainty or even fear, then the more the people will go within to search for answers.”

And it's the going within and the questioning which is going to create awakening and awareness. So it's not that they're deliberately holding the frequency low as such. It's more that they are instigating a set of events and narratives so that people have the opportunity to go inside and decide for themselves what they think about that, which then creates an awakening.”

So then I wanted to look at the other platforms, like the other social media platforms like Facebook, for example.”

And I said, **“Is there any plan for Elon Musk to incorporate any other platforms under the x.com framework?”**

And they said to me “At this moment in time, YouTube may be taken over and managed by Musk going forward. And that Facebook, Google and Microsoft, they're all going to be restructured and rebranded. And they're all going to be aligned with the We the People social movement. It said there's a strong team working inside YouTube currently. He was cleaning up the strategies and streamlining the operations and the personnel.”

And I said, **“We'll face but we split away from Meta.”**

And they said “It is likely in the longer term that Meta will go under the x.com structure.”

So about one or two weeks ago, I had a vision of a Hamid bin Salman. And it looked like a military team sitting with him. And I could see them in the Arctic region having some sort of discreet meeting. And so I wanted to find out what that was all about. It was something different to the BRICS meeting that went on in a different part of the world. I think that happened in Africa. And I could definitely see this meeting with Muhammad bin Salman happening in the Arctic region.”

So I said to them, **“I saw a classified group of leaders in the Arctic region. What is this group? Is it a council? And what and was Muhammad bin Salman? Was he present?”**

And they said, “Yes, he was. And it was a BRICS / military meeting about the quantum financial system.”

I said, **“Was this a secret meeting?”**

They said “Very much so.”

And I said, **”What were they discussing and who else was present?”**

They said “Muhammad bin Salman was heading up a financial strategy meeting, quite separate to the meetings we see around BRICS. And they are classified meetings regarding the new financial structure.

And I said, **“Is this new financial structure, is it the same or is it part of BRICS?”**

And they said, “Not exactly, the meeting was more about the distribution of the digital assets after they have been assessed in the quantum virtual vault.”

So if you I'll put it in the link below the link for the quantum virtual vault, which I've been discussing over on my channel at locals.com.

And I said, **“To what stage are they at with this project?”**

They said “It's highly classified and it will not be disclosed to the public until the New Setup has been organized in the USA, which they've told me before is called the Queen move. The New Setup in Saudi Arabia will be known as the King move. So they're saying that this highly classified project to do with the digital assets and how they're assessed in the quantum virtual vault, and how maybe they're distributed, it won't go ahead until we see the Queen move from the USA and the King move from Saudi Arabia.

This is part of the strategy assigned to go forward. Once the military worldwide peace plan is fully implemented with Space Force, and the necessary peace treaties are signed and fully ratified. So they're saying that we won't see the Queen move from the USA and the King move from Saudi Arabia until everybody is completely signed in to this military worldwide peace plan and that everything is the peace treaties and the protocols assigned.”

So then I asked, **“Who was in attendance? Was it the White Hat military?”**

They said, “Yes.”

I said, **“Was it Q team?”**

And they said, “Only Mohammed bin Salman.”

I said, **“Was there anybody else there? Say for the financial setup?”**

And they said, again, Mohammed bin Salman is taking a lead role. He is the military advisor for this geographical region.”

And I said, **“Is this group related or assigned to the Delta arms of Space Force?”**

And they said, “No, not exactly. This is a financial group, which was discussing future distribution of wealth on the quantum system. It is not directly linked to Space Force. Space Force is only responsible for overseeing cybersecurity and it is not responsible for the financial policy or distribution of wealth in real terms under the New Setup.”

So I said, **“What is the military government tunnel? But I sometimes see which is running up the west side of America. And it goes from, in my visions, it goes from the, from Austin in Texas, through Colorado and up to Idaho?”**

And they said to me “This is a safety network where they transport and secure, highly classified documents, people of interest, and they, is a route where they can keep people and technology safe, if they want to transport it from say one location to the other.”

And I said, **“Are there any other sort of organizations that work alongside Space Force that are considered like a White Hat operation?”**

They said, “At this moment in time, only the Q operation is considered a White Hat operation or council to the Space Force, all other agencies like NATO or the UN are being restructured and cleaned out of all the dark hat operatives and this is an ongoing program.”

So I hope you've really enjoyed all that information today.

I look forward to seeing you next time.

Year of Dragon Global Revolution is here

Dec 31, 2023

<https://www.youtube.com/watch?v=8qoECD2-NgA>

The Year of the Dragon will be a fast, strong, passionate year of change still standing up strongly from a position of passion, courage, integrity and honesty. Sweeping changes will be witnessed, seemingly very sudden and sometimes shocking.

In 2024, we will be moving into the Chinese Year of the Dragon. The Year of the Dragon will be a fast, strong, passionate year of change still standing up strongly from a position of passion, courage, integrity and honesty.

Sweeping changes will be witnessed, seemingly very sudden and sometimes shocking, but in reality, the preparation for these major events have been in play for some time. The major sweeping events and changes in all aspects of people's lives will be the culmination of all the preparation that has been ongoing previously in people's thoughts, words and minds.

Previously, where ideas have only been in the background, where people have been stuck, ruminating or lacking courage even, it will all suddenly come up to be enacted and enormous waves of courage to speak, to act and to change will be seen. It will seem as though it has come from nowhere, but it has been simmering in people's subconscious, deep down in the depths of their hearts and suddenly they will feel the passion, the urgency to act, to strike and to change.

Personal and global transformations will arise almost instantaneously without seeming prior warning. The energy of the Year of the Dragon is strong, wild, passionate, sweeping and all-encompassing. Any change within people's deeper longings will now surface unexpectedly with great force and dynamism.

On the global map, countries, causes, new communities, forgotten communities, will now all step up courageously to enact global, personal and community changes in a dynamic, transformational way. There will be no turning back from this global and societal renaissance, everyone will suddenly find their true passion, their true authentic voice and they will step forward.

Renaissance is powerful change with no turning back, a due or die energy will prevail globally. Great courage will be witnessed as societies all around the globe stand up for change, stand up for progress, stand up for transformation. There will be no turning back, the global revolution is here. Those who had been in a conscious slumber will be dynamically stirred, jolted and catapulted into actions, words and situations of irreversible change. Things that no longer hold true to societal and global growth will be powerfully swept aside to make way for the new.

A younger generation of light workers will step up to the plate and they will demand that all of society now stop clinging to outdated notions. The Year of the Dragon is a powerful, dramatic year. People's lack of integrity and authenticity will no longer be allowed to hide or linger in the shadows of organizational structures or societal coddling or ignorance.

This will be a time for naming and shaming, a time for justice. All karma on a global scale will now be brought to the surface for examination. No stone will be left unturned. The Year of the Dragon will be fortuitous financially for those who have balanced their karmic and Akashic records. For those who have balanced their karmic and Akashic records in favor of being of service through their vibration and light.

Great wealth will be seen in some previously unknown sectors of society prompting a huge redistribution of assets to different sectors of society never seen before. Leaders in monetary setup will be life changing in many sectors of society during the coming Year of the Dragon. Leaders with immense power and fortitude will rise to create a worldwide network of good fortune as countries weave together under the auspices of the new strong leaders, leaders of truth, leaders of integrity working towards one goal, one goal of unity.

The ambitious Year of the Dragon will bring all factions together using Guile, Stealth, Diplomacy and Love. Great leadership will be witnessed globally. A cohesive plan of leadership will start to be witnessed and the good of humanity will be its guiding principle.

World technology will move rapidly towards decentralizing decision making to the people, and layers of stuck cumbersome bureaucracy and government organizations will continue to crumble and fall. Many old structures now outdated will be dismantled. A new bold army and military of White Hats will emerge internationally, sometimes in the front leading but mostly in the background guiding, protecting and encouraging decentralized power to the people.

Ethics in business, people management, money management, government will all come under the spotlight, and those things not serving the people will be dismantled sometimes abruptly. More truth telling media will arise, where the people's voice will be the main focus and not political motivated subgroups or factions.

The platforms for truth and non-censorship will grow exponentially with older controlling media outlets and sources collapsing, restructuring rapidly to keep up with the societal change. The people will demand change in the Year of the Dragon, their force being so powerful that it will be difficult for the current governmental and financial systems and in some cases the military set up to prevail. It will all fall abruptly with great force and speed.

The Year of the Dragon will be first, determined and resolute. Nothing can stand in the way of this enormous wave of change which is about to engulf every sector of society globally. Even spiritual practice will be pursued with vigor. People will hear their heartbeat, their hearts desires and they will meet their great love and will pursue everything that stimulates passion, creativity and joy.

Some flashes of anger will be seen as these strong transmutational energies stir up those who religiously stay in a position of not

moving forward. The Year of the Dragon will uproot even the most embedded stubborn factions of society and organizations on a global scale like never seen before. To manage the energies of this enormously powerful year of forward movement, then the body must be kept moving otherwise anxiety will rise up. Anxiety is always a sign to get active. Do not procrastinate any longer.

This year is about movement, positive movement, in body, mind and soul. Anything you have desired or wished for, anything that you have been manifesting, it will all spring forth this year under the favorable auspices of the energy of the Year of the Dragon. Be brave, center yourself, breathe, engage with your hearts desires, manifest, manifest, manifest. Humanity will be changed forever in the Year of the Dragon, in the Year of the Dragon be brave, speak up and act for the good of humanity, beacons of light, this is your time, go forth and serve.

Pause to USA Government 2024

Jan 2024

<https://michellefielding.locals.com/upost/5098897/pause-to-usa-government-2024>

<https://rumble.com/v45su7w-january-8-2024.html>

Explain what is the difference between say a one world government in the Agenda 2030 versus the Space Force worldwide military peace plan which could be linked to Project 25 which is the transition template to the New Setup?"

Hope everyone's doing well and it's having a good beginning to 2024. As I said in the 2024 video, the [Year of the Dragon](#), it's going to be a very fast and potent year this year, so if you haven't already looked at that video, it might be worth going across and finding it and I'll put the link in the description below.

Now today's video I'm going to be looking at is there going to be a pause in the USA government in 2024 going forward around the time of the election. So we'll be looking at election 2024. We'll be looking at whether there's going to be some sort of continuity of government and what is going to be in store for Trump with all this talk about having him removed from ballots, particularly in this strong Year of the Dragon.

And I'm going to be looking at the difference between what is the one world government [NWO] and the worldwide military peace plan. So I hope that you really enjoy all the information that we're going to be talking about today. So the first subject I wanted to look at was around where Juan O Savin had said before Christmas, sometime near that, there was going to be a four year pause in the USA in terms of a paused government.

And so I wanted to know when Juan O Savin refers to the four year pause, is he referring to the New Setup which we have talked about previously called [Project 2025](#)

, which is going to be a transition project into the New Setup.

So I asked them **“When Juan O Savin refers to the four year pause, is he referring to the New Setup Project 25?”**

And they said “No, Juan is referring to halting political elections until a fair system is devised, a fair process.”

And I said, **“What fair process is he referring to?”**

And they said, “It is a system overseen by say military cybersecurity like Delta or the Space Operations Command,” which is something I was talking about in previous videos. And they said, “It's yes and no. Juan O Savin is referring in part to removing **all** elected leaders through elections in 2024, so that people can see how the USA could be effectively run under military law, whilst being protected by Space Force Delta space operations command. Military law may require troops on the ground, but it is anticipated that the framework of Project 25 will act as a template to start moving people to devolved methods of *governance*, not *government*. There is a difference between governance and government. People will be able to witness and experiment with self-governance. So for example, that would be devolution of governance through decentralization of power to be the people. And it would be overseen by the Space Force Delta space operations command and where systems require any quantum or computer infrastructure. So for example, you would need to have a quantum and computerized infrastructure where you are now devolving voting to a localized decentralized system.”

So I said, so **“How are the general populace going to respond should this strategy go ahead, this strategy of pausing the government, removing all elected leaders and running on a self governance based system with the military in the background, so running under military law?”**

And they said “It will to the greater extent be rolled out successfully. But they did say that there will always be factions who want to oppose any new systems or change. But to the greater extent, this rollout of Project 25 will be a success and it will lead the populace towards a devolved set up whilst being protected and overseen by Space Force. So I wanted to have a little look at the definitions of and the differences between what is government and what is governance. Because there's a distinct difference between how the new Project 25 and any pause in government is going to be running.

So I said, **“What is the difference between government and governance?”** They said to me that “*Government* is a set of ruling principles as devised by an out by an overseeing government or authority, usually an elected or self elected organization or set up.”

They said that “*Governance* is a more broad structure of allowing people to broadly decide their own rules and directives whilst providing a protection overlay to avoid far reaching factions destroying freedoms. So a more simplistic view would be that government is top down or centralized and governance is We the People and it's decentralized.

So I then pulled up a [Guide to Continuity of Government](#)

for state, local, tribal and territorial governments. This was developed or printed in July 2021 and is part of the Department of Homeland Security. And their introduction and purpose to what is continuity of government is they're saying that everyday individuals, organizations, communities and governments provide critical services and perform essential functions upon which citizens depend. And continuity of government ensures that the whole community has a plan for sustaining these services and functions when routine operations are disrupted. Implementation of continuity principles ensures that organizations, communities and governments can support individuals during a crisis.

If you look at the figure above the *diagram* [Figure 1], you'll see that what they're referring to is whole community continuity. And within that, they've got federal government, individual families and households, communities, non-governmental organizations or NGOs, the private sector entities and critical infrastructure, sectors, local governments, state and territorial and insular areas of government and tribes. So that's an overview to how this papers from the Department of Homeland Security describes continuity of government for the whole community. They go on to describe that the nation's continuity program and their continuity guidance is based on continuity of operations, continuity of government and ensuring that constitutional government programs still run.

NEF 1	NEF 5
Preserve Our Constitutional Government	Protect the Homeland
NEF 2	NEF 6
Provide Visible Leadership	Provide Emergency Response/Recovery
NEF 3	NEF 7
Defend the Country	Maintain a Stable Economy
NEF 4	NEF 8
Maintain Foreign Relations	Provide Critical Government Services

Figure 2: National Essential Functions

And this collectively provides resilience for the performance of something called the National Essential Functions or the NEFs. The NEFs, which as you can see in the *diagram*, are the foundation of all continuity programs and capabilities and are the primary focus of a federal government before, during and after a catastrophic emergency. The federal government maintains these functions and services with the support of the whole community partners, which was what we just saw in Figure 1. The NEFs, the National Essential Functions and the services with the support of the whole community partners, create a collaborative effort with federal departments and agencies, which are integrated with and supported by state, local, tribal and territorial governments, the private sector, NGOs or non-governmental organisations and the public.

All that integration and support to be successful, then organisational essential functions should be identified by the whole community partners. So essential functions are like a subset of a day-to-day government and how it runs its critical activities. And then these essential functions are used to identify supporting tasks and resources that will then need to be included in the organisation's continuity planning process. So in this next figure you can see that an NEF 1 would be to preserve our constitutional government. NEF 2 would be to provide visible leadership. NEF 3 is to defend the country. NEF 4 is to maintain foreign relations. NEF 5 is to protect the homeland. NEF 6 is to provide emergency response and recovery. NEF 7 is to maintain a stable economy. And NEF 8 is to provide critical government services. So these are the national essential functions that would still need to be run through the whole community in the event of an emergency. So the continuity of these operations ensures that an individual organisation can continue to perform its essential functions, provide services and deliver its core capabilities during a disruption to routine operations.

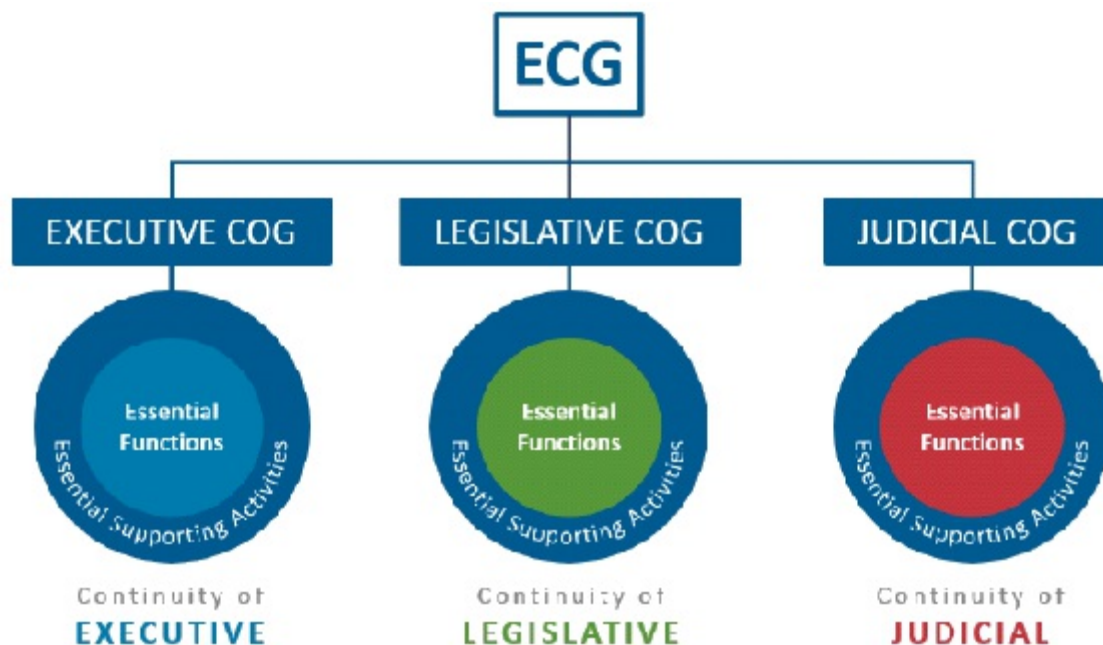

Figure 3: COOP, COG ECG Relationship

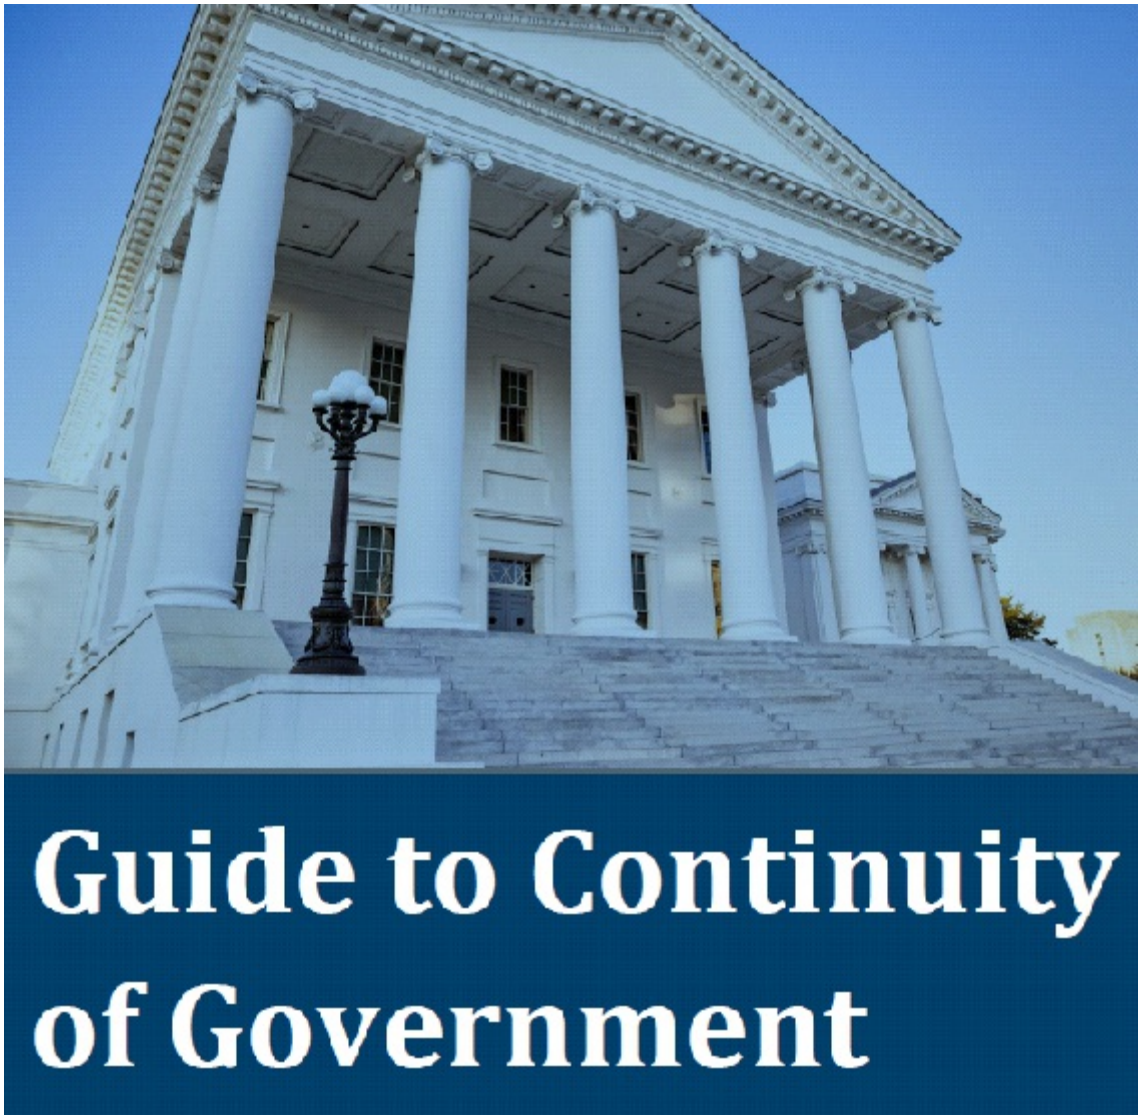

The continuity is the foundation on which continuity of government and enduring constitutional government capabilities depend. They're also saying that “continuity of government is a coordinated effort within each of the executive, legislative and judicial branches.” So in Figure 3 you can see the layout of the enduring constitutional government, which shows the executive continuity of government, the legislative continuity of government and the judicial continuity of government and all these together create an enduring constitutional government. Enduring constitutional government or ECG is the result of a cooperative effort amongst the executive, legislative and judicial branches to preserve the framework under which people are governed.

So far we have *continuity of government* and we have *enduring constitutional government* and the two things have to be run side by side. Then this document goes on to talk about how governmental jurisdictions at all levels should establish a cross-functional continuity working group or groups that address intra and inter branch coordination dependencies. And the composition of this group may vary by jurisdiction, but it should include planning, operational and leadership representatives from all branches of government, neighboring jurisdictions and representatives from the various SLTT departments, agencies, bureaus and other organizations which are deemed most critical to the continued functioning of the jurisdiction during an emergency. The SLTT stands for Guide to continuity of government for State, Local, Tribal and Territorial governments. And in the next table it shows us branches of government and their critical functions in the USA.

Branches of Government and Critical Functions

Branches of Government Model		
 <p>Executive</p> <ul style="list-style-type: none"> Continuity of leadership (succession) Declaration of emergency Implement response operations and initiate emergency actions/authorities Make emergency appointments Safeguard/protect resources, facilities and personnel 	 <p>Legislative</p> <ul style="list-style-type: none"> Continuity of leadership (succession) Continuity of legislative process Provide authority for necessary government action Ensure laws support COG emergency requirements Allow seat of government to move or operate virtually and modify quorum requirements 	 <p>Judicial</p> <ul style="list-style-type: none"> Continuity of leadership (succession) Continuity of court system Ensure due process Ensure checks and balances Decide matters that arise due to the emergency Prioritize court dockets and functions Ensure access to legal services

So you have the executive branch which gives us continuity of leadership, declaration of emergency. It implements a response operations and initiates emergency actions and authorities. They make emergency appointments and they safeguard and protect resources, facilities and personnel. Under the legislative branch you have a continuity of leadership for succession, a continuity of legislative process. You provide authority for necessary government action. You ensure laws and support continuity of government emergency requirements and you allow seats of government to move or operate virtually and modify quorum requirements. And then under judicial you have continuity of leadership or succession, continuity of the court system, you ensure due process, you ensure checks and balances, you decide matters that arise due to the emergency, you prioritize court, dockets and functions and you ensure access to legal services. So under continuity of government those three branches would run in that manner.

So in this [document](#)

you can read the full outlines of how the executive legislative and judicial branch would operate under continuity of government.

So then the document then goes on to talk about emergency action steps which could be for example scripted announcements or periodic reviews or updates or notifications or alerts which would be used to contact designated executive legislative and judicial decision makers. There would be for instance procedures for *declaring a state of emergency*. There could be something like issuing a stay at home or shelter order. It could be permitting local government personnel property to be used outside of jurisdiction and the list goes on.

Other emergency resources could be where they allow different departments in the different branches of government to:

- Alternate their locations (to include telework or virtual support.)
- Video conferencing or other communication methods/technologies.
- Additional vehicles or power generation equipment and fuel
- Wi-Fi Hotspots
- Cell phone service which includes portable temporary towers
- Lodging
- Food and water
- Anything else that would be required to support the essential functions.

So all of this can be read in detail in this [document](#)

called *Guide to Continuity of Government*.

So going back to my channeling it would seem that that would be what continuity of government would look like under normal circumstances. But what we might be looking at here particularly with what we were talking about with regards to Juan O Savin and what I channeled is that they might be removing elected leaders in an effort to allow people to have a decentralized form of governance where the people start to make their own decisions.

So it looks like that in the future even though there would be a continuity of government framework. It's looking more like some of those operations will be devolved down to the people via maybe the transition of Project 2025. So in the past you would have had all of these functions overseen via those executive branches of government and I'm not saying that that wouldn't still occur, but it seems like you'll have that plus some kind of system to devolve some of the decision making to the populace. So in the past it would have just been the three branches of government that were running the continuity of government but in order to have governance you need to decentralize some of that decision making.

So what I think we're looking at in the future is in the background we're going to have a military law set-up so that we have the military overseeing the whole process and then there's going to be some kind of, it looks like, some kind of divide between how much the government runs the continuity and how much is devolved down to the citizens through maybe something like Project 2025 and this is going to be a transition process so it's all going to be new, it's going to be a new way of looking at government and governance and it's going to be overseen by the military in terms of keeping it all safe.

So in this sense I think it means like in the cybersecurity sense so that would be Space Force and delta at the space operations command who through military law would be overseeing the functions running effectively during any time of emergency or disruption. So it'd be interesting to see how this unfolds because before we understood about this New Setup coming that would be coming if there had been a state emergency you would have gone straight into continuity of government structure which is everything I've just read out from that document.

But now what we're going to be seeing, it seems like, is we're going to be seeing not just the old systems for overseeing functions but we're going to see this new introduction of the people also being able to take on some of that responsibility and in the background the Space Force, Space Operations Command and Delta are going to be overseeing the security of any cyber security so that would be

communications for example.

Now this is going to be a very interesting process because if they go ahead with this holding of this pause in government this is effectively what I think we might be seeing going forward this split in being overseen by government and being able to contribute from the level of the populace, so a devolved decision making process and where the Project 2025 will be that framework for the devolution to the populace.

We'll have to wait and see but I'm feeling like that's what's going to happen going into the latter part of 2024. We might start seeing some of what we thought were going to be our elected leaders being pulled back. They're going to be used in the future for the New Setup once all of these systems have been redesigned and reallocated in terms of who's governing and how much the people are involved in that. So this is going to be a very interesting transition time.

So then I asked again **“What is ahead of us in the USA right now like on a political level and what events could cause this election of 2024 to be cancelled or postponed effectively causing a pause in government?”**

So what they said to me is “It's not currently anticipated that the election of 2024 will run in the normal way.”

And I said **“Normal way?”** They said “It is anticipated that disruptions to voting procedures rules equipment and equipment will cause the elections to be postponed, to be invalid or even cancelled so effectively you would then have no leaders being elected. That could be how we move into this situation of going into the pause. When you have no leaders elected, then you have to bring in military law, all be it under the radar.”

So it looks like what they're saying is that the election will be disrupted, postponed, become invalid or be cancelled. So then you'll have no elected leaders and in that moment you would then be under military law, all be it under the radar.

“Project 25 will be brought in more strongly as a template to the transition into the New Setup of devolved governance to We the People which is where you're doing decentralized voting for policy and not people.” So you're voting for the policy that you want, not people to be elected. “Going into 2024 things will become more confused as the election date approaches”

I said **“In what context will it become more confused?”**

They said that “Things that people had understood to be fact around things like January the 6th, the insurrection. It will be shown to them that this event was manipulated. More information will be shown around former presidential incumbents and how they have manipulated policy, finances and use corrupt practices. As we head towards the elections of November 24 we will also see more Hollywood people speaking out in favor of Donald Trump as we start to move the narrative back to the center ground towards devolution of governance and a system for We the People.”

I said **“So what is likely to occur at the elections of 2024?”**

“Many fast moving events will come in and it will disrupt the election of 24 and it's likely to be cancelled or postponed and it's going to leave the country in a state of limbo effectively the military will oversee the continuity of governance [government].”

So that goes back to what I was talking about previously.

I said **“Will the people know that they're under military law?”**

They said “The masses will not know or understand that they are being overseen or managed via military law. They will see it as a pause in voting while the systems are cleaned up. Project 25 will be used as a template for this transition.”

So then I said **“But anything attached to President Trump like Project 25, it will be seen as a transition to the right because it's because of Donald Trump is a Republican?”**

They said “No it is intended that Project 25 will become a dialogue via the Truth Social Movement to promote freedom of speech and a move to the center ground.”

I said **“What will happen to candidates like Robert Kennedy Jr, Ron DeSantis etc? What will happen to the candidates at that time will they fall away?”**

They said “No, the candidates will help to lead the people forward in this New Setup and prominent Hollywood actors and music performers will also step forward to help promote and re-educate on the New Setup via the Truth Social Movement, for example, you might see people like Oprah Winfrey, Tom Cruise, Justin Bieber, actors and doctors, singers coming forward to help with the transition.”

I said **“So will President Trump be leading Project 25?”**

They said “No, it will be a collaboration of people from all walks of life, all backgrounds, different areas of expertise.”

And I said **“So what will the role of the president be in 2024 going forward and will he be a prominent voice, meaning president Trump?”**

They said “Yes and no, President Trump will still be speaking out in his normal way, where appropriate, but the emphasis will be on local communities banding together to gain a local setup for procedure and policy.”

This goes back to what I was talking about earlier with the continuity of government and continuity of governance.

They're saying that “The emphasis going forward is going to be on policy and not voting for people.”

So I said **“But in real terms what will lead people to take this direction because they're used to being led?”**

They said to me “This is where the pain may be felt as local communities start to realize that they need to take control and that big government is changing.”

And I said **“This sounds like a precarious position. Many people cannot cope without authority and top down direction. Won't there be uprisings, maybe violence and vigilante behavior?”**

They said to me that “In some cases this is always the way in society. There will be pockets of extreme behavior. This is all part of the cultural change that will be driven forward by a somewhat ambiguous situation initially.”

I said **“Ambiguous?”**

They said “Initially it will look ambiguous and people will feel unsettled, frustrated, dazed, angry because of the lack of what they see as a lack of seeming direction. The lack of clarity will cause people to band together to create new structure and policy.”

So then I said **“So during this period of pause what will happen with services like vital services? Will they still run, like the rubbish, the hospital's emergency services, media, banking?”** So these are all the systems that I outlined previously in the continuity of government document.

They said “To the greater extent, everything will still run business as usual, but however, in the background the finances policy procedures will all be being restructured.”

So this is very interesting. So then I said **“So who will be overseeing the allocation of say funds for local services or governments or government services?”**

They said “The finances in the central locations will be overseen by the military through the continuity of government [governance].”

So again they're talking about the system being split into two parts the government which is centralized the governance which is decentralized and overseen by the military

I said **“How will the Truth Social communications platform be utilized during the pause?”** [I talked about the Truth Social app being a military communication setup in one of my [previous videos](#)

.]

They said that "The Truth Social platform is a military platform of communications which will be used as a peace broadcast system during the exponential restructuring pause in 2024 and beyond."

So then I said to them that "In the Project 25 documents it states that the 2025 presidential transition project paves the way for an effective conservative administration based on four pillars of policy agenda, presidential personal database, presidential administration academy, and a playbook for the first 180 days of the next administration."

And so I said to them **"So this looks like an agenda for a republican setup because it states it will pave the way for an effective conservative administration."**

Now they said to me "There is a difference between being a republican which is right wing and having a conservative approach to politics which implies that you have a more centered approach and that you're moving towards center ground."

So they're saying there won't be any left or right in a conservative approach.

So I said to them **"So really what we could call it is a moderate approach."**

They said "No, it's an approach based on keeping politics in the center ground by allowing devolution of governance."

So then recently I saw that Trump had posted a photo of himself with the military in the background and I wanted to know **"Was this [photo] to show that he is commander-in-chief or that the USA is under military law or under continuity of governance or government?"**

And they said "All the above. Donald J Trump was brought into the forefront of the USA to act as a *sting operation* while in the background the corrupt administrative financial and political systems were collapsed. On a broader scale the media is also being restructured to allow for freedom of speech however the initial extremes of what could potentially occur should these systems not be collapsed has to be witnessed by the citizens who are still not awake to the dark corrupt matrix of power that had been gaining considerable momentum since the assassination of JFK Kennedy in the 60s.

So in real terms people will still be seeing the harmful effects of wars started by corrupt government control through the federal reserve and CBDC which is not to be confused with the Centralized Banking of the Digital Currency through the Quantum Virtual Vault.

But people will still in the beginning have to see that CBDC run in under federal reserve will not benefit them. They also need to see that the climate emergency narratives are all by design along with pushing extreme gender narratives and many further opposing and controlling narratives which were headed towards a one world government Agenda 2030 will also be witnessed."

They said that "The White Hats are in control and the White Hat military i.e. Delta but the Agenda 2030 narrative still has to be rolled out in places to raise awareness to the citizens and the masses of the potential dangers of having a centralized one world government.

The [Worldwide Military Peace Plan](#)

which is Starlink and Space Force will in comparison create a system of devolution for the citizens while providing superior cybersecurity and digital protection and each member country or region will be monitored for its adherence to the operational codes of conduct and policies by the other regions and countries in the Space Force setup worldwide. And this will create a worldwide peace plan to ensure that countries deliver peace not only through their interactions with other regions and countries but also maintaining peace with their own citizens. And to not abide by these procedures and protocols would be to risk being locked out of the quantum virtual vault and the peacekeeping facilities in cyberspace communications and energy for example to not adhere would disrupt a region's ability to interact with the rest of the world financially in trade, for example, and possible severe disruptions to communications and internet which would be disabled and would disable their banking and communications in that region. So the worldwide peace plan will be overseen in each region by a commander-in-chief from the Q team."

So I asked them again **"Explain what is the difference between say a one world government in the Agenda 2030 versus the Space Force worldwide military peace plan which could be linked to Project 25 which is the transition template to the New Setup?"**

They said that "The one world government which was the plan under agenda 2030 is no longer an option as the White Hats have successfully infiltrated all aspects of this plan and they have reversed the strategy to enable freedom and sovereignty rather than control it. Effectively all the parts of the one world government were taken and flipped in the opposite direction so it's the same system, but with a different intention and different people overseeing it.

The one world government plan of Agenda 2030 was a system that was devised by the elites and no elected officials. They effectively wanted to take control of humanity for their own gain and this would have led to citizens not owning anything, a lack of movement in travel and transportation and control through a credit score system attached to a digital form of currency.

Voting would have been centralized with the elites choosing who would be available to be elected into the positions of authority. So effectively it would have been a rigged system. There would be no obvious accountability for the action or inaction of those in authority which would then lead to gross corruption and miscarriages of justice. All natural food and medicine would have been suppressed in favor of nanotechnology irrespective of whether it heals and repairs in all situations.

Under the agenda 2030 freedom of speech would not have been visible with increased censorship if it went against the elites plan to control and govern the people. Innovation and technology would only have been allowed and developed with the intention to control and coerce the masses.

Now in comparison to that the system that we are currently operating is called the worldwide military peace plan which is overseen by Space Force and they're saying that this is overseen by the White Hats and the Q team who are the superior cybersecurity systems worldwide and they're operated by the White Hat military and overseen by the Q team.

It is a system for allowing freedoms in choosing policy and not people, choosing freedom over control, the abolition of war programs. Digital currency will be backed by assets from the virtual vault plus there will be decentralized governance meaning the abolition of top heavy corrupt government systems that are cumbersome and often lack responsiveness to local needs of communities and the needs of the citizens.

Under the worldwide military peace plan they intend to have open borders using digital ID and quantum passports and new innovations, technology, and freedom of time and pleasure with transport systems being designed for speed and pleasure."

I said **"Will they be restructured under this transition process or Project 25?"** They said "Yes."

I said **"What is the purpose of the restructuring of the Department of Homeland Security?"**

They said "The future of open borders, quantum borders, will mean that the DHS or the Department of Homeland Security will need to restructure to interface with new cyber security methods of managing immigration and travel in and out of the USA by visitors."

So I asked them **"What is the quantum border?"**

They said "A quantum border is an open border where traffic or travelers are monitored or overseen worldwide by the Delta cyber security there would be no need in the future to queue for long periods at border control and new biometric systems will create a faster more streamlined process and even the paper passport system will become obsolete longer term as old passporting and identification systems are scrapped."

And I said **"What will replace the old passporting systems?"**

"In the future passporting and identification of citizens for travel will be through biometric information."

I then wanted to know **"How will the USA look during this sort of intensity of the Chinese Year of the Dragon in 2024 and what is the strategy behind removing Trump from the ballot papers?"**

They said that Trump being removed from ballot papers in some states while remaining in other states will produce an untenable

unconstitutional situation for the elections of November 2024 in the USA. So this along with other unconstitutional acts or situations of arising throughout 2024 will cause the election to be postponed effectively leaving the USA without leadership and military law will be in place to help deliver the continuity of governance or governance.”

So finally I asked them “**Are we going to be heading into any war in any other areas?**”

They did say “We weren't going into any more wars, but Israel is a cleaning up operation and the other random events may be seen like oil field attacks, for example, because we're trying to get these assets tied into the quantum virtual vault.”

So if in some regions the assets still have not been fully accounted for then we could see random attacks on say, for example, oil fields while they get those assets quantified and added to the quantum virtual vault. So they're not saying exactly that there's going to be wars but there could be random events that could be possible because they're trying to get these assets and quantify them.

They did say “During the Year of the Dragon the energy is going to be very commanding and so there are going to be many changes and these changes will be imposed worldwide to move into the worldwide peace plan so that it becomes something that's front and center.”

So if you want to hear more about the Year of the Dragon please go and see the [video](#)

that I’ve recently put together about this Chinese year and there's going to be a lot of change, very dramatic very forceful.

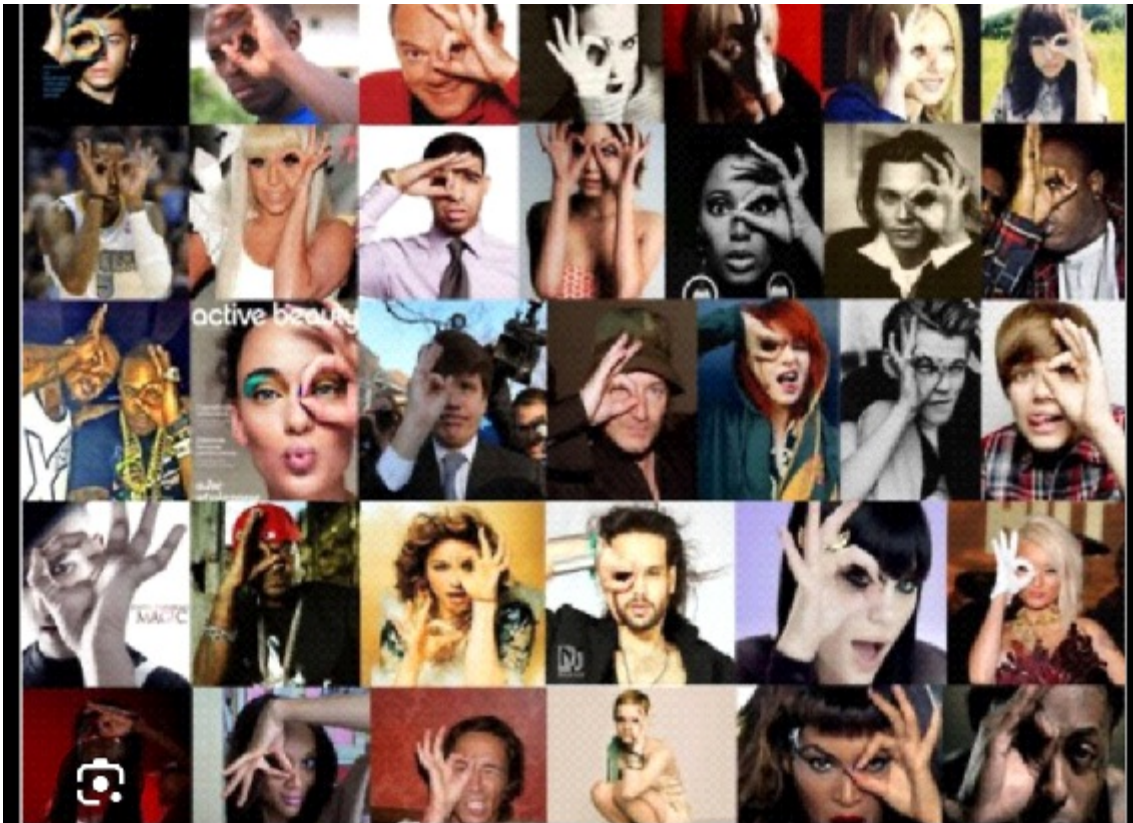

I hope you've really enjoyed all this information today and I’ll see you next time.

Epstein - The Sting Operation?

Jan15-2024

<https://rumble.com/v4814e3-epstein-the-sting-operation.html>

A White Hat is a person usually in a position of command, leadership, or public recognition, but not always, who has chosen usually through their soul contract to work at this time for the good of humanity as it moves to a higher level of consciousness.

I've been putting together some interesting information today, different notes that I've had on my pad for a few weeks about different subjects. I'm going to be talking about the White Hats, BRICS, the one eye club and Hollywood, Jeffrey Epstein, is there going to be a black swan event, Trump, and Continuity of Government, and finally, some information on geomagnetic storms.

So I hope you're really going to enjoy everything that I have for you today, and let's get started.

So the first thing I have for you today is looking all around the White Hats. And the first question, that I had about the White Hats was how long have the White Hats actually been in control of certain areas, things like Hollywood, or the military, particularly the Delta force, and Q, and things like politics in the USA.

“How long have the White Hats been in control of everything?”

They said to me, “The White Hats have been making inroads into all aspects of politics and the entertainment organizations, and military setups, financial organizations, and communications since the assassination of Kennedy when Q was originally devised.

But it wasn't until after the event of the [Twin Towers](#)

that things really started to take shape and gather a steady momentum. It was around 2001, 2002 during the Twin Towers event, that the intentions of forming the One World government i.e. Agenda 2030, were really starting to be seen as a real threat to the future of humanity, not just in the USA, but worldwide.

And they're saying that a plan was then hatched by the White Hats where they would infiltrate all walks of life effectively acting as spies, but for the greatest good for the good of humanity. And they would be gathering data and intelligence to see who were the good guys and who were the bad players.

So gradually, the White Hats and the good players started to infiltrate, and they started to switch the balance back to good from evil internally. So they were going inside organizations effectively to act as spies for the White Hats for the people to wake up to the dangers of what could befall them going forward. Then a psychological operation of deprogramming the people was carefully devised.”

So in addition to the White Hats infiltrating organizations, they were also devising a program of psychological deprogramming.

“The Q team have been overseeing all aspects of this planning ensuring that it could be delivered safely and effectively. The White Hats have major positions of authority within the military, particularly in Delta and Cyber Security, which is overseen by the Q team. They also have major positions of authority in Hollywood and the entertainment industry. They were also involved in the Epstein sting operation. They also have major positions of authority in the political systems, not just in the USA, but worldwide. They also have positions of authority around the financial restructuring, particularly the Quantum Virtual Vault.”

You could find information about that, at locals.com or [Rumble](#)

, where I've put together, a video about the quantum virtual vault and digital currency.

The White Hats also have positions of authority regarding BRICS and the alignment of worldwide currency and they also have positions of authority with communications, where we have freedom platforms, and the backup of that is the [Truth Social Movement](#)

. The app is actually a military communications setup.

I said **“When you said that these White Hats are in positions where they're going to be involved in BRICS and the alignment of the worldwide currency, what did you mean?”**

And they said, “The alignment of currency for BRICS means that exchange mechanisms will be collapsed so that one unit of currency in one country is equal to one unit of currency in another country.”

When we're talking about BRICS, we're talking about Brazil, Russia, India, China, and South Africa. they were the original participants of the BRICS setup and since then other countries have started to join in other regions.

And I said, **“Is this for just digital currency where this mechanism is going to be one for one?”**

And they said, “No. This mechanism is for physical currency only, which will be backed by physical assets like gold, silver, and

platinum, for example, and it will be the same setup as the quantum virtual vault where digital currency will be backed by tangible assets before it can be distributed.”

Then I said, **“Are the White Hat teams, are they still are they still growing in strength and commanding positions of authority still?”**

And they said “This year, it will become more apparent that good honorable leaders and people in positions of authority are working for the White Hats and for the good of humanity. The year 2024, which is the Year of the Dragon, is the year where *solid disclosure starts to be seen* and where the masses start to finally begin to connect the dots.

Then I said, **“So what is a White Hat exactly? Can they explain to me a White Hat?”**

And they said “A White Hat is a person usually in a position of command, leadership, or public recognition, but not always, who has chosen usually through their soul contract to work at this time for the good of humanity as it moves to a higher level of consciousness.”

The next thing I had written down in my notes was I had been looking at the symbolism around Hollywood. The thing called the one eye club all the symbolism that they do, where they do the shush sign, sometimes they're shown to be blindfolded. I wanted to sort of look at all of that to see what that was all about.

I said, **“So the one eye club, for example, in the past, was the one eye club, the shush symbol and the blindfolds, were they a signal that they were a part of or working within a satanic regime, cult or some sort of authority like that?”**

They said it “Yes. Those symbols did mean that.”

Then I wanted to know **“Were the people that were performing these symbols, the actors, singers, entertainers, were they aware of what this simple symbolism was referring to?”**

And they said “Yes.”

So I said, **“Did this require them to perform satanic ritual?”**

And they said, “Yes.”

And I said, **“What exactly would be involved in a satanic ritual for those of us that don't really know much about it?”**

They said a satanic ritual would be where you take blood from another living soul whether that be a human or an animal, and then you either drink that blood or in some way you exchange it, with your own blood. So for example, you could make a cut to your skin, and then you'd exchange the blood that way. And you would do it in some sort of ceremony.”

So then I said, **“So what does the one eye symbolism mean?”**

They said “The one eye symbolism means that *I see the devil hiding in you* and the shush sign means *keep this a secret to keep it potent amongst practitioners of Satanism*. Their strength being in the fact that it's secret or supposed to be secret.”

I then asked **“What does the blindfold symbolism mean?”**

They said “The meaning again is to keep it hidden or secret, but also the blindfold indicates the heightened response of being satanically involved in a ritual when your senses have to feel what is going on rather than the eyes seeing it. So it creates this kind of like heightened euphoria especially if they're engaging in any sort of experience of pain or any sort of suspense ritual.”

And I said, **“So has Hollywood taken down the control of Satanism?”**

And they said, “Yes. The White Hats have actively been removing the main perpetrators, and they've been helping those who inadvertently were signed in to these dark cult contracts. Sometimes this happened in very divisive ways, often when contracts had already been signed, for instance, for singing, or acting careers, then threats would sometimes be made towards their family and sort of ongoing blackmail tactics would be used in order to control these actors and singers so that they would be part of the system.”

And I said, **“These symbols in their true form could they be used, say, by religion or a group for good?”**

And they said “No, all these symbols were devised to represent satanic processes and allegiances to satanic practices.”

And I said, **“Who were the people devising these contracts that then involved people in these satanic practices as part of their ongoing contract for, let's say, the performers. Who was involved in devising those contracts so that these performers had to go along with this?”**

And they said “In most situations, it was the elite families who harness great control through their enormous wealth and power.”

And I said, **“So all the photos and the footage that has been seen of Hollywood doing these symbols, were some of them White Hats that were infiltrating, in order to catch out or find the overlord of these devised practices?”**

They said “Yes.”

So essentially, we have had White Hats in amongst these people doing the same signaling, so that they could be inside, doing a sting operation.

And so I said, **“So are we saying that some of the Hollywood actors and the singers, entertainers, were they doing the satanic visual signaling on behalf of the White Hats as a sting operation?”**

And they said “What we are saying is that there were many layers to these practices which to the larger extent have now been disbanded. And some people were willing participants in the original rituals, some were coerced, some were just naive and didn't know, and some were planted or recruited by the White Hats to create a sting operation.”

And I said, **“How long has this sting operation been in effect in Hollywood and the entertainment industry?”**

And they said “Again, this has been on an ongoing operation but it started to gather momentum around the late nineties and the early 2000s. And it needed coordination and planning to track the predators and the victims. And sometimes the predators are victims themselves who don't know how to extricate themselves from this dark violent industry. The White Hats have helped people to leave and or become players in the sting operation.”

So as I've said before, some of the people that you think are doing satanic acts in their concerts and things at this late stage, you'll probably find that they are working for the White Hats and they're trying to wake people up through these overt symbols and acts that they're doing on MTV or in people's lounge at tea time. So that's to wake people up.

So then I wanted to talk about Jeffrey Epstein.

I said **“Jeffrey Epstein, the flight log were the people on the flights, were they also sting operations? So this list of people that seem to be going backwards and forwards to the Epstein Island, were they there as part of these sting operations by the White Hats?”**

And they said “In some cases, people on the flights were gathering intel to find out exactly what was going on on Epstein's Island and that not all people on Epstein's flight logs were attending for the purposes of child abuse, pedophilia, or trafficking. In the future, it will become clearer who were the perpetrators and who were part of the ongoing sting operation.”

And I said “Ongoing?”

“This operation regarding Epstein and Maxwell is ongoing.” Information goes back as far as [Robert Maxwell](#)

, which is Ghislane Maxwell's father, and he mysteriously died in a yachting accident some years ago.”

I think it was probably in the late eighties, early nineties, something like that.

“And it may be found in the future that certain players that are well known at the Epstein Island were intelligence agents and they

were gathering information for the White Hats, and this will come to light. Jeffrey Epstein is not dead. He is alive and he is living in a secure location. He's not in a prison, but he is imprisoned. So he's not able to move freely from that location and he has a 24-7 security detail. He is helping to unravel the events of the island. In exchange for not being imprisoned in a high security detention center. He did mentally manipulate Ghislane Maxwell as that is his type of personality, but she did work with Epstein under her own free will, and she helped introduce socialites to Epstein through her networking and charitable events. They would then blackmail certain attendees after filming them in compromising situations, mostly with underage girls or boys. The details will be released at a future date and people will know who was partaking and who was intelligence gathering.”

I said, **“Was Epstein working as an agent himself, like an intelligence agent?”**

They said “Initially, Epstein was working on a honey trap business which then developed into him being used by the White Hats to gather intelligence in exchange for limited freedoms in a secure location.

So I said, **“Did Epstein work for the Israeli CIA or the USA CIA?”**

They said “Epstein was working on behalf of many intelligence agencies towards the end just before his imprisonment. They said Epstein is a psychopath, so he needs careful handling by specialized personnel within the intelligence agencies, and he is still disseminating information at this time in return for privileges. They said Ghislane Maxwell is not a psychopath, but did willingly participate in a lot of the activities. She was not working for the White Hats. Her profile is different to Epstein, so she needs a different role or task.

She was not aware of the White Hat aspects of Intel gathering until later on. Her love for Epstein is what was feeding her behavior. It was a misplaced urge or desire to please Epstein and this was a theme that she carried from childhood where she would please her then manipulative father who she adored. So she's not an innocent victim in this storyline as she undertook all the roles willingly, but it could be argued by a psychologist that early established childhood patterns led her to follow through on a lot of her unhealthy behaviors with men and children.

I then asked about **“Isaac Kappy, is he still alive?”**

And they said, yes, Isaac Kappy is a former Hollywood film director, and he agreed to work with the White Hats to bring down pedophile and trafficking rings and activities in Hollywood and the film industry.”

So I've heard people talking about, something called a black swan event. I wanted to know a bit more about what this black swan event means and what it might be.

So I said to them, **“What is a black swan event?”**

They said “A black swan event is an event which shuts down internal infrastructure. So for example, it could shut down communications, like, all travel or security, like cyber security, for example.”

I said, **“So was COVID a black swan event?”**

They said, “No, COVID did not technically shut down infrastructure through an uncontrollable event. It was a personnel issue, if systems were disrupted or limited during COVID, they said a black swan event is likely to affect a whole system worldwide at the same time. And the example that they gave was it could be a cyber event which would say for instance disrupt the worldwide communications. But they said to me that it is anticipated that the Truth Social platform, which is a military based communications platform, will run in the event of a worldwide or countrywide attack due to a black swan event. They said Truth Social is a peace broadcast system. It's a military system and it's setup to communicate in digital and analog if need be.”

Now I did a whole [video](#)

around the Truth Social communications, which you can find again at locals.com, or on my Rumble channel.

I asked again, **“Are we are we expecting a black swan event?”**

They said “Yes.”

“And are we expecting it on a worldwide basis?”

They said “Mostly.”

I said, **“Can you tell me the kind of event?”**

But they wouldn't tell me, it was denied.

I said, **“Would it be cyber security?”**

They said, “Definitely cyber security would partly be involved.”

I said, **“Will worldwide communications be affected by a black swan event?”**

They said “In some cases, yes.”

And I said, **“Will there be more than one black swan event?”**

And they said “Yes, 3 or 4.”

And I said, **“What is a black swan event?”**

Again, they said “A black swan event is an event which impacts everyone worldwide either directly or indirectly. An example would be a cyber security event.”

So I tried to ask them again **“What type of black swan event are we expecting or anticipating?”**

“The security services are expecting several black swan events to occur between 2024 and 2026 as part of clearing the way for the New Setup [devolved governance].”

Now I've just made a video about the New Setup, and also I've just made videos about the [New Setup](#)

. It's called Project 25. And I've also just made a video called the [Pause in Government for 2024](#)

in the USA. Again all these videos can be found at Rumble or my locals.com channel.

I said, **”So in what way do we need to clear everything? Why, in what why do we need to clear the way?”**

They said ”Old communication structures need to be dismantled so that we can move towards the Truth Social Movement methods of communications.”

And I said, **“What are the Truth Social methods of communications?”**

And they said “They are systems that are digital analog, and backed up by StarShield, formerly known as Starlink, which is at the Delta Space Operations command.”

And I said, **“What will happen to the other communication methods if they don't fall within the truth social communications network, which is a military network?”**

They said “They will be dismantled or disabled.”

And I said, **“So what sort of communication systems will fall outside of this military Truth Social system?”**

And they said “Anything that is not overseen by the military or space force and their cyber security framework that is likely to be dismantled or disabled going forward.”

And I said, **“What would an example be, say, Google? Are they outside of this platform?”**

And they said “No. Google is a social media platform, but its capabilities again, will be overseen by space operations command or

delta going forward. It's the same for Meta. and also Microsoft will be or is being restructured. Bill Gates is not controlling that organization. The White Hats have had control of Microsoft for some time.”

I said, **“Will Microsoft then, is it going to fall under the Delta Cyber Security Network”**

They said “Eventually it will. Its hierarchy is currently being cleaned out.”

I said, **“What about Zoom? Who oversees Zoom and is it collecting and storing data?”**

They said “This is another organization, which will be restructured by the White Hats going forward. They have no immediate plans though for Zoom as new platforms like Zoom are being devised under the x.com platform which will replace Zoom. And they are expecting this x.com platform which will which will replace Zoom to be launched around the end of 2024-25. And as you know, x.com is overseen by Elon Musk.”

Now just going back again to Hollywood. I was asking Hollywood actors like the rock, Oprah Winfrey, is there a possibility, that they will make, like, really strong inroads in the run up to the USA elections, which In my last, [video](#)

called the Pause of Government in the USA 2024, It discussed how there's going to be some sort of hold or pause or delay on that election of 24

So I wanted to know, **“These Hollywood actors like the rock, Oprah Winfrey, are they going to make strong inroads in this run up to the election, are they going to go for the roles of president?”**

And they said “Hollywood actors will be a big part of leading people forward in the New Setup.”

So that's the project 25 transition program which I've talked about in previous videos.

They said “The New Setup is going to be the transition from the current voting system, the current voting and election setup. Singers like Justin Bieber and others will step forward to help and they will lead the Truth Social movement as the old election process is removed.”

Now if you want to know more about that, you need to go and see my last [video](#)

called the Pause in Government of the USA 2024.

They're saying “The actors and singers will be used as beacons of hope to introduce a new decentralized form of running the country, a new form of governance, as the country will now be overseen by military law, instead of the normal government setup where you have elected officials. They're now going to have new voices for change who will support a conservative view, and they will step forward, these people, to lead the masses towards decentralized voting and community projects. And this is going to move the people away from the centralized systems, and it's going to encourage more citizen involvement at the community level.”

So they're saying that these Hollywood actors and singers are going to have a role in helping people to transfer to the new system. And they've told me this several times in a repeating pattern that they keep telling me.

I said **“With the rise of the Truth Social Movement, how will this affect news outlets, like, say, Fox, CNN, etcetera, who have previously been running, a dialogue, against conservative views?”**

They said “All media organizations are now controlled by the White Hats and at the appropriate time, will all align to create a news network, which is synchronized in its practices of freedom of speech in all areas of the political spectrum. X, which was formerly Twitter, is setting the foundations of how platforms should handle information going forward.”

Now we've recently had a new president or prime minister elected in Argentina, Javier Milei.

And I wanted to know, **“Is he part of the queue team?”**

They said “No.”

I said, **“Is he one of the commander-in-chiefs of one of those 6 sections of the world that the world would be divided into that we've talked about previously?”**

They said “No.”

So I said, **“So what can you tell me about Javier Milei?”**

They said he is working under the principles of the worldwide military peace plan along with Colonel Bosi in Australia, and they are leading people back to the middle ground and they're allowing systems and policies to enable a more decentralized governance in their regions going forward. Riccardo Bosi is, a former lieutenant colonel of the Australian SAS and he currently is a political leader in Australia under the group called Australia One.

I said, **“Is he one of the commanders-in-chief again?”**

They said “No, but he does report to the one commander-in-chief, which is heading up his region, going forward and that commander-in-chief is part of the Qteam.”

So finally, I've been listening to Joseph Anthony, who's an astrologer, talking about geomagnetic storms. And if you go across to his channel on YouTube, he's explaining how the alignment of planets at this time and the location of earth between these planets and the sun it's kind of creating a vortex of energy, but that's being sucked down from the sun. And, this is sort of creating a solar storm or could create a solar event. So I took some questions from his video to see what they would say, to see if it would help us understand about those geomagnetic storms.

And I said, **“Are geomagnetic storms weakening the atmosphere and causing extreme weather patterns?”**

They said “Yes and no. The geomagnetic storms do create electricity, which can increase in the atmosphere and cause electrical storms, but in and of themselves, they are not creating extensive or extreme weather patterns.”

So I said, **“What is causing extreme weather patterns?”**

They said “It's a combination of many factors like at atmospheric pressure, solar activity from the sun, pollution, and technology.”

And I said, **“What causes an electromagnetic storm?”**

And they said, “Solar activity from the sun.”

And I said, **“Is this activity increasing?”**

They said solar activity is not increasing, but more the combining of solar activity with atmospheric pressure, the pollution and the technology all combined together. This is what creates the extremes in the weather activity and the anomalies in some cases.

And so I said to them, **“So to what extent is technology affecting these magnetic storms?”**

They said “Technology on the ground has a big part to play in how the electromagnetic storms can affect us.

And I said, **“What tech is it that affects the magnetic storms?”**

They said “There's DARPA and the Department of Defense, that have these different types of tech, which can divert and manage magnetic storms. They weren't necessarily saying they've they create them. They're saying they're using them divert and manage magnetic storms.”

I said, **“Are magnetic storms from solar activity and planetary alignments, and are they going to be, intensified during 2024? Will the cosmic rays affect the atmosphere?”**

They said “The solar activity has been ongoing for thousands of years, and it is not increasing in intensity or frequency. It is just that we now have sophisticated equipment that can monitor what is currently happening. And it can appear like it is intensifying exponentially. This does happen in cycles throughout this planet but it is in no way unusual.” they said.

I said to **“Do these cosmic rays, do they create a weakness in the magnetic field around Earth?”**

They actually said “No. If the magnet field changes, the whole bio system of earth would be catastrophically affected, however, changes in the magnetic vibrations do occur naturally and are all part of earth's natural heartbeat.”

So then I asked, **“Does the solar energy from the galactic center or the godhead, does that create energy which affects us our moods and our and our energy?”**

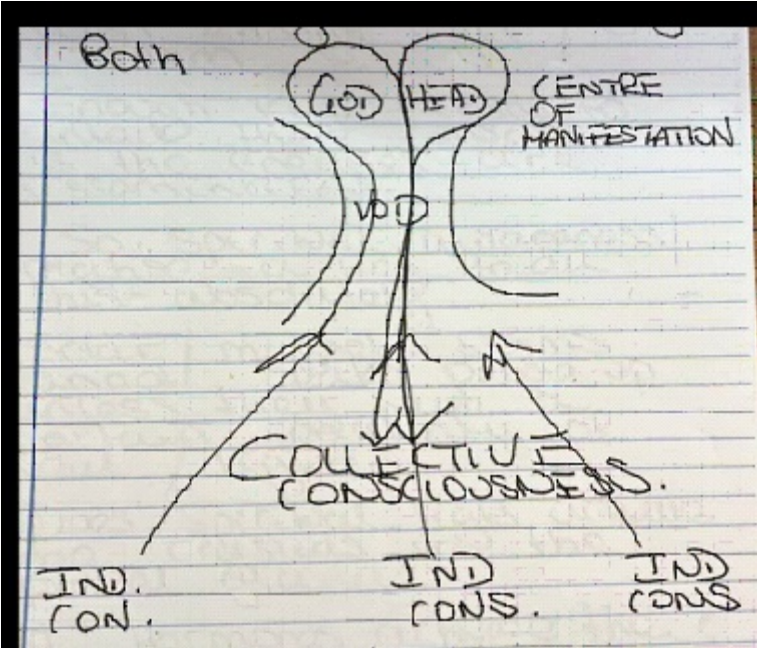

And they said “Absolutely, as energetic beings, any variance in magnetic or solar frequency will have an impact on the collective, albeit temporarily in most cases, but it happens, as the universe has its ebbs and flows.

So I said, **“What is the godhead like in quantum terms?”**

And they said “The godhead is a portal through the void into the well of energy where all manifests, and all is created. And they said our collective mind and our energy and vibrations travel to the godhead or the galactic center, and then it responds.

And I said, **“So does it respond to us collectively or individually?”**

And they said “Both.”

And as you can see from the diagram that I drew, the simplistic diagram, you have everybody at the bottom with their individual consciousness which joins together to make the collective consciousness, which then flows into the void and reaches the godhead where then things can manifest.

I said, **“Can the activity from the solar storms and the geomagnetic storms create an awakening?”**

They said “Yes. As energetic beings, the solar storms and the magnetic storms can and do affect consciousness and therefore, in some cases, can cause an awakening in people whose souls are ready with enough light or wisdom. And who have enough keys and codes to unlock their consciousness as the energies are disseminated.

I said, **”So spiritual awareness and practice is a key to all of this?”**

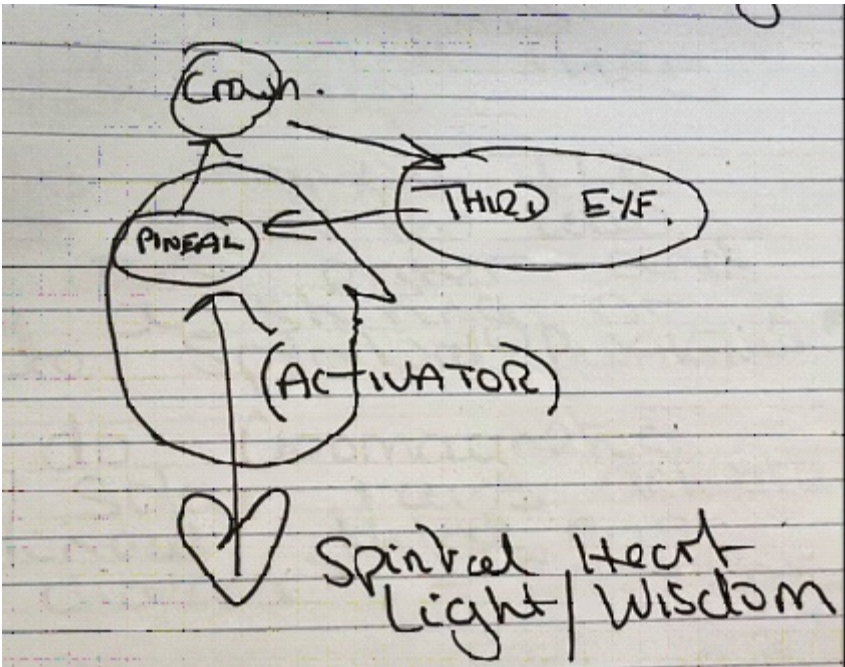

They said “Absolutely, they said solar and magnetic storms cannot awaken people unless they have a certain maturity of soul or light. Light is another word for consciousness.”

I said **“Does spiritual light also activate the crystals in the pineal gland?”**

They actually said “No. Hormones activate the crystals in the pineal gland which are sensitive to the magnetic frequency and vibrations of light and sound.”

So then I said, **“So are you saying that the hormones awaken people?”**

And they said, “No. The hormones of the pineal gland helped keep it activated, but it doesn't become awake until the crown chakra and the third eye are activated. The pineal is only one part of the circuitry.”

And as you can see in my diagram, What you have is the crown, the third eye, and the pineal, and the activation of these three centers is through your spiritual heart absorbing enough light and wisdom. And this then creates an awakening in the crown, the pineal and the third eye.”

And so they're saying that that's the circuitry that you need to awaken through having enough light in your heart and open heart in order to activate that circuitry to become awake.

And I said **“Do geomagnetic and solar storms activate the heart chakra to start this process?”**

In some cases, the increased energies from the galactic center or the godhead can activate the process to awaken the circuitry of the third eye or the spiritual eye, but normally, this has to be through a dedicated practice of opening the heart through your spiritual practice, and often it occurs in a moment of surrender when people's hearts break open, and they then call for help and in that moment, the energies from the godhead can enter and create a stirring of complete spiritual awakening.

And I said, **“How do geomagnetic pulses or solar rays activate the pineal third eye or heart sharper?”**

Go back and see what we've just said.

I said, **“Could these magnetic rays or solar storms affect power grids?”**

They said “Yes. This is something that can and will happen during this cycle of increased solar and planetary activity.

And I said, **“Will people lose their minds if the energy during all these increases in solar activity or magnetic storms?”**

They said “It can affect people on many levels because they're energetic beings.

And I said, **“Is there an event coming that will be the culmination of increased solar activity, and magnetic storms?”**

They said “The energy will affect people because they are energetic beings and all will be affected in different ways, but one sudden pulse or event is not anticipated. It's more like you'll have pulses of different frequency and that they may come in more frequently or faster.

I said, **“And how is this going to affect people?”**

They said because people are energetic beings, they will feel it in different ways depending on where they are, where it is in their physical body they have a weakness or a strength, for instance or where they are in their spiritual journey. So everyone will be affected in different ways.

And I said, **“Will it have an effect human behavior?”**

And I said the energies can affect people's vibrations, which can affect their behavior as they upgrade, they cleanse, and they heal.

I said, **“Will planets that are pulling energy from the sun will this affect earth?”**

And they said, “Yes. These solar and planetary energies in culmination can affect the earth.

And I said, **“How do they affect it?”**

They said “It can affect and produce movements in sea levels and direction, and it can affect the movement of tectonic plates which can create volcanic activity, and it can create weather pattern changes and it can create colder or hotter temperatures.

I said **“In October 24, is there an event that we are anticipating?”**

They said “It is ongoing. It's not just one event, and it's just because earth is shifting through a normal cycle through its normal development, its normal lifespan.

I said, **“As energetic beings, can this solar magnetic energy affect our latent strands of DNA?”**

And they said “Yes.”

I said, **“Can it create a spiritual awakening?”**

They said only in those whose souls are contracted to awaken at this time, and even then people have free will?”

So I hope you've really enjoyed this information today.

You can find me at locals.com or Rumble.

And for non-political information, you can find me at YouTube.

And I look forward to seeing you next time.

Bye for now.

About the Author—Michelle Fielding, her-awakening experiences

Mid 2023

<https://rumble.com/v38mh12-bruce-poppy.html>

"So I think what's happening for me is that I'm getting information maybe three years out, sometimes further. And so when people first hear it, it sounds incredibly difficult for them. It sounds crazy, because we're talking about technological advancements that we've never seen before. And we probably don't quite understand. So as I said, when it comes in, I'm just a clean vessel. And I always repeat it back when I read out my channeling, I always read it exactly word for word. I don't try to interpret it.

And sometimes it doesn't make sense initially. But then as you go down a bit further down the line, it does start to make sense, maybe a year or so later.

*And somebody introduced me to something called **Reiki**, which I'd never heard of. ...So my friend had this piece of paper with a symbol on it. And she put it underneath this healing bed. And as I got on the bed and I could feel the energy of the symbol coming up through the bed before she'd even started.....And it was the most incredible life changing experience. And while I was having this treatment, I could feel numerous hands on me, even though there was only one lady in the room.*

Bruce: Hey, what's going on everybody? It's Bruce Poppy. This is unpopular viewpoint. I'm super excited today. I got my special guest here right on the screen with me, Michelle Fielding and just so you know, in case you're wondering, because of the time change, she's at an undisclosed location somewhere in Europe over on that part of the world. Because of the whole time change thing I got confused. So I thought we were going to be doing a live stream later tonight, but we're going to record this now this afternoon. And I'm going to be uploading. So you'll be seeing this as a replay this evening when I put it out there for everybody 7:30 tonight is what I had intended, but like I said, time zone thing, my brains all a little bit foggy and messed up. So I'm super excited. I want to welcome all my friends and family and fellow patriots and even you trolls, haters and stalkers. If you guys hang around for a minute, you just might learn something. I got to meet Michelle Fielding in person a few months ago when she came to the United States, had a little bit of holiday vacation time. And then we went to Hawaii for the Truth event out in Hawaii and got to see her in action. She was sharing. She led us in a meditation that was just crazy powerful. You just feel that I'm actually getting little tingly bumps on me now just thinking about it. So she's been a powerful force doing spiritual coaching and mentoring and different ascension type stuff for many, many years. And so welcome, everybody. Welcome, Michelle to on unpopular viewpoint. How are you today?

Michelle: How are you doing, Bruce? It was great to meet you over in the US and then go to Kauai, wasn't it? It was a fantastic location. The energies were incredible and I think you did some meditating on the beach there when you were there and so did I. And the thing that I noticed about Kauai was where as you would normally sort of go through a bit of a process, bringing in the energies, taking a bit of time. It was like, whoa, wasn't it? You just close your eyes and the angels are there. It was incredible.

Bruce: Yes, aside from being just a beautiful location, you are 100% correct. There was a very spiritual uplifting energy that was there the whole time. That was my only trip to Hawaii. I've never been to any of the other islands and everybody knows what's going on now and Maui and the fires that they're calling "wild" fires. There's something just fishy and Denmark there. Something just doesn't add up, lots of different things. I don't know exactly what could be verified and true but there's lots of people suffering over there. So we keep those people lifted up, sending protection vibes and energy to them out there, what they're going through in Hawaii right now.

But since people may not know who you are or what you're about could you give a brief description or background bio on yourself so people can understand who you are, what you do and how you got into doing the spiritual coaching stuff that you do.

Michelle: So going all the way back to the very beginning, I used to work in corporate business as a personnel consultant. And I didn't really like the corporate world. I didn't like the politics and because I was an empath, I didn't like all the backstabbing sort of energies.

I decided to move out of that and go sort of self-employed. And after I had my daughter, I got quite unwell and I had to stop working

for a little while. And somebody introduced me to something called **Reiki**, which I'd never heard of. And I hadn't been very well. I had been doing traditional things, going to the doctors and things and trying other things like reflexology, which were helpful. But I'd never heard of this Reiki.

So my friend had this piece of paper with a symbol on it. And she put it underneath this healing bed. And I thought she was probably a bit mad at that point, because she's going back quite a long time ago. And I got on the bed and I could feel the energy of the symbol coming up through the bed before she'd even started. And then she explained to me, you're going to feel maybe some heat or something when I put my hands on you and don't worry about it, but if you want me to stop... the normal sort of things that a healer would say.

And it was the most incredible life changing experience. And while I was having this treatment, I could feel numerous hands on me, even though there was only one lady in the room. All the guides had come to help, hers and mine. And again, this feeling of the energy from this symbol coming up through the bed.

So I never forgot about that experience. And I moved then to Spain. And when I arrived in Spain, I started to have these feelings in my hands, like really hot feelings all the time. And when I was around people, I could see where energy was stuck on them. And I wanted to kind of put my hands on them and push the energy out. It was overwhelming. And in the end, I went to see a spiritual coach.

And I sat there for about an hour and a half, maybe two hours telling this spiritual coach all these things that were happening to me, all these, what I thought were weird experiences of things I was seeing and hearing in my hands. And he just sat there and listened. And then at the end, Bruce, I was expecting him to sort of talk to me for maybe an hour about what I needed to do.

And his advice was this, he said to me, "I want you to go home. I want you to write on a piece of paper each day,, "Universe, tell me what I need to know and give me the correct words to say it or do it or action to do it."

It was something very simple. And that was all he said. And I came away from there thinking, "Wow, I just sat there for two hours telling this man all these things and he says just to pin this on my mirror and say it every morning as like to the mirror."

I thought it was crazy. Anyway, I did it because something was driving me to understand all these things. I want you to know. And it completely changed my life. Because in spiritual terms, if you want anything to happen, like you want to meet your angels or you want help from the Universe, you firstly have to ask.

You have to ask. And then the second part of it is you need to believe that something that you're asking for could actually happen. And then the third thing is you have to be ready to receive it.

And boy, Bruce, what happened then was amazing experiences. I started to see angels. I started to have all these different orbs coming into my life. So I would be like lying in bed and orbs would roll in on the floor. It was just incredible.

And at that point, I didn't really understand what all those things meant because we're going back a long time now, maybe 30 years. But then bit by bit, I realized that the reason I had enjoyed the corporate world was because I had enjoyed helping people and the reason I hadn't enjoyed the corporate world was because it was fake.

So I took away the part that I liked, the helping people and I asked the Universe to show me how can I be a spiritual coach? And then I had about 10 years of lessons, very hard lessons, very difficult things happening. And I didn't understand at the time, but they were the initiations I needed to be able to then become somebody who could help others.

Because now when people come to me with different things going on in their life, not only can I read them energetically, but also I can have empathy for them and compassion because I'd also been through very difficult situations. And so the Universe had given me exactly what I asked for. I had said, "Please help me become a spiritual coach". And it took a long time, but it's because I had to go through all of those different learning experiences first.

And so then I was doing that, Bruce, I was teaching groups in my hometown. I was teaching online, I was writing a book about angels, I was doing all sorts of things. And then we got to the freaky flu and obviously everything got shut down. So all my normal business at home, people couldn't come anymore.

But this is the amazing thing, Bruce, that about a year before the freaky flu, I have been saying to my groups, I'm going to be winding this down. Because they're telling me, my guides, I've got to go online and I've got to reach a bigger audience. And I said to my groups, I don't know how I'm going to do it because I didn't have any technical ability at all. I didn't know anything about doing this type of thing, Bruce. I didn't even have a website.

And so I had gradually started to make a website, I was watching lots of YouTube videos about how to be a YouTuber. And then the flu came and I realized I had everything ready to go. So then everything hit, as you know, and there was this narrative going out, obviously outside in the news and what everyone was saying. And I was getting very clear, it's not what you're being told. None of this is what you're being told. There's something else going on.

And so bit by bit, what they started to explain to me was that there was this world change going on, and everything was going to look different and the politics and the structures were all changing. And then about a year in, I started to get the channeling around the real situation that's going on in terms of how the world is going to be.

It looks like it's going to be overseen by some kind of military concept where we're going to be free of these governments and control and we're going to be able to vote from the realized position in our homes. And it looks like the military, the highest levels of military are going to, I don't know if replace is the right word, but they're going to be more active in our lives than maybe they have been before, or maybe they have been, but we just haven't realized. And this is what's going to allow for this corrupt governments and structures to be taken out.

Bruce: That's a pretty incredible story. So just to kind of back up a little bit and probe. So when you were in the corporate world, I mean, you had no intention. I mean, did you have any upbringing in any type of spiritual or religious type of sense? When you're in that corporate world that you have, I know about being an empath, but my wife Naliza is a huge empath.

And the more that my awakening happens and my sense, I'm becoming more of an empath. I'd not used to be that way. I used to be the guy that, but I don't have a heart. I was always pretty selfish. But as I gave in and started to explore these different options or these different to the spiritual sense, because we got realizing come back up 100%. This whole situation that we're in on a global scale, it's really, it's a spiritual battle and has been for a very long time.

There's that that whole saying nothing can stop what is coming. This has been a plan. Talk about the plan. This has been in place for many, many years for this transformation, if you will, or a replacement use that word transition from the way things have gone, the corruptness and the ruling elites kind of having their boot on the neck of humanity. I've used that term a lot. They've had that for many, many, many years, that we were essentially slaves in their system. And so we're going to be transitioning out of that into a new age of, I call it love and light.

There's different people that use the term the Age of Aquarius, a thousand years of peace or whatever you want to call it. But we are on that path. And so it being you didn't have any of that spiritual upbringing in your background. When this stuff was going on, as you were learning and you asked the Universe, because that's key.

And anything, when we talk about manifestation or any of this type of stuff, if you have to ask, you have to put it out there, and then believe that what you're asking for is going to happen. And then when it's there, you got to be able to see it and step into that role. So do you think that you are different or special in any way? Or is this what you have done or gone through or whatever, there's lots of different people in different stages of ascension, that anybody can move and partake and be a part of this spiritual situation? Is it a learned thing or do you think it's an imparted gift is kind of my question?

Michelle: Well, I think the thing is I was probably born as a high vibration being already, but because I was already it, I didn't realize that. I was that because I was just it every day. It's like, if you're a dog, and you never look outside and you see other dogs, you only

think you're a dog. It's not until a cat comes along that you realize, actually, there's something, what's that? Right.

So in your story, you're explaining you are a certain way, and then there was this change that happened, and then you could see the difference. For me, it was like I'd already been awake, and nobody understood me. So as a child, I was quite isolated. I was on my own. I did and I had all this sensitivity and I was always being told, "You're too sensitive. You need to stop being too sensitive." And so my family who weren't awake were always trying to close down that side of me.

So I don't think I'm special in any way, but I just think that when you don't understand that the things that are going on for you, other people don't feel or know that, that was when I became awake in a way, when I realized that actually other people don't get it. They don't understand what I can feel and see. And that can be quite painful then because you are then even more isolated because now you realize you're maybe the only one in the group that's around you. So it can be quite a lonely journey. And if anything positive has come out of the last three years, is that we've all found our group, we found like-minded people. And even if we're only talking through a screen that we are today, it's very good to have that connection, even if it is to a screen, rather than to think you're the only one and you're not understood.

Bruce: Right. And I think that was part of the evil plan, one of the elements of that plan is that the six feet apart keeping everybody isolated, locked down in your houses. But that's, Mark Atwood has said the same thing and I totally believe that the freaky flu as you call it was probably one of the biggest blessings that they ever put on humanity because of the fact that people realized, hey, I'm different. And there are a lot of people felt left on the island. That's one that I've mentioned a lot of time is this whole Truth Tour thing that we did, getting out and doing these different events all over the country. There people realized, "Hey, I am not alone. There are other people who feel and sense and see the things that I see."

And we're building this, I want to say, community, but it's bigger than the community. We're being connected via screen, you're way over there in Europe somewhere at an undisclosed location and I'm here in the US, but we can connect and there's when I've met you in person, That's one of the beautiful things that I appreciate about the ascension process and how it's affected me in my life is that I can sense from people that I meet. I just feel like I've known you my entire life, right? You get that you're on that same vibration, that same plane, that similar frequency and that you just connect with. And there are so many people out there who watch this show and other shows and people we've met in person. That's been the blessing of this thing that we know and realize we're not alone. There's not some freaky thing that's wrong with us, that we are the normal ones and everybody else is the freaky crazy ones because they just can't see it, because once you see it, you can't unsee it, right?

Michelle: Yes, I mean, things that are just very normal to me, to my family and my cousins and uncles and aunts, to them, they just think I'm crazy. They can't see it at all. And it could be just simple things like I would never drink tap water or I wouldn't use fluoride toothpaste. This is before the freaky flu for certain things that just didn't feel right to me. And I didn't really understand this bigger plan that we've all now found out since. It was just normal for me that I had a bad feeling about a certain thing and I didn't want to do that. I would find a better way to do it. But yes, I think with the lockdowns, they didn't really plan for how much that would bring all of us together and make us stronger.

Bruce: Yep, absolutely. Yes, they grossly underestimated that particular factor in their equation. Yes, because there's been a lot of people I interviewed, I think it might have been from 2012 around that time that there was an ex-military guy that I think it was Kerry Cassidy who was interviewing the guy. And they were talking about that Project Looking Glass situation where no matter what information they put in all the different variables and factors, everything always ended up at the same place, right? Doesn't matter what decisions there's nothing that can stop what it's coming. This was always going to happen. No matter what people try to do to stop or slow or change that course the Universe has this plan in place and it's all for the benefit of humanity. And that's some of the stuff too that's very intriguing to me is I haven't gotten that deep or that maybe that's not my vein of purpose.

But in the channeling that you've done you seem to be sometimes years ahead of when things actually start to happen. And you were talking about certain things, you didn't know what it was before when you started talking about it, but now years later, you're seeing and getting validation from other people that hey, I was talking about this a while back and everybody thought I was crazy. Now I seem to be on the right page. And so talk a little bit about your channeling stuff and how that worked and where you started doing that and that some of the information you were given back then.

And then just like on your rumble channel and I'll share that information and make sure I put it in the link, the description, the link for your rumble channel. And I will all in a minute here, I'll show you your website, the golden heaven on earth website, lovely, lovely [website](#)

. And so you just did a show yesterday with Derek Johnson, Brad Wansley, and the other one, AJ Roberts, they were talking about the stuff that you don't understand, you're not that technical a person. But the information that's being downloaded for a better sense of the word or imparted to you is being validated. So talk a little bit about the channeling aspect and how that's kind of coming full circle and you're becoming validated for stuff from a few years ago.

Michelle: So before the freaky flu, I used to channel the Great White Brotherhood and they're a group of ascended masters who teach different schools of learning, different schools of thought from the etheric realms. So if they needed to teach about love, for instance, I might get a certain teacher come in that would channel a lesson. And on my YouTube channel, there's plenty of those, there's plenty of messages from that group of people. And then you have one other one in there called commander Ashtar. And he's been heavily debated over the past three years and I've chuckled about it. Is he this, is he that, is he something else. And about, I would say in 2014, when he used to come through, which is not that often, but when he does come through, he used to put a symbol at the bottom, which was like a triangle shape at the bottom, two triangles like that, you should look like something out of Star Trek. And that's how he used to sign off. Because when I'm channeling, I write everything down and sometimes they'll draw me pictures and they'll sign off in a certain way. And then the freaky flu began and I started to get information as you know about Starlink. And I was being told, as I said before, about how there was a different system coming in which was going to replace politics.

And in the beginning, I didn't really understand any of it. I mean, I don't understand about cybersecurity and military plans and things like that. So I've been putting out information from a pure place. What that means is I'm not more special than anybody else. But what happens is if you're given information that you don't necessarily understand, then you can't have any emotional reaction to it, because you have no motivation to adjust the message in any way.

So the best way to explain it, Bruce, is if for instance, right now, I started channeling Japanese. Now I don't know any Japanese, right? So if Japanese started to come through me right now, I wouldn't have any opinion about it, because I don't understand Japanese anyway, I would just be writing it down, whatever they told me.

And that's what was happening with a lot of my channeling since the freaky flu. And so as you've rightly said, some of the things in the beginning were a little bit intense. I didn't understand them. And I don't think the audience really understood it either. But now just recently, it's been shown that there is this Space Force, and there is this Delta division with that symbol that I've been drawing for over 10 years. And I think the etheric counterpart is the Galactic Federation overseeing it all. And that's where Commander Ashtar comes in. But of course, at that time, 10 years ago, I didn't understand all of that.

So I think what's happening for me is that I'm getting information maybe three years out, sometimes further. And so when people first hear it, it sounds incredibly difficult for them. It sounds crazy, because we're talking about technological advancements that we've never seen before. And we probably don't quite understand. So as I said, when it comes in, I just, I'm just a clean vessel. And I always repeat it back when I read out my channeling, I always read it exactly word for word. I don't try to interpret it.

And sometimes it doesn't make sense initially. But then as you go down a bit further down the line, it does start to make sense, maybe a year or so later. And yesterday, I was, as you said, I was on with Derek Johnson, and Brad and AJ. And now seems that a lot of what I've been saying for some time, even before Derek came on the scene, has come has come to fruition. So it's pretty incredible, really, Bruce.

Bruce: Oh, yes, that would be mind blowing for sure to not have any concept or understanding of information you're getting. But then also having the trust in what you're getting and also the guts, if you will, for lack of a better word to put that information out there,

even though you don't completely understand, hey, this is what it is. This is what I'm getting, good, bad, or indifferent. Here it is. And then let the chips fall. So I'm excited that getting to know you and hearing this information, seeing the things that you were given starting to come to fruition. We had mentioned, we were talking before we started recording, there's a lot of things that are coming that way.

We joke around what's the difference between a “conspiracy theory” and the truth? And it used to be about 18 months. Now it's in the three to six month range. So we're going to have to find some new conspiracy theories because all the old ones are coming true. So they're not conspiracy theories anymore about the hokey, pokey, the freaky flu the corruptness in all of our political situations doesn't matter the country or in it's a global situation.

And it's all the same. So the tearing down and the replacement of that is super exciting. And there's many people, myself included couldn't have a certain level of frustration, because maybe we were read in through an impartation or just or something or research, whatever. And we would, I mean, many of us thought that this whole situation would be over. And we would be on the other side of it a lot sooner than is currently happening. So there's a lot of people out there that may be like myself having a level of frustration, wondering maybe losing some hope that, hey, maybe this is all bullshit. And we don't know if we're going to be slaves for the rest of our lives, there's nothing's going to change. So you're were battling, right. But I've seen and I know, like I know my own name, that this is moving forward. The zit is about to pop, if you will. And we cannot change it. It has to be done this way, because really, we only have really one shot to be able to make this transformation happen and for it to stick.

Michelle: I think the thing is Bruce as well that we might have thought in the beginning that someone was going to come in and save us. Thought the white hats were going to run right in on their white horses behind Donald Trump. And that was going to be it was all going to be sorted out.

And what we've learned and what I'm learning still is that in order to have this new system, all be a technological system, people have to be able to discern what is right for them and to be able to make decisions on their own. And so what is going on here is we're trying to unravel years and years of programming. So we're doing a reversed psychology programming on everybody. We're trying to reverse the programming that they've already had through a psychological operation.

And so when you're seeing things like the arguments about transgender or not, or should is Ron DeSantis good or bad? Or is somebody else this or somebody else that and all these arguments that create sites all the time. And it really, even commander Ashtar. Is commander Ashtar, a bad entity or a good entity. In the last three years it has been brought up and argued about so everybody's blue in the face. And the point of it all is this, that at the end of the day, you've got to decide, do I like commander Ashtar? Is he right for me, yes or no? Do I agree with the transgender movement? Is it right for me, yes or no? Do I agree with Ron DeSantis?

And all the arguing is really being created deliberately so that you exhaust yourself with all the back and forth so that in the end, you just say, do you know what? I'm out. I'm just going to go with what feels right for me. And it's kind of teaching people. You don't listen to that platform or that radio or that TV station. Yes, you can listen, but at the end of the day, you've got to start deciding what information is right for me. Because what you'll see is you'll see certain platforms could be Fox News, for instance. I'm just putting out any name now. And on Monday, they hate Trump and on Tuesday, they love him. And then on Wednesday, they hate him again. And then on Thursday, they don't.

And so people are confused. Does Fox News like Trump or not? And that's the point. The point is you've got to decide, do you like Trump? Not what Fox News is telling you. And so what the slow process is, if you can think of it that way even, I think it actually, if you look at the whole thing, what they're trying to do worldwide, it's going really fast that the amount of change they're trying to create on humanity. Oh, yes. It is a huge task, right?

But in the end, what will happen is we all need to be able to discern what we want for us as individuals as individual people, what's right for us. And then by the time people have been deprogrammed to be able to do that, then the new technology, which is already there and running in the beta will be available to us for us to then do this voting for what we want from our homes. And we won't need all these government structures in the same way telling us what we should think basically.

Bruce: Right. I mean, that's a powerful statement. I mean, I hadn't really heard it, but the way you just explained it light bulb kind of went off in my head that this process is about us growing and us getting in touch with our individual selves and what's right for us and helping us to think on our own. I mean, because we know that there is a group or collective consciousness, if you will that hundred monkey effect type of situation where even though we're separated, we can have our own thoughts and minds, but we are being drawn into some more collective sense.

But that's different than what you're like, just a group think type of thing where they put out there and we're supposed to go XYZ and do this. And this is the way we're supposed to do it. But that might not necessarily be the same. But so there's, it seems like it's the same, but it's really

What I'm saying that the collective consciousness and us being individuals is one sense and it's different than the programming and group think that has gone on for hundreds and hundreds of years. And I agree with you 100% that the amount of change and the things that we're seeing is a huge rapid scale compared to the hundreds and hundreds of years of all this stuff that we that have been forced into us and our minds and how our programming call it brainwashing, programming, MK Ultra, whatever you want to call it for all this time, the changes that have happened just since the freaky flu has been mind blowing.

So it is moving at a rapid pace. But the people like yourself or even some of the, what I call OG type of truthers people like the David Ikes and the Alex Jones and the Max Egan's have been on this path since way what they would like had his awakening in the 80s. I can't even imagine trying to fight this battle for 20, 30, 40, 50 years. We're just three, four, five years into it myself. And it's already frustrating and overwhelming. So this has been a process that is moving rapidly. And it is about individualism. But it is also about us moving to a higher place rather than it's a selfish situation. It's more for everybody else, because you had mentioned about wanting to serve, help people. And that's what kind of the good part you pulled out the corporate sense. And that's what's been driving you in your own entrepreneurial and your individualism as a spiritual coach is a wanting to serve people serve and help people become better. And that's, I think, the changes that are that more people need to be because there's still too much greed and selfishness that are driving a lot of people, especially even in our own movement.

There's people out there that's all about them that they don't really care about other people. And that's just changed. Lewis mentioned it all the time that we're moving into this like an age of authenticity that the fake ones and the people who are selfish and call them Pay-triots, PAY looking to get a paycheck or look at to maximize their own game through this whole situation. Those ones are going to fall by the wayside and moving forward. And as we transition, there's going to be a lot of people that need the healing and some explanation and some guidance and teaching about how we move forward. So I think that's where we're at. And I'm super excited to be associated with you and about it.

So tell us a little bit about some of the most recent channeling about the system because you'd mentioned about a, you talked about a military thing that's going to be global, a peace system. And right in the, as soon as you hear that, it pops in my mind. Well, that sounds kind of like the New World Order, the one world government situation. So can you talk about your, what that is looking like for you and maybe how the differences are from what that New World Order, what they're great reset, they're trying to put us into versus what the, the Galactic Federation and the these higher powers are guiding us to.

Michelle: So basically, it is a one world system in the sense that all countries around the world will be signing on to this system, this worldwide military system. And in order to be signed into it, they have to agree that they're going to abide by the precepts of peace, not only to their citizens, but to other countries. And then if they abide by, and there'll be obviously lots of others, but this is the basic principles that I've been told. So all the countries sign into this, this technology which gives them access then to the quantum system, which can run your quantum banking, communications, your military, everything.

And below that, you've got the people who have decentralized to the people. So in your home, you have your quantum computer laptop, whatever. And if you and me, Bruce lived in the same street, and we wanted, we needed someone to come and empty the bins, we would have our options on our phone who wants to do the job. And each of us in our home in, on our street would vote for that bin

man or whatever. And that will be the one we get. There'd be no need for any governments or bureaucracy to interfere. We would just vote from our quantum phone to the quantum system. And it's as simple as that really.

And if any countries start to not abide by the peace plan, because this will create a peace plan, because the countries have to abide by the rules of the treaties to be involved. So let's say one of the countries decide they're not going to do that, they're going to pull away from the original ideas and try to control their citizens. Okay, let's imagine they try to control us. The system will lock them out. And no country is going to want to be locked out or something that's going to shut down their communications, shut down their banking, shut down their internet, and stop them from trading and being a part of this whole group. So it's about controlling the leaders of the countries, if you like, making them do the right thing, if that's even the right term. And the people having complete freedom and being in a decentralized system where they're not having to be controlled by bureaucratic and corrupt officials, because there won't be a need for those all those layers that we've got right now in between.

Bruce: Well, that makes lots of sense. So the difference between what the World Economic Forum, United Nations, all these different groups pushing for this great reset, the one world government type of situation, that is centralized. They are the ones who make the rules that we have to abide by those rules. But what you're saying is the system is decentralized. The new system is decentralized where we the people, like your shirt, we're pissed off. We have control. We the people make those decisions. And based on the security of the systems and the quantum that it can't be messed with or corrupted, if you will, because of the decentralization blockchain, if anybody knows any about that type of stuff, it's very nearly impossible. It's trackable and you can't F with it, right? It is what it is. And it gets the truth. So that's a huge difference from what people think of as a one world government.

But when you talked about the whole global thing, it's decentralized giving we the people the power versus the politicians and the politicians then are at our command, which is what they should be all along. Most countries have the constitutions and their documents, founding documents, whatever, that is the people that are supposed to be controlling and having decisions in our freedom where they're trying to steal that away from us. So that's super exciting.

That's when you talk about the quantum system, the financial system includes banking and the finance and monies the quantum internet, where it's decent, there's no one person throttling or the censorship that's now going on all the different social media is trying to drive the narrative in one way. And you can the truth is if you tell the truth or you attempt to tell something different than what the narrative is, be of a divergent opinion, then you're shut out, you're cast out you're demonized. That's what we're in the beginning phase of, us breaking through that.

So that's super exciting. Didn't, is there any timeframe? I mean, I know time we hate dates and time frames. But I mean, is this something that is that you see or you've heard or that you've received is a generational before we get into this thing, or is it potentially in our lifetimes or is there any type of guidance on that that they've given you? I'm just curious.

Michelle: So I just wanted to confirm, first of all, when we're talking about centralized and decentralized, and this is the amazing thing about the new system, the top bit is centralized, because all the countries are signed into it to make a worldwide military peace plan. So they're all involved up here, having to be in the centralized system, they all have to agree to act in terms of peace. Down here, it's decentralized and all the people can make all their decisions on their own. They don't have to be told what to do. And they send their decision what they want to do personally back up to the centralized system.

So in terms of when we're going to see this and time frames, this is why we're seeing on the ground, all the dancing around with elections and Trump and who was there fraud and it's taking longer than we expected. And is 24 going to run all that is just a story whilst they get this top system absolutely secure.

The Delta Force, which I was talking about earlier, which is part of this cyber system, is the system, is the departments where they are doing the cyber security, because this centralized system has to be very secure so that people can't hack into it or do things to it to adjust its security levels.

So what that why it is right now is it's built out, the country is assigning in, and what you've got is the Delta Forces up there, the cyber security people writing the programs, which you've heard me talking about before is web five, web seven. They're writing these software programs and layers and layers of different ideas and techniques to stop people being able to hack into it. And that's what the delay is.

And I've been told that they're hoping to release it to in a way that we can then move on with our lives by 2627. So what that means is on the 1st of January 2026, we're not going to wake up and it's all going to switch over on that day.

But what hopefully is going to start happening is you're going to start to see it being introduced more and more into your daily life. If you get this is multi layered, so it's going to be communications, finance, education, there's an awful lot to do. So in the meantime, to keep everything looking like it's business as usual, you will see the election process going on and all the normal things that happening that everyone's arguing about.

But Mr Trump was never supposed to be president. It was only meant to be a sting operation. And he's actually the commander in chief of this system up here, the military system. And so down here, all he is the salesperson, if you like, moving it all along at this level, keeping everyone doing that back and forth that we were talking about before.

Do we like Trump or not? Do we want Biden or not? Do we like Ron deSantis or not? Blah, blah, blah. And what that creates, which we didn't cover before, was that when people get overwhelmed with not being with not knowing, they back off and they go inside.

Now, this is where you get your rising in consciousness, right, which helps the global consciousness to come up, because all the answers are inside of people. So the disinformation campaigns are meant to make everybody agitated and angry and arguing and until they get so exasperated that they have to back off and they have to go away and think about it for themselves, i.e. they go inside. And while they're inside thinking about what do I want, what do I really think about this? They're becoming awake because they're no longer listening just to what CNN says or Fox or what the voice says on the radio. So the overwhelm is creating an awakening in people.

Bruce: I want to hammer that point a little bit because that's a huge, huge thing. And I would say that this is what's going on now, some of its purpose is to make people kind of freak out, get overwhelmed, withdraw a little bit and go inside and find out who they really are, what their purpose is, what really is important to them and helping them go forward. So until you get right inside, you're just going to be somebody who follows everybody else.

So, I mean, that's huge. And so people need to understand that some of this is intended to make you freak out and be overwhelmed so that you do that introspection, get in touch, get reconnected with God's source, Universe, how or what name you want to put on it, so that you can get the guidance and transform and raise your own level of consciousness, ascend, raise your vibration, raise your frequency. We hear all these different terms. So that's super powerful there. I love that.

Michelle: That's why you've got a lot of voices giving out information saying next week, this is going to happen, we're going to have an EBS or next week, there's going to be war in all over the world or next week, this is getting not going to have any food because all of those narratives, even though they may not come to fruition or they don't seem to be happening, what they're doing is they're creating this reverse psychology effect, because now people are having to think for themselves, they're having to think, could that really happen? I believe that's going to happen. Is that someone just saying it for the sake of making a video? I'm sick of it all, I'm just going to pull back and think for myself. So all of it's got a purpose, even the disinformation agents, it all has an underlying purpose of getting people to think for themselves.

Bruce: Now that's crazy powerful. And if there's one thing that people get from watching this show, that is it right there. This whole this whole connection, me having you on here, I believe, is a lot of people are going to hear that, and you're reading the light bulb is going to go on, and they're going to feel a release of some of the anxiety, some of the frustration, some of the overwhelm, right? We just we need to have the proper amount of whelm. We don't want to be overwhelmed. We don't want to be underwhelmed. We just need to find that proper amount of whelm. And so that's where we're at. And that's the key, the key moving forward. And we are in control of that. I mean, if more people would grasp that concept, we can control and move this timeline along further, right?

Michelle: Yes, because the whelm is that place when you're content and peaceful with what you've decided, and who you are, and you get up each day, and yes, life throws things at you. But ultimately, when you know who you are, what you believe in, and you believe that you have a purpose and you're happy with what that purpose is, then you're peaceful. So the right amount of whelm is where people get up and they're content and peaceful with who they are essentially on the inside. And they don't allow all the narratives around them to disrupt that. They allow that just to listen, they look at it, but it doesn't disrupt who they truly are. And you've got that right amount of whelm, that right amount of peace, you're vibrating at a certain frequency, which helps everybody else around you.

Bruce: Yes, no, that's perfect. Yes. And then to this whole ascension game, I have used the analogy in my mind's eye, the visualization I got is we're on this ladder ascending this ladder. And there are people that are on the ladder that are further up the ladder than me. And you've been doing this a lot longer than myself. So I consider you are like one of those people. So you're up there, I'm reaching up, you're reaching back, you're pulling me up, right?

I'm doing the same thing. There's people who aren't at the level or frequency or the level of ascension or the same frequency as I am. So I'm reaching down that ladder, helping those people up. And everybody helps each other up the ladder. And it's a total unified effort. And that's one of the other key things when we talk about being unified, it's not everybody thinking and believing the same thing.

We just don't want to be robots in that sense, but unified in, in the sense of our individualism, of our love for humanity, of our desire to serve other people. Because if that's the ultimate thing, that love is an unconditional love, that caring for other people regardless if it benefits me or not, that's where we are in that, we're at that breaking point, I think in society.

And there's many more people that believe and think along these same lines. But because of the machine the matrix system, whatever, they're, they're fearful of stepping up and stepping out and walking in their purpose because of the potential social backlash, if you will, that may come on them.

They might risk their job or they might risk family members. I've had situations with my family members, I talked to tons of other people. You told me you had some family situations in the past as well. So there's all these different things that we're moving in a collective sense to be able to overcome.

I'm going to share real quickly, before I forget, I'm going to share the screen and share your website. So if you want to get find out more about Michelle and her stuff, what she does, she's got her website, which is golden heaven on earth, a really nice website that I like.

It's laid out nice, easy to navigate. Got some testimonials you have on here, different products and classes and videos you can get. You're talking about that. Is that you wrote that book, the God consciousness or your books are on here too?

Michelle: Yes, there's books on there, there's meditations. You can book sessions with me. And there's healing technologies on there like rife and scalar that you can buy through the website.

Bruce: If you want to see some of her stuff, you can check out her rumble channel. Does 2032 have any significance?

Michelle: Well, 2032 has been predicted as the point where we can officially say that we're in the Golden Age, which you were talking about earlier. Some people call it the Age of Love or the 1000 Years of Peace or it's a significant date when people have felt that that's when we will be able to sort of look around us and think that we're in a different state of consciousness, whatever you want to call that.

Bruce: Well, and then you also have a locals.com, right? That's connected to that as well. Yes, I remember you could join the locals.com through the Rumble channel.

And then you still, you're one of the few people that I know of that still has a YouTube channel that seems to be thriving. You put little blurbs on here, shorts and different things. So just search Michelle Fielding on YouTube. And I will put all the links for all this stuff in the description of the video. So if you miss it, you didn't see what I shared here, you'll be able to get that and follow Michelle's track and you'll be a part in supporting her and her work because she has done some doing some phenomenal stuff.

And I personally attest to her power and her energy. I've experienced myself in person meditations with her. And just her general vibe and how she carries herself, she's just a very even-keeled person. She and my wife hit it off really, really well. So I don't know if that's good or bad for me, may probably good said.

But as we, as we end up here, we're pushing getting close to our wish, any final words or encouragement or something to share with people to help them maybe better themselves become the best version because that's what we're doing is we're trying to become the best version of ourselves.

I don't know if you've watched him, but I found Ralph Smart, Infinite Waters. And yes, The Cat Down the Road. Yes, the cat down the road, exactly. So I watch him, he does a lot of great stuff and he's all about that similar type things. But maybe finally words of wisdom, something to help somebody become the best version of themselves.

Michelle: So not everybody is comfortable with doing videos or standing up and speaking out and they might not have the confidence or feel that they can do that. So then they wonder, well, what can I do? So what you can do is you can concentrate on how peaceful you are. Because everything is a vibration. We all vibrate. All of us are quantum beings were energy. And when you are in a room, people don't remember what you said. They remember, they remember how you made them feel. How you made them feel was based on how you were vibrating inside, how peaceful you were.

So if you don't know what to do in terms of speaking about these things, then perhaps look at just finding ways to become more peaceful with yourself, maybe through meditation or going for walks in the countryside or journaling or just becoming more calm with being able to go inside and listen to what's going on inside of you. And when you go inside through meditation or contemplation or just being in a calm place, you can become more clear about who you are.

And that is what you then do as a purpose. You go out into the world, you vibrate this level of peace, this contentment. And as it goes out, it touches all the people around you. And it helps them to have more peace and contentment. And that's how we change the world. A bit like your one hand putting someone up, one person leading, your vibration does exactly the same. It touches all the others. But it also does. Is it does this amazing thing where it leaves these little imprints like little keys. You imagine a key that can open a door, right?

When you go past people with your peace, you're leaving little tiny keys. And those little keys, they sit with that person until they go inside one day and they're thinking about their life and they're trying to find the meaning. And in that moment, when they're trying to find the meaning, one of your keys unlocks a little piece for them. And they get it. And the light ball goes on.

And all you actually did to help that happen, that process, was you looked after yourself. You looked after what's right for me, what helps me to get through each day in a peaceful way. And how can I serve others? And when you keep with that and you stay in your center, you are helping the whole of humanity. Because we're quantum beings and we're energetic beings.

And so what my spiritual guides teach me constantly is that message that we stand between heaven and earth like filaments of light. We're connecting the two heaven and earth. So our purpose, yes, we can be doctors and singers and hosts on YouTube. But our purpose is to find our inner peace to connect between heaven and earth, and then to vibrate that peace out to the others.

And as I said, if you feel comfortable with speaking up about things, then you do that. But if you don't, you're just as powerful by creating this feeling inside, staying centered, and sending it out to the others, who then get your little keys. And then that opens them up when the time is right. So there's no amount of work you can do on yourself that ever gets wasted. Because you never know when those keys are going to open something for somebody else. And that's just by you being yourself each and every day.

Bruce: Hmm, powerful. So yes, make sure you get to her website. If you've never done any meditation, you're kind of new to it and you're trying to be some guided meditations to heal, that's kind of where I like to start my journey is and on her YouTube channel,

you do have some guided meditations there that people can just play and get into a quiet space, someplace comfortable have that playing. And as you talk them through, which you have this beautiful angelic voice with that English accent, I love it, it's so soothing and calming and reassuring that the guided meditation go through that.

So a few times in your this process, you will build, it's like building a building or a house. You've got to get a good foundation, one piece on top of another. And then before you know it, you're on top of the world, you're affecting and you're changing the lives of other people that you don't even know about it, just by being the best version of yourself you can be.

So thank you, Michelle so much for taking some time sharing with us today. I cannot wait until we can be face to face again, because it wasn't just a pure blessing to hang out and chat with you here in Clearwater and then in Hawaii as well, then in LA and then Hawaii, so yes, all over the place.

So in one of these days, I'm going, if we can get some stability, it would be nice, I'd like to get over on to your side of the pond and explore some of that because I've never been over there. I want to come over there, see you, see Mark over there in Ireland, experience that whole culture and have a holiday over there on that side as well.

So thank you again for all your work and the inspiration and guidance you've given so many people all over the planet. It's very much appreciated and we will catch you next time.

So remember, I always like to close every show with telling people, make sure you know that love overcomes fear. The enemy wants us to live in this fear space and this worry. If we just operate in that love stay in that love bubble like Mike Jacob talks about, that love frequency, we will overcome that fear and we will.

There is no way, nothing can stop what is coming. We will change our world and humanity for the better for the future. And I'm super excited to be a part, be alive, and be participating in this transformation of our humanity, if you will, raising that consciousness.

So thanks everybody for watching. Make sure you like and share and all that stuff. Help us overcome the algorithm. We know we're still even being suppressed, even on rumble the numbers I know just they don't make sense. So there's some fun stuff going off. We're still being suppressed and different things. But if more people like share and even comment, if there's something comment that helps as well. So make sure you make it a great day and we will catch you next time. Bruce Poppy, Michelle Fielding, have a nice day. Thank you.
